Notice of Preparation

**City of Palmdale  
Palmdale 2045  
General Plan Update  
(General Plan Amendment 20-003)  
(Zoning Ordinance Amendment 21-007)**

**Notice of Preparation of a  
Draft Environmental Impact Report**

The City of Palmdale will be the Lead Agency for the preparation of an Environmental Impact Report (EIR) that will analyze the environmental impacts associated with a proposed update to the Palmdale General Plan (Palmdale 2045), referred to herein as the “proposed project” or “General Plan.” The actions that make up the proposed project are described below. More information on the proposed project is available on the project website at: <https://www.palmdale2045.org/>. The Planning Area for the proposed project includes the land within the City Limits, the Sphere of Influence (SOI), and several unincorporated Los Angeles County ‘islands.’ The proposed General Plan land use map showing the Planning Area is shown at the end of this Notice of Preparation (NOP).

**Project Description**

The proposed project is a three-plus-year comprehensive update to the City’s General Plan, the guiding document for the future of Palmdale over 25 years (2020-2045). The General Plan serves as the City’s primary guide for land use and development decisions and is a key tool for influencing and improving the quality of life for residents and businesses. As such, it serves as the “blueprint” for future development and conservation of a community. The General Plan will help the City plan for important community issues such as new growth, housing and infrastructure needs, and environmental protection. It also sets the stage for future social, physical, and economic development of the City. It addresses issues that impact the entire community, such as how land is used, where buildings are constructed, and the locations of infrastructure.

Under State law, the General Plan must serve as the foundation upon which all land use decisions are to be based, and must also be comprehensive, internally consistent, and have a long-term perspective. State law further mandates that the General Plan:

- Identify land use, circulation, environmental, economic, and social goals and policies for the City and its surrounding planning area as they relate to future growth and development;
- Provide a basis for local government decision-making, including decisions on development approvals and exactions;

- Provide citizens the opportunity to participate in the planning and decision-making process of their communities; and
- Inform citizens, developers, decision-makers, and other cities and counties of the ground rules that guide development within a particular community.

According to State law, General Plans are required to cover nine topics: land use, circulation, housing, conservation, open space, noise, air quality, safety, and environmental justice. Jurisdictions may include any other topic that is relevant to planning its future. The updated City of Palmdale General Plan will include the State required topics plus economic development, urban design, infrastructure, military readiness, community facilities, sustainability and resilience, and climate change.

The General Plan will focus on enhancing the community identity, building on planned infrastructure investments, improving multi-modal active transportation and connectivity, integrating health and equity, and capitalizing on the City's unique location in the region. Palmdale 2045's vision for the future includes the following vision themes.

- **Unified and welcoming community.** The Palmdale community values opportunity, diversity, and unity, and seeks to promote Palmdale's positive reputation while boosting community beautification
- **Active and vibrant downtown.** Palmdale residents desire a future downtown that fosters a sense of place, promotes local businesses, provides gathering spaces, and events, and improves the overall appearance of Palmdale
- **Diverse and high-quality job options.** Palmdale seeks to retain and expand its employment base through training for key industries, connecting residents to local jobs, and promoting telecommuting within the City
- **Diverse and resilient local economy.** The City of Palmdale values its existing aerospace presence and aims to leverage and diversify new economic opportunities from expanded transportation connections
- **Safe, healthy place to live and work.** Palmdale residents want to address crime and safety, increase access to parks and open space, and support marginalized communities like foster youth and those experiencing homelessness
- **High quality medical and mental healthcare.** As a medical provider shortage area, Palmdale seeks to improve access to quality medical and mental healthcare services and facilities by attracting physicians, maintaining the Palmdale Regional Medical Center, and expanding services
- **Housing options for residents at different stages of life and ability.** The residents of Palmdale desire to preserve and expand affordable housing and diversify housing types across the City that support residents of all abilities through different stages of life
- **High quality and accessible educational opportunities.** Citizens of Palmdale seek to promote and expand educational opportunities in the City including higher education, trade school, and formal and informal training programs
- **Beautiful natural setting.** The Palmdale community values its natural setting and seeks to improve connectivity to trails and open space, maintain mountain views, healthy air quality, and dark night sky

- **Forefront of transportation innovations.** On the cusp of major regional transportation improvements, Palmdale seeks to leverage planned investments and improve local transit opportunities
- **General Plan implementation.** Residents of Palmdale value the long-term vision of the General Plan Update and desire regular review and update of the Plan including metrics for tracking implementation

Palmdale 2045 identifies major strategies and physical improvements for the City over the next 25 years. These strategies include creating a vibrant downtown near the future multimodal transit station, establishing three health and wellness districts and two education districts, transforming Palmdale Boulevard into a mixed-use corridor, promoting a diversity of housing types in the City, forming village centers that offer a mix of residential choices and daily goods and services near existing neighborhoods, and building off existing industrial and aerospace business opportunities. These strategies will support existing and future employees, businesses, and residents by improving quality of life in Palmdale.

The following actions will also be taken by the City of Palmdale in connection with the General Plan Update and are also considered part of the proposed project to be analyzed in the forthcoming EIR:

- Adoption and implementation of the General Plan Update (Palmdale 2045 Plan)
- Adoption and implementation of the Climate Action Plan
- Adoption and implementation of the Zoning Ordinance Amendment

The Plan will also include an update of the City's Housing Element, in compliance with the requirements of State Housing Element law, which requires the City to adopt an updated Housing Element by October 2021. This Housing Element update will also be analyzed in the EIR.

### **Environmental Impact Report**

The Draft EIR will be a program EIR. Per Section 15168 of the State *CEQA Guidelines*, a program EIR is an EIR that may be prepared on a series of actions that can be characterized as one large project. The purpose of a program EIR is to allow the lead agency to consider broad policy alternatives and program wide mitigation measures early in the process when the agency has greater flexibility to deal with basic problems or cumulative impacts.

The EIR will examine each of the issue areas on the City's environmental checklist. Issues to be discussed include the following:

- Aesthetics
- Agriculture and Forestry Resources
- Air Quality
- Biological Resources
- Cultural Resources
- Energy
- Geology/Soils
- Mineral Resources
- Noise
- Population/Housing
- Public Services
- Recreation
- Transportation
- Tribal Cultural Resources

- Greenhouse Gas Emissions
- Hazards & Hazardous Materials
- Hydrology/Water Quality
- Land Use/Planning
- Utilities/Service Systems
- Wildfire
- Mandatory Findings of Significance

In addition to the CEQA-required “no project” alternative, the EIR will examine a range of land use scenarios that address one or more of the potential environmental effects of the proposed project.

The City of Palmdale would like to know your views or the views of your organization as to the scope and content of the environmental information that should be addressed in connection with the proposed project. Public agencies may need to use the EIR prepared by the City of Palmdale when considering permits or other approvals regarding certain aspects of the proposed actions. Due to time limits mandated by State law, your response must be sent at the earliest possible date but not later than 30 days after receipt of this notice.

Please send your response to Megan Taggart, Planning Manager, at:

City of Palmdale  
Department of Economic and Community Development  
38250 Sierra Highway  
Palmdale, California 93550

Megan Taggart can be reached at 661-267-5213, or by emailing [mtaggart@cityofpalmdale.org](mailto:mtaggart@cityofpalmdale.org). When responding to the NOP, please provide the name for a contact person in your agency.

The City of Palmdale will hold an EIR Scoping Meeting to provide an additional opportunity for input on the scope and content of the EIR. The Scoping Meeting is scheduled for Wednesday, June 30, at 5:30 p.m. Please check the project website (<https://www.palmdale2045.org/>) to confirm this meeting time prior to the meeting. Due to ongoing restriction related to the COVID-19 pandemic, the meeting will be conducted virtually.

To join this meeting, please register in advance by clicking on, or pasting into your web browser, the following link:

[https://us02web.zoom.us/join/register/tZwozemvrTIsHtYjmm9iVRZyXjtO\\_-TEK9Rg](https://us02web.zoom.us/join/register/tZwozemvrTIsHtYjmm9iVRZyXjtO_-TEK9Rg)

After registering, you will receive a confirmation email containing information about joining the meeting. Please note that this meeting will occur prior to a Joint General Plan Advisory Committee and Public Workshop (and will use the same meeting link).

RE: City of Palmdale 2045 General Plan Update  
– Notice of Preparation of an Environmental  
Impact Report (NOP)  
SCH # 2021060494  
GTS # 07-LA-2021-03634  
Vic. LA-138/PM: 44.445

Dear Megan Taggart:

Thank you for including the California Department of Transportation (Caltrans) in the environmental review process for the above referenced NOP. The proposed project (Palmdale 2045) is a three-plus-year comprehensive update to the City's General Plan, the guiding document for the future of Palmdale over 25 years (2020-2045). The General Plan will focus on enhancing community identity, building on planned infrastructure investments, improving multi-modal active transportation and connectivity, integrating health and equity, and capitalizing on the City's unique location in the region. Palmdale 2045 identifies major strategies and physical improvements for the City over the next 25 years. These strategies include creating a vibrant downtown near the future multimodal transit station, establishing three health and wellness districts and two education districts, transforming Palmdale Boulevard into a mixed-use corridor, promoting a diversity of housing types in the City, forming village centers that offer a mix of residential choices and daily goods and services near existing neighborhoods, and building off existing industrial and aerospace business opportunities. The City of Palmdale is the Lead Agency under the California Environmental Quality Act (CEQA).

Since the project covers the entire City, it is located near State Routes 14 and 138. After reviewing the NOP, Caltrans looks forward to reviewing this project's forthcoming Vehicle Miles Traveled (VMT) analysis. As a reminder, Senate Bill 743 (2013) mandates that VMT be used as the primary metric in identifying transportation impacts of all future projects under CEQA, starting July 1, 2020.

For information on determining transportation impacts in terms of VMT on the State Highway System, see the *Technical Advisory on Evaluating Transportation Impacts in CEQA* by the California Governor's Office of Planning and Research (OPR), dated December 2018: [http://opr.ca.gov/docs/20190122-743\\_Technical\\_Advisory.pdf](http://opr.ca.gov/docs/20190122-743_Technical_Advisory.pdf). The City can also refer to Caltrans' updated *Vehicle Miles Traveled-Focused Transportation Impact Study Guide* (TISG), dated May 2020 and released on Caltrans' website in July 2020: <https://dot.ca.gov/-/media/dot-media/programs/transportation-planning/documents/sb-743/2020-05-20-approved-vmt-focused-tisg-a11y.pdf>. Caltrans' new TISG is largely based on the OPR 2018 Technical Advisory.

Note that the updated TISG states, "Additional future guidance will include the basis for requesting

transportation impact analysis that is not based on VMT. This guidance will include a simplified safety analysis approach that reduces risks to all road users and that focuses on multi-modal conflict analysis as well as access management issues.” Since releasing the TISG, Caltrans has released interim safety analysis guidance, dated December 2020 and found here, for the City’s reference: <https://dot.ca.gov/-/media/dot-media/programs/transportation-planning/documents/sb-743/2020-12-22-updated-interim-ldigr-safety-review-guidance-a11y.pdf>. Caltrans encourages lead agencies to complete traffic safety impact analysis in the CEQA review process so that, through partnerships and collaboration, California can reach zero fatalities and serious injuries by 2050.

Caltrans also encourages lead agencies to promote alternative transportation, as the City of Palmdale will do by supporting local transit opportunities in the General Plan Update. This will increase accessibility and decrease Greenhouse Gas Emissions, which supports Caltrans’ mission to provide a safe and reliable transportation network that serves all people and respects the environment. For additional strategies to integrate into the General Plan Update that will promote equity and environmental preservation, please refer to:

- The 2010 *Quantifying Greenhouse Gas Mitigation Measures* report by the California Air Pollution Control Officers Association (CAPCOA), available at <http://www.capcoa.org/wp-content/uploads/2010/11/CAPCOA-Quantification-Report-9-14-Final.pdf>, or
- *Integrating Demand Management into the Transportation Planning Process: A Desk Reference* (Chapter 8) by the Federal Highway Administration (FHWA), available at <https://ops.fhwa.dot.gov/publications/fhwahop12035/index.htm>.

If you have any questions about these comments, please contact Emily Gibson, the project coordinator, at [Emily.Gibson@dot.ca.gov](mailto:Emily.Gibson@dot.ca.gov), and refer to GTS # 07-LA-2021-03634.

Sincerely,

*Emily Gibson*

EMILY GIBSON  
Acting IGR/CEQA Branch Chief

**Re: 2021060494, City of Palmdale 2045 General Plan Update Project, Los Angeles County**

Dear Ms. Taggart:

The Native American Heritage Commission (NAHC) has received the Notice of Preparation (NOP), Draft Environmental Impact Report (DEIR) or Early Consultation for the project referenced above. The California Environmental Quality Act (CEQA) (Pub. Resources Code §21000 et seq.), specifically Public Resources Code §21084.1, states that a project that may cause a substantial adverse change in the significance of a historical resource, is a project that may have a significant effect on the environment. (Pub. Resources Code § 21084.1; Cal. Code Regs., tit.14, §15064.5 (b) (CEQA Guidelines §15064.5 (b))). If there is substantial evidence, in light of the whole record before a lead agency, that a project may have a significant effect on the environment, an Environmental Impact Report (EIR) shall be prepared. (Pub. Resources Code §21080 (d); Cal. Code Regs., tit. 14, § 5064 subd.(a)(1) (CEQA Guidelines §15064 (a)(1))). In order to determine whether a project will cause a substantial adverse change in the significance of a historical resource, a lead agency will need to determine whether there are historical resources within the area of potential effect (APE).

CEQA was amended significantly in 2014. Assembly Bill 52 (Gatto, Chapter 532, Statutes of 2014) (AB 52) amended CEQA to create a separate category of cultural resources, "tribal cultural resources" (Pub. Resources Code §21074) and provides that a project with an effect that may cause a substantial adverse change in the significance of a tribal cultural resource is a project that may have a significant effect on the environment. (Pub. Resources Code §21084.2). Public agencies shall, when feasible, avoid damaging effects to any tribal cultural resource. (Pub. Resources Code §21084.3 (a)). **AB 52 applies to any project for which a notice of preparation, a notice of negative declaration, or a mitigated negative declaration is filed on or after July 1, 2015.** If your project involves the adoption of or amendment to a general plan or a specific plan, or the designation or proposed designation of open space, on or after March 1, 2005, it may also be subject to Senate Bill 18 (Burton, Chapter 905, Statutes of 2004) (SB 18). **Both SB 18 and AB 52 have tribal consultation requirements.** If your project is also subject to the federal National Environmental Policy Act (42 U.S.C. § 4321 et seq.) (NEPA), the tribal consultation requirements of Section 106 of the National Historic Preservation Act of 1966 (154 U.S.C. 300101, 36 C.F.R. §800 et seq.) may also apply.

The NAHC recommends consultation with California Native American tribes that are traditionally and culturally affiliated with the geographic area of your proposed project as early as possible in order to avoid inadvertent discoveries of Native American human remains and best protect tribal cultural resources. Below is a brief summary of portions of AB 52 and SB 18 as well as the NAHC's recommendations for conducting cultural resources assessments.

**Consult your legal counsel about compliance with AB 52 and SB 18 as well as compliance with any other applicable laws.**

## AB 52

AB 52 has added to CEQA the additional requirements listed below, along with many other requirements:

- 1. Fourteen Day Period to Provide Notice of Completion of an Application/Decision to Undertake a Project:** Within fourteen (14) days of determining that an application for a project is complete or of a decision by a public agency to undertake a project, a lead agency shall provide formal notification to a designated contact of, or tribal representative of, traditionally and culturally affiliated California Native American tribes that have requested notice, to be accomplished by at least one written notice that includes:

  - a. A brief description of the project.
  - b. The lead agency contact information.
  - c. Notification that the California Native American tribe has 30 days to request consultation. (Pub. Resources Code §21080.3.1 (d)).
  - d. A "California Native American tribe" is defined as a Native American tribe located in California that is on the contact list maintained by the NAHC for the purposes of Chapter 905 of Statutes of 2004 (SB 18). (Pub. Resources Code §21073).
  
- 2. Begin Consultation Within 30 Days of Receiving a Tribe's Request for Consultation and Before Releasing a Negative Declaration, Mitigated Negative Declaration, or Environmental Impact Report:** A lead agency shall begin the consultation process within 30 days of receiving a request for consultation from a California Native American tribe that is traditionally and culturally affiliated with the geographic area of the proposed project. (Pub. Resources Code §21080.3.1, subs. (d) and (e)) and prior to the release of a negative declaration, mitigated negative declaration or Environmental Impact Report. (Pub. Resources Code §21080.3.1(b)).

  - a. For purposes of AB 52, "consultation shall have the same meaning as provided in Gov. Code §65352.4 (SB 18). (Pub. Resources Code §21080.3.1 (b)).
  
- 3. Mandatory Topics of Consultation If Requested by a Tribe:** The following topics of consultation, if a tribe requests to discuss them, are mandatory topics of consultation:

  - a. Alternatives to the project.
  - b. Recommended mitigation measures.
  - c. Significant effects. (Pub. Resources Code §21080.3.2 (a)).
  
- 4. Discretionary Topics of Consultation:** The following topics are discretionary topics of consultation:

  - a. Type of environmental review necessary.
  - b. Significance of the tribal cultural resources.
  - c. Significance of the project's impacts on tribal cultural resources.
  - d. If necessary, project alternatives or appropriate measures for preservation or mitigation that the tribe may recommend to the lead agency. (Pub. Resources Code §21080.3.2 (a)).
  
- 5. Confidentiality of Information Submitted by a Tribe During the Environmental Review Process:** With some exceptions, any information, including but not limited to, the location, description, and use of tribal cultural resources submitted by a California Native American tribe during the environmental review process shall not be included in the environmental document or otherwise disclosed by the lead agency or any other public agency to the public, consistent with Government Code §6254 (r) and §6254.10. Any information submitted by a California Native American tribe during the consultation or environmental review process shall be published in a confidential appendix to the environmental document unless the tribe that provided the information consents, in writing, to the disclosure of some or all of the information to the public. (Pub. Resources Code §21082.3 (c)(1)).
  
- 6. Discussion of Impacts to Tribal Cultural Resources in the Environmental Document:** If a project may have a significant impact on a tribal cultural resource, the lead agency's environmental document shall discuss both of the following:

  - a. Whether the proposed project has a significant impact on an identified tribal cultural resource.
  - b. Whether feasible alternatives or mitigation measures, including those measures that may be agreed to pursuant to Public Resources Code §21082.3, subdivision (a), avoid or substantially lessen the impact on the identified tribal cultural resource. (Pub. Resources Code §21082.3 (b)).

- 7. Conclusion of Consultation:** Consultation with a tribe shall be considered concluded when either of the following occurs:
- a. The parties agree to measures to mitigate or avoid a significant effect, if a significant effect exists, on a tribal cultural resource; or
  - b. A party, acting in good faith and after reasonable effort, concludes that mutual agreement cannot be reached. (Pub. Resources Code §21080.3.2 (b)).
- 8. Recommending Mitigation Measures Agreed Upon in Consultation in the Environmental Document:** Any mitigation measures agreed upon in the consultation conducted pursuant to Public Resources Code §21080.3.2 shall be recommended for inclusion in the environmental document and in an adopted mitigation monitoring and reporting program, if determined to avoid or lessen the impact pursuant to Public Resources Code §21082.3, subdivision (b), paragraph 2, and shall be fully enforceable. (Pub. Resources Code §21082.3 (a)).
- 9. Required Consideration of Feasible Mitigation:** If mitigation measures recommended by the staff of the lead agency as a result of the consultation process are not included in the environmental document or if there are no agreed upon mitigation measures at the conclusion of consultation, or if consultation does not occur, and if substantial evidence demonstrates that a project will cause a significant effect to a tribal cultural resource, the lead agency shall consider feasible mitigation pursuant to Public Resources Code §21084.3 (b). (Pub. Resources Code §21082.3 (e)).
- 10. Examples of Mitigation Measures That, If Feasible, May Be Considered to Avoid or Minimize Significant Adverse Impacts to Tribal Cultural Resources:**
- a. Avoidance and preservation of the resources in place, including, but not limited to:
    - i. Planning and construction to avoid the resources and protect the cultural and natural context.
    - ii. Planning greenspace, parks, or other open space, to incorporate the resources with culturally appropriate protection and management criteria.
  - b. Treating the resource with culturally appropriate dignity, taking into account the tribal cultural values and meaning of the resource, including, but not limited to, the following:
    - i. Protecting the cultural character and integrity of the resource.
    - ii. Protecting the traditional use of the resource.
    - iii. Protecting the confidentiality of the resource.
  - c. Permanent conservation easements or other interests in real property, with culturally appropriate management criteria for the purposes of preserving or utilizing the resources or places.
  - d. Protecting the resource. (Pub. Resource Code §21084.3 (b)).
  - e. Please note that a federally recognized California Native American tribe or a non-federally recognized California Native American tribe that is on the contact list maintained by the NAHC to protect a California prehistoric, archaeological, cultural, spiritual, or ceremonial place may acquire and hold conservation easements if the conservation easement is voluntarily conveyed. (Civ. Code §815.3 (c)).
  - f. Please note that it is the policy of the state that Native American remains and associated grave artifacts shall be repatriated. (Pub. Resources Code §5097.991).

- 11. Prerequisites for Certifying an Environmental Impact Report or Adopting a Mitigated Negative Declaration or Negative Declaration with a Significant Impact on an Identified Tribal Cultural Resource:** An Environmental Impact Report may not be certified, nor may a mitigated negative declaration or a negative declaration be adopted unless one of the following occurs:
- a. The consultation process between the tribes and the lead agency has occurred as provided in Public Resources Code §21080.3.1 and §21080.3.2 and concluded pursuant to Public Resources Code §21080.3.2.
  - b. The tribe that requested consultation failed to provide comments to the lead agency or otherwise failed to engage in the consultation process.
  - c. The lead agency provided notice of the project to the tribe in compliance with Public Resources Code §21080.3.1 (d) and the tribe failed to request consultation within 30 days. (Pub. Resources Code §21082.3 (d)).

The NAHC's PowerPoint presentation titled, "Tribal Consultation Under AB 52: Requirements and Best Practices" may be found online at: [http://nahc.ca.gov/wp-content/uploads/2015/10/AB52TribalConsultation\\_CalEPAPDF.pdf](http://nahc.ca.gov/wp-content/uploads/2015/10/AB52TribalConsultation_CalEPAPDF.pdf)

## SB 18

SB 18 applies to local governments and requires local governments to contact, provide notice to, refer plans to, and consult with tribes prior to the adoption or amendment of a general plan or a specific plan, or the designation of open space. (Gov. Code §65352.3). Local governments should consult the Governor's Office of Planning and Research's "Tribal Consultation Guidelines," which can be found online at: [https://www.opr.ca.gov/docs/09\\_14\\_05\\_Updated\\_Guidelines\\_922.pdf](https://www.opr.ca.gov/docs/09_14_05_Updated_Guidelines_922.pdf).

Some of SB 18's provisions include:

1. **Tribal Consultation:** If a local government considers a proposal to adopt or amend a general plan or a specific plan, or to designate open space it is required to contact the appropriate tribes identified by the NAHC by requesting a "Tribal Consultation List." If a tribe, once contacted, requests consultation the local government must consult with the tribe on the plan proposal. **A tribe has 90 days from the date of receipt of notification to request consultation unless a shorter timeframe has been agreed to by the tribe.** (Gov. Code §65352.3 (a)(2)).
2. **No Statutory Time Limit on SB 18 Tribal Consultation.** There is no statutory time limit on SB 18 tribal consultation.
3. **Confidentiality:** Consistent with the guidelines developed and adopted by the Office of Planning and Research pursuant to Gov. Code §65040.2, the city or county shall protect the confidentiality of the information concerning the specific identity, location, character, and use of places, features and objects described in Public Resources Code §5097.9 and §5097.993 that are within the city's or county's jurisdiction. (Gov. Code §65352.3 (b)).
4. **Conclusion of SB 18 Tribal Consultation:** Consultation should be concluded at the point in which:
  - a. The parties to the consultation come to a mutual agreement concerning the appropriate measures for preservation or mitigation; or
  - b. Either the local government or the tribe, acting in good faith and after reasonable effort, concludes that mutual agreement cannot be reached concerning the appropriate measures of preservation or mitigation. (Tribal Consultation Guidelines, Governor's Office of Planning and Research (2005) at p. 18).

Agencies should be aware that neither AB 52 nor SB 18 precludes agencies from initiating tribal consultation with tribes that are traditionally and culturally affiliated with their jurisdictions before the timeframes provided in AB 52 and SB 18. For that reason, we urge you to continue to request Native American Tribal Contact Lists and "Sacred Lands File" searches from the NAHC. The request forms can be found online at: <http://nahc.ca.gov/resources/forms/>.

### NAHC Recommendations for Cultural Resources Assessments

To adequately assess the existence and significance of tribal cultural resources and plan for avoidance, preservation in place, or barring both, mitigation of project-related impacts to tribal cultural resources, the NAHC recommends the following actions:

1. Contact the appropriate regional California Historical Research Information System (CHRIS) Center ([http://ohp.parks.ca.gov/?page\\_id=1068](http://ohp.parks.ca.gov/?page_id=1068)) for an archaeological records search. The records search will determine:
  - a. If part or all of the APE has been previously surveyed for cultural resources.
  - b. If any known cultural resources have already been recorded on or adjacent to the APE.
  - c. If the probability is low, moderate, or high that cultural resources are located in the APE.
  - d. If a survey is required to determine whether previously unrecorded cultural resources are present.
2. If an archaeological inventory survey is required, the final stage is the preparation of a professional report detailing the findings and recommendations of the records search and field survey.
  - a. The final report containing site forms, site significance, and mitigation measures should be submitted immediately to the planning department. All information regarding site locations, Native American human remains, and associated funerary objects should be in a separate confidential addendum and not be made available for public disclosure.
  - b. The final written report should be submitted within 3 months after work has been completed to the appropriate regional CHRIS center.

3. Contact the NAHC for:
  - a. A Sacred Lands File search. Remember that tribes do not always record their sacred sites in the Sacred Lands File, nor are they required to do so. A Sacred Lands File search is not a substitute for consultation with tribes that are traditionally and culturally affiliated with the geographic area of the project's APE.
  - b. A Native American Tribal Consultation List of appropriate tribes for consultation concerning the project site and to assist in planning for avoidance, preservation in place, or, failing both, mitigation measures.
  
4. Remember that the lack of surface evidence of archaeological resources (including tribal cultural resources) does not preclude their subsurface existence.
  - a. Lead agencies should include in their mitigation and monitoring reporting program plan provisions for the identification and evaluation of inadvertently discovered archaeological resources per Cal. Code Regs., tit. 14, §15064.5(f) (CEQA Guidelines §15064.5(f)). In areas of identified archaeological sensitivity, a certified archaeologist and a culturally affiliated Native American with knowledge of cultural resources should monitor all ground-disturbing activities.
  - b. Lead agencies should include in their mitigation and monitoring reporting program plans provisions for the disposition of recovered cultural items that are not burial associated in consultation with culturally affiliated Native Americans.
  - c. Lead agencies should include in their mitigation and monitoring reporting program plans provisions for the treatment and disposition of inadvertently discovered Native American human remains. Health and Safety Code §7050.5, Public Resources Code §5097.98, and Cal. Code Regs., tit. 14, §15064.5, subdivisions (d) and (e) (CEQA Guidelines §15064.5, subs. (d) and (e)) address the processes to be followed in the event of an inadvertent discovery of any Native American human remains and associated grave goods in a location other than a dedicated cemetery.

If you have any questions or need additional information, please contact me at my email address:  
[Andrew.Green@nahc.ca.gov](mailto:Andrew.Green@nahc.ca.gov).

Sincerely,

Andrew Green  
Cultural Resources Analyst

Ref. DOC 6232747

Ms. Megan Taggart, Planning Manager  
City of Palmdale  
Department of Economic and Community Development  
38250 Sierra Highway  
Palmdale, CA 93550

Dear Ms. Taggart:

**NOP Response for City of Palmdale 2045 General Plan Update**

The Los Angeles County Sanitation Districts (Districts) received a Notice of Preparation of a Draft Environmental Impact Report (NOP) for the subject project on June 25, 2021. The City of Palmdale (City) is located within the jurisdictional boundaries of District Nos. 14 and 20. We offer the following comments regarding sewerage service:

1. The Districts own, operate, and maintain the large trunk sewers that form the backbone of the regional wastewater conveyance system. Local collector and/or lateral sewer lines are the responsibility of the jurisdiction in which they are located. As such, the Districts cannot comment on any deficiencies in the sewerage system in the City except to state that presently no deficiencies exist in Districts' facilities that serve the City. For information on deficiencies in the City sewerage system, please contact the City Department of Public Works and/or the Los Angeles County Department of Public Works.
2. The Districts should review individual developments within the City to determine whether or not sufficient trunk sewer capacity exists to serve each project and if Districts' facilities will be affected by the project.
3. The wastewater generated by the City is treated at the Palmdale Water Reclamation Plant, which has a capacity of 12 million gallons per day (mgd) and currently processes an average flow of 9.3 mgd, or the Lancaster Water Reclamation Plant, which has a capacity of 18 mgd and currently processes an average flow of 14.3 mgd.
4. In order to estimate the volume of wastewater the project will generate, go to [www.lacsd.org](http://www.lacsd.org), under Services, then Wastewater Program and Permits, select Will Serve Program, and scroll down to click on the [Table 1, Loadings for Each Class of Land Use](#) link for a copy of the Districts' average wastewater generation factors.
5. The Districts are empowered by the California Health and Safety Code to charge a fee to connect facilities (directly or indirectly) to the Districts' Sewerage System or to increase the strength or quantity of wastewater discharged from connected facilities. This connection fee is a capital facilities fee that is used by the Districts to upgrade or expand the Sewerage System. Payment of a connection fee may be required before this project is permitted to discharge to the Districts' Sewerage System. For more information and a copy of the Connection Fee Information Sheet, go to [www.lacsd.org](http://www.lacsd.org), under Services, then Wastewater (Sewage) and select Rates & Fees. In determining the impact to the Sewerage System and applicable connection fees, the Districts will determine the user category (e.g. Condominium, Single Family home, etc.) that best represents the actual or anticipated use of the parcel(s) or facilities on the parcel(s) in the development. For more

specific information regarding the connection fee application procedure and fees, the developer should contact the Districts' Wastewater Fee Public Counter at (562) 908-4288, extension 2727.

6. In order for the Districts to conform to the requirements of the Federal Clean Air Act (CAA), the capacities of the Districts' wastewater treatment facilities are based on the regional growth forecast adopted by the Southern California Association of Governments (SCAG). Specific policies included in the development of the SCAG regional growth forecast are incorporated into clean air plans, which are prepared by the South Coast and Antelope Valley Air Quality Management Districts in order to improve air quality in the South Coast and Mojave Desert Air Basins as mandated by the CCA. All expansions of Districts' facilities must be sized and service phased in a manner that will be consistent with the SCAG regional growth forecast for the counties of Los Angeles, Orange, San Bernardino, Riverside, Ventura, and Imperial. The available capacity of the Districts' treatment facilities will, therefore, be limited to levels associated with the approved growth identified by SCAG. As such, this letter does not constitute a guarantee of wastewater service, but is to advise the developer that the Districts intend to provide this service up to the levels that are legally permitted and to inform the developer of the currently existing capacity and any proposed expansion of the Districts' facilities.

If you have any questions, please contact the undersigned at (562) 908-4288, extension 2743 or at [mandyng@lacs.org](mailto:mandyng@lacs.org).

Very truly yours,

*Mandy Ng*

Dear Ms. Taggart:

**NOTICE OF PREPARATION OF A DRAFT ENVIRONMENTAL IMPACT REPORT, "PALMDALE 2045 GENERAL PLAN UPDATE," WILL HELP THE CITY PLAN FOR IMPORTANT COMMUNITY ISSUES SUCH AS NEW GROWTH, HOUSING AND INFRASTRUCTURE NEEDS, AND ENVIRONMENTAL PROTECTION, IT ALSO SETS THE STAGE FOR FUTURE SOCIAL, PHYSICAL, AND ECONOMIC DEVELOPMENT OF THE CITY, PALMDALE, FFER 2021006978**

The Notice of Preparation of a Draft Environmental Impact Report has been reviewed by the Planning Division, Land Development Unit, Forestry Division, and Health Hazardous Materials Division of the County of Los Angeles Fire Department.

The following are their comments:

**PLANNING DIVISION:**

We have no comments.

For any questions regarding this response, please contact Kien Chin, Planning Analyst, at (323) 881-2404 or [Kien.Chin@fire.lacounty.gov](mailto:Kien.Chin@fire.lacounty.gov).

**LAND DEVELOPMENT UNIT:**

1. Each development must comply with all applicable code and ordinance requirements for construction, access, water mains, fire flows, and fire hydrants.

2. Every building constructed shall be accessible to Fire Department apparatus by way of access roadways, with an all-weather surface of not less than 20 feet in width. The roadway width shall be increased based on the type development proposed by the applicant. The roadway shall be extended to within 150 feet of all portions of the exterior walls when measured by an unobstructed route around the exterior of the building. The roadway shall provide approved signs and/or stripping stating, "NO PARKING - FIRE LANE" and shall be maintained in accordance with the County of Los Angeles Fire Code.
3. Every building constructed shall provide an adequate water supply for fire protection purposes. The fire hydrant spacing shall be in compliance with Appendix C in the County of Los Angeles Fire Code (Title 32). The fire flow requirements should be addressed in Appendix B of the County of Los Angeles Fire Code (Title 32).
4. A property which is located within an area described by the Fire Department as a Fire Hazard Severity Zone, a "Fuel Modification Plan" shall be submitted for review by the Fuel Modification Unit prior to building plan approval. Please contact the Department's Fuel Modification Unit for details. The Fuel Modification Plan Review Unit is located at 605 North Angeleno Avenue in the City of Azusa CA 91702-2904. They may be reached at (626) 969-5205 or visit <https://www.fire.lacounty.gov/forestry-division/forestry-fuel-modification>
5. When involved with subdivision in a city contracting fire protection with the County of Los Angeles Fire Department, Fire Department requirements for access, fire flows, and hydrants are addressed during the subdivision tentative map stage by the Land Development Unit.
6. Specific fire and life safety requirements for the construction phase will be addressed at the Fire Department building plan check review. There may be additional fire and life safety requirements during this time.

The Land Development Unit appreciates the opportunity to comment on this project. Should any questions arise regarding the Land Development Unit response, please contact Wally Collins at (323) 890-4243 or [Wally.Collins@fire.lacounty.gov](mailto:Wally.Collins@fire.lacounty.gov).

#### **FORESTRY DIVISION – OTHER ENVIRONMENTAL CONCERNS:**

The statutory responsibilities of the County of Los Angeles Fire Department's Forestry Division include erosion control, watershed management, rare and endangered species, vegetation, fuel modification for Very High Fire Hazard Severity Zones, archeological and cultural resources, and the County Oak Tree Ordinance. Potential impacts in these areas should be addressed.

Under the Los Angeles County Oak tree Ordinance, a permit is required to cut, destroy, remove, relocate, inflict damage or encroach into the protected zone of any tree of the Oak genus which is 25 inches or more in circumference (eight inches in diameter), as measured 4 1/2 feet above mean natural grade.

Megan Taggart, Planning Manager

July 20, 2021

Page 3

If Oak trees are known to exist in the proposed project area further field studies should be conducted to determine the presence of this species on the project site.

The County of Los Angeles Fire Department's Forestry Division has no further comments regarding this project.

For any questions regarding this response, please contact Forestry Assistant, Nicholas Alegria at (818) 890-5719.

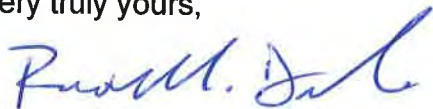

**HEALTH HAZARDOUS MATERIALS DIVISION:**

The Health Hazardous Materials Division of the Los Angeles County Fire Department has no comments or requirements for the project at this time.

Please contact HHMD senior typist-clerk, Perla Garcia at (323) 890-4035 or [Perla.garcia@fire.lacounty.gov](mailto:Perla.garcia@fire.lacounty.gov) if you have any questions.

If you have any additional questions, please contact this office at (323) 890-4330

Very truly yours,

**Subject: Notice of Preparation of a Draft Environmental Impact Report for City of Palmdale General Plan Update (Palmdale 2045) Project, SCH #2021060494, City of Palmdale, Los Angeles County**

Dear Ms. Taggart:

The California Department of Fish and Wildlife (CDFW) has reviewed the Notice of Preparation (NOP) of a Draft Environmental Impact Report (DEIR) from the City of Palmdale (City; Lead Agency) for the Palmdale General Plan Update (Project). Thank you for the opportunity to provide comments and recommendations regarding those activities involved in the Project that may affect California fish and wildlife. Likewise, we appreciate the opportunity to provide comments regarding those aspects of the Project that CDFW, by law, may be required to carry out or approve through the exercise of its own regulatory authority under the Fish and Game Code.

**CDFW's Role**

CDFW is California's Trustee Agency for fish and wildlife resources and holds those resources in trust by statute for all the people of the State [Fish & G. Code, §§ 711.7, subdivision (a) & 1802; Pub. Resources Code, § 21070; California Environmental Quality Act (CEQA) Guidelines, § 15386, subdivision (a)]. CDFW, in its trustee capacity, has jurisdiction over the conservation, protection, and management of fish, wildlife, native plants, and habitat necessary for biologically sustainable populations of those species (Id., § 1802). Similarly, for purposes of CEQA, CDFW is charged by law to provide, as available, biological expertise during public agency environmental review efforts, focusing specifically on projects and related activities that have the potential to adversely affect State fish and wildlife resources.

CDFW is also submitting comments as a Responsible Agency under CEQA (Pub. Resources Code, § 21069; CEQA Guidelines, § 15381). CDFW expects that it may need to exercise regulatory authority as provided by the Fish and Game Code, including lake and streambed alteration regulatory authority (Fish & G. Code, § 1600 *et seq.*). Likewise, to the extent implementation of the Project as proposed may result in "take", as defined by State law, of any species protected under the California Endangered Species Act (CESA) (Fish & G. Code, § 2050 *et seq.*), or CESA-listed rare plant pursuant to the Native Plant Protection Act (NPPA; Fish & G. Code, §1900 *et seq.*), CDFW recommends the Project proponent obtain appropriate authorization under the Fish and Game Code.

*Conserving California's Wildlife Since 1870*

Megan Taggart  
City of Palmdale  
July 21, 2021  
Page 2 of 14

## Project Description and Summary

**Objective:** The proposed Project is a comprehensive update to the City's General Plan, which is the guiding document for the future of Palmdale over 25 years (2020-2045). The General Plan will focus on enhancing community identity, building on planned infrastructure investments, and improving multi-modal active transportation and connectivity. The Project identifies major strategies and physical improvements for the City over the next 25 years. These strategies include creating a downtown near the future multimodal transit station, establishing three health and wellness districts and two education districts, and transforming Palmdale Boulevard into a mixed-use corridor. The Project also aims to promote a diversity of housing types in the City, form village centers that offer a mix of residential choices and daily goods and services near existing neighborhoods, and building off existing industrial and aerospace business opportunities. The following actions will also be taken by the City in connection with the General Plan Update and are also considered part of the proposed Project to be analyzed in the forthcoming DEIR: Adoption and implementation of the General Plan Update; Adoption and implementation of the Climate Action Plan; and Housing Element Update.

**Location:** The Project would apply to the entire geographic area located within the boundaries of the City of Palmdale. The City is located in the southern region of the Antelope Valley, approximately 60 miles northeast of downtown Los Angeles along State Highway 14.

## Comments and Recommendations

CDFW offers the comments and recommendations below to assist the City in adequately identifying, avoiding, and/or mitigating the Project's significant, or potentially significant, direct, and indirect impacts on fish and wildlife (biological) resources.

### Specific Comments

- 1) Joshua tree. Joshua trees (*Yucca brevifolia*) are known to occur on vacant land within the City. Joshua tree is a CESA-listed candidate species. As a CESA-listed candidate species, western Joshua tree is granted full protection of a threatened species under CESA. Activities related to housing or infrastructure development may directly remove habitats or indirectly cause added pressures to the habitats in which these species reside, leading to further species decline. Any project activities that involve grading or vegetation removal would likely result in "take" or adverse impacts to western Joshua tree, its seed bank, and its sole pollinator, the Joshua tree yucca moth (*Tegeticula synthetica*).

Fish and Game Commission approved a Special Order (2084) on December 10, 2020, which delegated authority to the City of Palmdale for the issuance of some permits pertaining to new and existing single-family residences on behalf of CDFW. Special Order 749.11 authorizes the take of western Joshua trees during the candidacy period when a dead western Joshua tree needs to be removed or a western Joshua tree needs to be trimmed (CDFW 2021a). Special Order 749.12 authorizes the take of western Joshua trees by the City of Palmdale for certain projects pertaining to accessory structures in developed parcels within an existing single-family residence (CDFW 2021a). For this Project, take of western Joshua trees is not authorized by Special Order 749.11 or 749.12. Therefore, CDFW concurs, that the City require the Project Applicant to consult with CDFW for authorization to take western Joshua trees pursuant to Fish and Game Code section

Megan Taggert  
 City of Palmdale  
 July 21, 2021  
 Page 3 of 14

2080.1.

CDFW primarily recommends the City avoid impacts to western Joshua tree to the greatest extent feasible. If “take” or adverse impacts to western Joshua trees cannot be avoided during any project activities or over the life of the Project, the City should apply for a CESA Incidental Take Permit (ITP), pursuant to Fish and Game Code section 2080 *et seq.* Early consultation is encouraged, as significant modification to a Project and mitigation measures may be required to obtain a CESA Permit. The City should consult with CDFW to obtain additional Joshua tree survey requirements. CDFW may require separate CEQA documentation for the issuance of an ITP unless the Project CEQA document addresses all Project impacts to CESA-listed species and specifies a mitigation monitoring and reporting program that will meet the requirements of an ITP. For these reasons, biological mitigation monitoring and reporting proposals should be of sufficient detail and resolution to satisfy the requirements for a CESA ITP.

- 2) Additional CESA- and Endangered Species Act (ESA)-Covered Species. The City and its surrounding vicinity may support additional CESA- and ESA-listed species. Activities related to housing or infrastructure development may directly remove habitats or indirectly cause added pressures to the habitats in which these species reside, leading to further species decline. CDFW recommends the DEIR discuss the Project’s potential impacts on the following species and associated habitat: tricolored blackbird (*Agelaius tricolor*), Swainson’s hawk (*Buteo swainsoni*), and Mohave ground squirrel (*Xerspermophilus mohavensis*), which are CESA-listed; and least Bell’s vireo (*Vireo bellii pusillus*), which is ESA- and CESA-listed.

CDFW considers adverse impacts to a species protected by CESA to be significant without mitigation under CEQA. As to CESA, take of any endangered, threatened, candidate species, or CESA-listed plant species that results from the Project is prohibited, except as authorized by State law (Fish & G. Code §§ 2080, 2085; Cal. Code Regs., tit. 14, §786.9). Consequently, if the Project or any Project-related activity during the life of the Project will result in take of a species designated as endangered or threatened, or a candidate for listing under CESA, CDFW recommends that the Project proponent seek appropriate take authorization under CESA prior to implementing the Project. Appropriate authorization from CDFW may include an ITP or a consistency determination in certain circumstances Please refer to Specific Comment #1 regarding consultation with CDFW on ITPs.

- 3) Additional Special Status Species. The City and its surrounding vicinity may also support additional special status species, namely, those considered Species of Special Concern by CDFW. Activities related to housing or infrastructure development may directly remove habitats or indirectly cause added pressures to the habitats in which these species reside, leading to further species decline. CDFW recommends the DEIR discuss the Project’s potential impacts on the following species and associated habitat: northern California legless lizard (*Anniella pulchra*), California glossy snake (*Arizona elegans occidentalis*), burrowing owl (*Athene cunicularia*), mountain plover (*Charadrius montanus*), western pond turtle (*Emys marmorata*), loggerhead shrike (*Lanius ludovicianus*), coast horned lizard (*Phrynosoma blainvillii*), two-striped garter snake (*Thamnophis hammondi*), and Le Conte’s thrasher (*Toxostoma lecontei*).

- 4) Crotch’s Bumble Bee. The City and its surrounding vicinity may also support additional

Megan Taggert  
 City of Palmdale  
 July 21, 2021  
 Page 4 of 14

special status species, namely, Crotch's bumble bee (*Bombus crotchii*). Project activities related to housing or infrastructure development will involve ground disturbing activities in occupied habitat may result in loss of foraging habitat, crushing or filling of active bee colonies, causing the death or injury of adults, eggs, and larvae.

Crotch's bumble bee has a State ranking of S1/S2. This means that the Crotch's bumble bee is considered critically imperiled or imperiled and is extremely rare (often 5 or fewer populations). Also, Crotch's bumble bee has a very restricted range and steep population declines make the species vulnerable to extirpation from the State (CDFW 2017). Accordingly, Crotch's bumble bee meets the CEQA definition of rare, threatened, or endangered species (CEQA Guidelines, § 15380). Therefore, take of Crotch's bumble bee could require a mandatory finding of significance by the City (CEQA Guidelines, § 15065). The Project's associated housing and infrastructure development activities have the potential to substantially reduce or adversely modify habitat, impair the viability of populations, and reduce the number and range of the Crotch's bumble bee. CDFW recommends the DEIR discuss the Project's potential impacts on the Crotch's bumble bee and associated habitat.

- 5) Biologically Significant Sites Inventory. CDFW recommends the City identify and prepare a map of the following areas if present within or adjacent to the City boundary. In addition, the City should consider the Project's potential impacts on the following areas if present within or adjacent to the Project boundary:
- a) Conservation easements or mitigation lands;
  - b) U.S. Fish and Wildlife Service [Threatened & Endangered Species Active Critical Habitat](#) (USFWS 2020);
  - c) County of Los Angeles Significant Ecological Areas (SEAs);
  - d) Wildlife corridors;
  - e) Sensitive Natural Communities [see General Comment #3 (Biological Baseline Assessment)];
  - f) Aquatic and riparian resources including (but not limited to) rivers, channels, streams, wetlands, and vernal pools, and associated natural plant communities; and
  - g) City parks and open space, particularly areas with undeveloped land.

CDFW recommends the City avoid sites that may have a direct or indirect impact on conservation easements or lands set aside as mitigation. CDFW recommends the DEIR include measures where future housing development or infrastructure facilitated by the Project mitigate (avoid if feasible) for impacts on biological resources occurring within SEAs and critical habitat, as well as mitigate for impacts on wildlife corridors, sensitive natural communities, aquatic and riparian resources, and urban forests.

- 6) Development and Conservation. To accommodate increased housing and infrastructure needs, the City is expected to build more units in the coming years. CDFW recommends the City maximize development where it already exists in order to protect natural lands from development and habitat loss. CDFW recommends the City consider regional and State-wide natural resource conservation strategies outlined in the following reports: [Safeguarding California Plan: 2018 Update](#) (CNRA 2018); [California State Wildlife Action Plan: A Conservation Legacy for Californians](#) (CDFW 2015); and, [California 2030 Natural and Working Lands Climate Change Implementation Plan: January 2019 Draft](#) (CalEPA et al.

Megan Taggert  
City of Palmdale  
July 21, 2021  
Page 5 of 14

2019).

- 7) Jurisdictional Waters. According to the US Fish and Wildlife Service (USFWS) [National Wetlands Inventory](#), there are multiple segments of streams running throughout the City (USFWS 2021). As a Responsible Agency under CEQA, CDFW has authority over activities in streams and/or lakes that will divert or obstruct the natural flow, or change the bed, channel, or bank (including vegetation associated with the stream or lake) of a river or stream, or use material from a streambed. For any such activities, the project applicant (or "entity") must provide written notification to CDFW pursuant to Fish and Game Code Section 1600 *et seq.*
- a) CDFW's issuance of a Lake and Streambed Alteration (LSA) Agreement for a project that is subject to CEQA will require CEQA compliance actions by CDFW as a Responsible Agency. As a Responsible Agency, CDFW may consider the environmental document of the local jurisdiction (Lead Agency) for the project. To minimize additional requirements by CDFW pursuant to section 1600 *et seq.* and/or under CEQA, the environmental document should fully identify the potential impacts to the stream or riparian resources and provide adequate avoidance, mitigation, monitoring and reporting commitments for issuance of the LSA Agreement. Please visit CDFW's [Lake and Streambed Alteration Program](#) webpage for information about LSA Notification (CDFW 2021f).
  - b) In the event the project area may support aquatic, riparian, and wetland habitats; a preliminary delineation of the streams and their associated riparian habitats should be included in the environmental document. The delineation should be conducted pursuant to the U.S. Fish and Wildlife Service (USFWS) wetland definition adopted by CDFW (Cowardin et al. 1970). Be advised that some wetland and riparian habitats subject to CDFW's authority may extend beyond the jurisdictional limits of the U.S. Army Corps of Engineers' Section 404 permit and Regional Water Quality Control Board Section 401 Certification.
  - c) In project areas which may support ephemeral or episodic streams, herbaceous vegetation, woody vegetation, and woodlands also serve to protect the integrity of these resources and help maintain natural sedimentation processes; therefore, CDFW recommends effective setbacks be established to maintain appropriately sized vegetated buffer areas adjoining ephemeral drainages.
  - d) Project-related changes in upstream and downstream drainage patterns, runoff, and sedimentation should be included and evaluated in the environmental document.
  - e) As part of the LSA Notification process, CDFW requests a hydrological evaluation of the 100, 50, 25, 10, 5, and 2-year frequency storm event for existing and proposed conditions. CDFW recommends the environmental document evaluate the results and address avoidance, minimization, and/or mitigation measures that may be necessary to reduce potential significant impacts.
- 8) Wetland Resources. According to the US Fish and Wildlife Service (USFWS) [National Wetlands Inventory](#), there are a number of wetland sites throughout the City (USFWS 2021). CDFW, as described in Fish and Game Code section 703(a), is guided by the Fish and

Megan Taggart  
City of Palmdale  
July 21, 2021  
Page 6 of 14

Game Commission's (Commission) policies. The [Wetlands Resources](#) policy the Commission "...seek[s] to provide for the protection, preservation, restoration, enhancement and expansion of wetland habitat in California. Further, it is the policy of the Fish and Game Commission to strongly discourage development in or conversion of wetlands. It opposes, consistent with its legal authority, any development or conversion that would result in a reduction of wetland acreage or wetland habitat values. To that end, the Commission opposes wetland development proposals unless, at a minimum, project mitigation assures there will be 'no net loss' of either wetland habitat values or acreage. The Commission strongly prefers mitigation which would achieve expansion of wetland acreage and enhancement of wetland habitat values" (CFGF 2005).

- a) The Wetlands Resources policy provides a framework for maintaining wetland resources and establishes mitigation guidance. CDFW encourages avoidance of wetland resources as a primary mitigation measure and discourages the development or type conversion of wetlands to uplands. These wetlands include, but are not limited to, those along Anaverde Creek, Amargosa Creek, Lake Palmdale, Little Rock Wash, Rogers Creek, and Pine Creek. CDFW encourages activities that would avoid the reduction of wetland acreage, function, or habitat values. Once avoidance and minimization measures have been exhausted, a project must include mitigation measures to assure a "no net loss" of either wetland habitat values, or acreage, for unavoidable impacts to wetland resources. Conversions include, but are not limited to, conversion to subsurface drains, placement of fill or building of structures within the wetland, and channelization or removal of materials from the streambed. All wetlands and watercourses, whether ephemeral, intermittent, or perennial, should be retained and provided with substantial setbacks, which preserve the riparian and aquatic values and functions for the benefit to on-site and off-site wildlife populations. CDFW recommends mitigation measures to compensate for unavoidable impacts be included in an environmental document and these measures should compensate for the loss of function and value.
  - b) The Fish and Game Commission's [Water policy](#) guides CDFW on the quantity and quality of the waters of this State that should be apportioned and maintained respectively so as to produce and sustain maximum numbers of fish and wildlife; to provide maximum protection and enhancement of fish and wildlife and their habitat; encourage and support programs to maintain or restore a high quality of the waters of this State; prevent the degradation thereof caused by pollution and contamination; and, endeavor to keep as much water as possible open and accessible to the public for the use and enjoyment of fish and wildlife (CFGF 1994). CDFW recommends avoidance of water practices and structures that use excessive amounts of water, and minimization of impacts that negatively affect water quality, to the extent feasible (Fish & G. Code, § 5650).
- 9) [Nesting Birds](#). The City supports habitats, such as Joshua tree woodland, that numerous bird species depend on. CDFW recommends the DEIR include measures where future housing and infrastructure development facilitated by the Project avoids potential impacts to nesting birds. Project activities occurring during the bird and raptor breeding and nesting season could result in the incidental loss of fertile eggs or nestlings, or otherwise lead to nest abandonment.
- a) Migratory nongame native bird species are protected by international treaty under the

Megan Taggart  
City of Palmdale  
July 21, 2021  
Page 7 of 14

Federal Migratory Bird Treaty Act (MBTA) of 1918 (Code of Federal Regulations, Title 50, § 10.13). Sections 3503, 3503.5, and 3513 of the California Fish and Game Code prohibit take of all birds and their active nests including raptors and other migratory nongame birds (as listed under the Federal MBTA). It is unlawful to take, possess, or needlessly destroy the nest or eggs of any raptor.

- b) CDFW recommends that measures be taken to fully avoid impacts to nesting birds and raptors. Ground-disturbing activities (e.g., mobilizing, staging, drilling, and excavating) and vegetation removal should occur outside of the avian breeding season which generally runs from February 15 through September 15 (as early as January 1 for some raptors) to avoid take of birds, raptors, or their eggs.
  - c) If impacts to nesting birds and raptors cannot be avoided, CDFW recommends the DEIR include measures where future housing development facilitated by the Project mitigates for impacts. CDFW recommends surveys by a qualified biologist with experience conducting breeding bird and raptor surveys. Surveys are needed to detect protected native birds and raptors occurring in suitable nesting habitat that may be disturbed and any other such habitat within 300 feet of the project disturbance area, to the extent allowable and accessible. For raptors, this radius should be expanded to 500 feet and 0.5 mile for special status species, if feasible. Project personnel, including all contractors working on site, should be instructed on the sensitivity of the area. Reductions in the nest buffer distance may be appropriate depending on the avian species involved, ambient levels of human activity, screening vegetation, or possibly other factors.
- 10) Loss of Bird and Raptor Nesting and Foraging Habitat. Joshua tree woodland habitat in the City supports nesting birds, including sensitive and special status species. Development occurring adjacent to the wildlife urban interface and habitats such as Joshua tree woodland could impact nesting and breeding habitat for birds and raptors. Direct impacts such as habitat loss and indirect impacts such as increased edge effects could eliminate habitat or reduce habitat quality.
- a) CDFW recommends the DEIR analyze and discuss the Project's impacts on bird and raptor nesting and breeding habitat. Edge effects should also be analyzed and discussed. CDFW recommends the DEIR disclose the amount of bird and raptor nesting and breeding habitat that would be impacted and lost as a result of the proposed Project.
  - b) CDFW recommends the Project avoid developing and encroaching onto nesting and breeding habitat for birds and raptors. If avoidance is not feasible, CDFW recommends the DEIR provide measures to mitigate for impacts on bird and raptor nesting and breeding habitat. Depending on the status of the bird or raptor species impacted, replacement habitat acres should increase with the occurrence of a Species of Special Concern. Replacement habitat acres should further increase with the occurrence of a CESA-listed threatened or endangered species.
  - c) CDFW recommends the DEIR provide measures where future development facilitated by the Project avoids removal of any native trees, large and dense-canopied native and non-native trees, and trees occurring in high density. CDFW also recommends avoiding impacts to understory vegetation (e.g., ground cover, subshrubs, and shrubs). If trees are removed, CDFW recommends future development facilitated by the Project provides

Megan Taggart  
City of Palmdale  
July 21, 2021  
Page 8 of 14

replacement to compensate for temporal or permanent loss habitat within a project site. CDFW recommends planting native tree and shrub species preferred by birds and are native to the area.

## General Comments

- 1) Disclosure. An environmental document should provide an adequate, complete, and detailed disclosure about the effect which a proposed project is likely to have on the environment (Pub. Resources Code, § 20161; CEQA Guidelines, §15151). Adequate disclosure is necessary so CDFW may provide comments on the adequacy of proposed avoidance, minimization, or mitigation measures, as well as to assess the significance of the specific impact relative to the species (e.g., current range, distribution, population trends, and connectivity).
- 2) Mitigation Measures. Public agencies have a duty under CEQA to prevent significant, avoidable damage to the environment by requiring changes in projects through the use of feasible alternatives or mitigation measures [CEQA Guidelines, §§ 15002(a)(3), 15021]. Pursuant to CEQA Guidelines section 15126.4, an environmental document shall describe feasible measures which could mitigate for impacts below a significant level under CEQA.
  - a) Level of Detail. Mitigation measures must be feasible, effective, implemented, and fully enforceable/imposed by the lead agency through permit conditions, agreements, or other legally binding instruments (Pub. Resources Code, § 21081.6(b); CEQA Guidelines, §§ 15126.4, 15041). A public agency shall provide the measures that are fully enforceable through permit conditions, agreements, or other measures (Pub. Resources Code, § 21081.6). CDFW recommends that the City prepare mitigation measures that are specific, detailed (i.e., responsible party, timing, specific actions, location), and clear in order for a measure to be fully enforceable and implemented successfully via a mitigation monitoring and/or reporting program (CEQA Guidelines, § 15097; Pub. Resources Code, § 21081.6). Adequate disclosure is necessary so CDFW may provide comments on the adequacy and feasibility of proposed mitigation measures.
  - b) Disclosure of Impacts. If a proposed mitigation measure would cause one or more significant effects, in addition to impacts caused by the Project as proposed, the environmental document should include a discussion of the effects of proposed mitigation measures [CEQA Guidelines, § 15126.4(a)(1)]. In that regard, the environmental document should provide an adequate, complete, and detailed disclosure about a project's proposed mitigation measure(s). Adequate disclosure is necessary so CDFW may assess the potential impacts of proposed mitigation measures.
- 3) Biological Baseline Assessment. An adequate biological resources assessment should provide a complete assessment and impact analysis of the flora and fauna within and adjacent to a project site and where a project may result in ground disturbance. The assessment and analysis should place emphasis upon identifying endangered, threatened, sensitive, regionally, and locally unique species, and sensitive habitats. Impact analysis will aid in determining any direct, indirect, and cumulative biological impacts, as well as specific mitigation or avoidance measures necessary to offset those impacts. CDFW recommends avoiding any sensitive natural communities found on or adjacent to a project. CDFW also

Megan Taggart  
City of Palmdale  
July 21, 2021  
Page 9 of 14

considers impacts to Species of Special Concern a significant direct and cumulative adverse effect without implementing appropriate avoid and/or mitigation measures. A project-level environmental document should include the following information:

- a) Information on the regional setting that is critical to an assessment of environmental impacts, with special emphasis on resources that are rare or unique to the region [CEQA Guidelines, § 15125(c)]. An environmental document should include measures to fully avoid and otherwise protect Sensitive Natural Communities from project-related impacts. CDFW considers these communities as threatened habitats having both regional and local significance. Plant communities, alliances, and associations with a state-wide ranking of S1, S2, S3 and S4 should be considered sensitive and declining at the local and regional level. These ranks can be obtained by visiting [Vegetation Classification and Mapping Program - Natural Communities](#) webpage (CDFW 2021b);
- b) A thorough, recent, floristic-based assessment of special status plants and natural communities following CDFW's [Protocols for Surveying and Evaluating Impacts to Special Status Native Plant Populations and Sensitive Natural Communities](#) (CDFW 2018). Adjoining habitat areas should be included where project construction and activities could lead to direct or indirect impacts off site;
- c) Floristic, alliance- and/or association-based mapping and vegetation impact assessments conducted at a project site and within the neighboring vicinity. The [Manual of California Vegetation](#) (MCV), second edition, should also be used to inform this mapping and assessment (Sawyer et al. 2009). Adjoining habitat areas should be included in this assessment where project activities could lead to direct or indirect impacts off site. Habitat mapping at the alliance level will help establish baseline vegetation conditions;
- d) A complete, recent, assessment of the biological resources associated with each habitat type on site and within adjacent areas that could also be affected by a project. CDFW's [California Natural Diversity Database](#) (CNDDDB) in Sacramento should be contacted to obtain current information on any previously reported sensitive species and habitat (CDFW 2021c). An assessment should include a nine-quadrangle search of the CNDDDB to determine a list of species potentially present at a project site. A lack of records in the CNDDDB does not mean that rare, threatened, or endangered plants and wildlife do not occur in the project site. Field verification for the presence or absence of sensitive species is necessary to provide a complete biological assessment for adequate CEQA review [CEQA Guidelines, § 15003(i)];
- e) A complete, recent, assessment of rare, threatened, and endangered, and other sensitive species on site and within the area of potential effect, including California Species of Special Concern, and California Fully Protected Species (Fish & G. Code, §§ 3511, 4700, 5050, and 5515). Species to be addressed should include all those which meet the CEQA definition of endangered, rare, or threatened species (CEQA Guidelines, § 15380). Seasonal variations in use of a project site should also be addressed such as wintering, roosting, nesting, and foraging habitat. Focused species-specific surveys, conducted at the appropriate time of year and time of day when the sensitive species are active or otherwise identifiable, may be required if suitable habitat is present. See CDFW's [Survey and Monitoring Protocols and Guidelines](#) for established

Megan Taggert  
City of Palmdale  
July 21, 2021  
Page 10 of 14

- survey protocol for select species (CDFW 2021d). Acceptable species-specific survey procedures may be developed in consultation with CDFW and the U.S. Fish and Wildlife Service; and,
- f) A recent wildlife and rare plant survey. CDFW generally considers biological field assessments for wildlife to be valid for a one-year period, and assessments for rare plants may be considered valid for a period of up to three years. Some aspects of a proposed project may warrant periodic updated surveys for certain sensitive taxa, particularly if build out could occur over a protracted time frame or in phases.
  - g) A biological resources survey should include identification and delineation of any rivers, streams, and lakes and their associated natural plant communities/habitats. This includes any culverts, ditches, storm channels that may transport water, sediment, pollutants, and discharge into rivers, streams, and lakes.
- 4) Data. CEQA requires that information developed in environmental impact reports be incorporated into a database which may be used to make subsequent or supplemental environmental determinations [Pub. Resources Code, § 21003, subd. (e)]. Accordingly, please report any special status species and natural communities detected by completing and submitting [CNDDDB Field Survey Forms](#) (CDFW 2021e). The City should ensure data collected at a project-level has been properly submitted, with all data fields applicable filled out. The data entry should also list pending development as a threat and then update this occurrence after impacts have occurred.
- 5) Biological Direct, Indirect, and Cumulative Impacts. CDFW recommends providing a thorough discussion of direct, indirect, and cumulative impacts expected to adversely affect biological resources, with specific measures to offset such impacts. The DEIR should address the following:
- a) A discussion regarding Project-related indirect impacts on biological resources, including resources in nearby public lands, open space, adjacent natural habitats, riparian ecosystems, and any designated and/or proposed or existing reserve lands [e.g., preserve lands associated with a Natural Community Conservation Plan (NCCP, Fish & G. Code, § 2800 et. seq.)]. Impacts on, and maintenance of, wildlife corridor/movement areas, including access to undisturbed habitats in adjacent areas, should be fully evaluated in the DEIR;
  - b) A discussion of both the short-term and long-term effects to species population distribution and concentration and alterations of the ecosystem supporting the species impacted [CEQA Guidelines, § 15126.2(a)];
  - c) A discussion of potential adverse impacts from lighting, noise, temporary and permanent human activity, and exotic species, and identification of any mitigation measures;
  - d) A discussion on Project-related changes on drainage patterns; the volume, velocity, and frequency of existing and post-Project surface flows; polluted runoff; soil erosion and/or sedimentation in streams and water bodies; and, post-Project fate of runoff from the Project sites. The discussion should also address the potential water extraction activities and the potential resulting impacts on the habitat (if any) supported by the groundwater.

Megan Taggert  
City of Palmdale  
July 21, 2021  
Page 11 of 14

Mitigation measures proposed to alleviate such Project impacts should be included;

- e) An analysis of impacts from proposed changes to land use designations and zoning, and existing land use designation and zoning located nearby or adjacent to natural areas that may inadvertently contribute to wildlife-human interactions. A discussion of possible conflicts and mitigation measures to reduce these conflicts should be included in the DEIR; and,
  - f) A cumulative effects analysis, as described under CEQA Guidelines section 15130. General and specific plans, as well as past, present, and anticipated future projects, should be analyzed relative to their impacts on similar plant and wildlife species, habitat, and vegetation communities. If the City determines that the Project would not have a cumulative impact, the environmental document should indicate why the cumulative impact is not significant. The City's conclusion should be supported by facts and analyses [CEQA Guidelines, § 15130(a)(2)].
- 6) Project Description and Alternatives. To enable CDFW to adequately review and comment on the proposed Project from the standpoint of the protection of plants, fish, and wildlife, we recommend the following information be included in the DEIR:
- a) A complete discussion of the purpose and need for, and description of, the proposed Project;
  - b) CEQA Guidelines section 15126.6(a) states that an environmental document shall describe a reasonable range of potentially feasible alternatives to the Project, or to the location of the Project, which would feasibly attain most of the basic objectives of the Project but would avoid or substantially lessen any of the significant effects of the Project. CEQA Guidelines section 15126.6(f)(2) states if the Lead Agency concludes that no feasible alternative locations exist, it must disclose the reasons for this conclusion and should include reasons in the environmental document; and,
  - c) A range of feasible alternatives to Project component location and design features to avoid or otherwise minimize direct and indirect impacts to sensitive biological resources and wildlife movement areas. CDFW recommends the City consider configuring Project construction and activities, as well as the development footprint, in such a way as to fully avoid impacts to sensitive and special status plants and wildlife species, habitat, and sensitive vegetation communities. CDFW also recommends the City consider establishing appropriate setbacks from sensitive and special status biological resources. Setbacks should not be impacted by ground disturbance or hydrological changes for the duration of the Project and from any future development. As a general rule, CDFW recommends reducing or clustering the development footprint to retain unobstructed spaces for vegetation and wildlife and provide connections for wildlife between properties and minimize obstacles to open space.

Project alternatives should be thoroughly evaluated, even if an alternative would impede, to some degree, the attainment of the Project objectives or would be more costly (CEQA Guidelines, § 15126.6).

Megan Taggart  
City of Palmdale  
July 21, 2021  
Page 12 of 14

- d) Where the Project may impact aquatic and riparian resources, CDFW recommends the City consider alternatives that would fully avoid impacts to such resources. CDFW also recommends alternatives that would allow not impede, alter, or otherwise modify existing surface flow; watercourse and meander; and water-dependent ecosystems and vegetation communities. Project-related designs should consider elevated crossings to avoid channelizing or narrowing of streams. Any modifications to a river, creek, or stream may cause or magnify upstream bank erosion, channel incision, and drop in water level and cause the stream to alter its course of flow.
- 7) Translocation/Salvage of Plants and Animal Species. Translocation and transplantation is the process of moving an individual from a project site and permanently moving it to a new location. CDFW generally does not support the use of, translocation or transplantation as the primary mitigation strategy for unavoidable impacts to rare, threatened, or endangered plant or animal species. Studies have shown that these efforts are experimental and the outcome unreliable. CDFW has found that permanent preservation and management of habitat capable of supporting these species is often a more effective long-term strategy for conserving sensitive plants and animals and their habitats.
- 8) Compensatory Mitigation. An environmental document should include mitigation measures for adverse Project related direct or indirect impacts to sensitive plants, animals, and habitats. Mitigation measures should emphasize avoidance and reduction of project-related impacts. For unavoidable impacts, on-site habitat restoration or enhancement should be discussed in detail. If on-site mitigation is not feasible or would not be biologically viable and therefore not adequately mitigate the loss of biological functions and values, off-site mitigation through habitat creation and/or acquisition and preservation in perpetuity should be addressed. Areas proposed as mitigation lands should be protected in perpetuity with a conservation easement, financial assurance and dedicated to a qualified entity for long-term management and monitoring. Under Government Code, section 65967, the Lead Agency must exercise due diligence in reviewing the qualifications of a governmental entity, special district, or nonprofit organization to effectively manage and steward land, water, or natural resources on mitigation lands it approves.
- 9) Long-term Management of Mitigation Lands. For proposed preservation and/or restoration, an environmental document should include measures to protect the targeted habitat values from direct and indirect negative impacts in perpetuity. The objective should be to offset the project-induced qualitative and quantitative losses of wildlife habitat values. Issues that should be addressed include (but are not limited to) restrictions on access, proposed land dedications, monitoring and management programs, control of illegal dumping, water pollution, and increased human intrusion. An appropriate non-wasting endowment should be set aside to provide for long-term management of mitigation lands.

## Conclusion

We appreciate the opportunity to comment on the NOP for the Palmdale General Plan Update to assist the City of Palmdale in identifying and mitigating Project impacts on biological resources. If you have any questions or comments regarding this letter, please contact Felicia Silva, Environmental Scientist, at [Felicia.Silva@wildlife.ca.gov](mailto:Felicia.Silva@wildlife.ca.gov) or (562) 292-8105.

**RE: SCAG Comments on the Notice of Preparation of a Draft Environmental Impact Report for the Palmdale 2045 General Plan Update [SCAG NO. IGR10425]**

Dear Ms. Taggart,

Thank you for submitting the Notice of Preparation of a Draft Environmental Impact Report for the Palmdale 2045 General Plan Update (“proposed project”) to the Southern California Association of Governments (SCAG) for review and comment. SCAG is responsible for providing informational resources to regionally significant plans, projects, and programs per the California Environmental Quality Act (CEQA) to facilitate the consistency of these projects with SCAG’s adopted regional plans, to be determined by the lead agencies.<sup>1</sup>

Pursuant to Senate Bill (SB) 375, SCAG is the designated Regional Transportation Planning Agency under state law and is responsible for preparation of the Regional Transportation Plan (RTP) including the Sustainable Communities Strategy (SCS). SCAG’s feedback is intended to assist local jurisdictions and project proponents to implement projects that have the potential to contribute to attainment of Regional Transportation Plan/Sustainable Communities Strategy (RTP/SCS) goals and align with RTP/SCS policies. Finally, SCAG is also the authorized regional agency for Inter-Governmental Review (IGR) of programs proposed for Federal financial assistance and direct Federal development activities, pursuant to Presidential Executive Order 12372.

SCAG staff has reviewed the Notice of Preparation of a Draft Environmental Impact Report for the Palmdale 2045 General Plan Update in Los Angeles County. The proposed project is a General Plan Update for 2020 – 2045 that covers the state-required nine topics and economic development, urban design, infrastructure, military readiness, community facilities, sustainability and resilience, and climate change.

**When available, please email environmental documentation to [IGR@scag.ca.gov](mailto:IGR@scag.ca.gov) providing, at a minimum, the full public comment period for review.**

If you have any questions regarding the attached comments, please contact the Inter-Governmental Review (IGR) Program, attn.: Anita Au, Senior Regional Planner, at (213) 236-1874 or [IGR@scag.ca.gov](mailto:IGR@scag.ca.gov). Thank you.

Sincerely,

Rongsheng Luo  
Acting Manager, Compliance and Performance Monitoring

<sup>1</sup> Lead agencies such as local jurisdictions have the sole discretion in determining a local project’s consistency with the 2020 RTP/SCS (Connect SoCal) for the purpose of determining consistency for CEQA.

**COMMENTS ON THE NOTICE OF PREPARATION OF A  
DRAFT ENVIRONMENTAL IMPACT REPORT FOR THE  
PALMDALE 2045 GENERAL PLAN UPDATE [SCAG NO. IGR10425]**

**CONSISTENCY WITH CONNECT SOCIAL**

SCAG provides informational resources to facilitate the consistency of the proposed project with the adopted 2020-2045 Regional Transportation Plan/Sustainable Communities Strategy (RTP/SCS or Connect SoCal). For the purpose of determining consistency with CEQA, lead agencies such as local jurisdictions have the sole discretion in determining a local project’s consistency with Connect SoCal.

**CONNECT SOCIAL GOALS**

The SCAG Regional Council fully adopted [Connect SoCal](#) in September 2020. Connect SoCal, also known as the 2020 – 2045 RTP/SCS, builds upon and expands land use and transportation strategies established over several planning cycles to increase mobility options and achieve a more sustainable growth pattern. The long-range visioning plan balances future mobility and housing needs with goals for the environment, the regional economy, social equity and environmental justice, and public health. The goals included in Connect SoCal may be pertinent to the proposed project. These goals are meant to provide guidance for considering the proposed project. Among the relevant goals of Connect SoCal are the following:

SCAG CONNECT SOCIAL GOALS	
Goal #1:	<i>Encourage regional economic prosperity and global competitiveness</i>
Goal #2:	<i>Improve mobility, accessibility, reliability and travel safety for people and goods</i>
Goal #3:	<i>Enhance the preservation, security, and resilience of the regional transportation system</i>
Goal #4:	<i>Increase person and goods movement and travel choices within the transportation system</i>
Goal #5:	<i>Reduce greenhouse gas emissions and improve air quality</i>
Goal #6:	<i>Support healthy and equitable communities</i>
Goal #7:	<i>Adapt to a changing climate and support an integrated regional development pattern and transportation network</i>
Goal #8:	<i>Leverage new transportation technologies and data-driven solutions that result in more efficient travel</i>
Goal #9:	<i>Encourage development of diverse housing types in areas that are supported by multiple transportation options</i>
Goal #10:	<i>Promote conservation of natural and agricultural lands and restoration of habitats</i>

For ease of review, we encourage the use of a side-by-side comparison of SCAG goals with discussions of the consistency, non-consistency or non-applicability of the goals and supportive analysis in a table format. Suggested format is as follows:

SCAG CONNECT SOCIAL GOALS	
Goal	Analysis
Goal #1: <i>Encourage regional economic prosperity and global competitiveness</i>	<i>Consistent: Statement as to why; Not-Consistent: Statement as to why; Or Not Applicable: Statement as to why; DEIR page number reference</i>
Goal #2: <i>Improve mobility, accessibility, reliability and travel safety for people and goods</i>	<i>Consistent: Statement as to why; Not-Consistent: Statement as to why; Or Not Applicable: Statement as to why; DEIR page number reference</i>
etc.	etc.

**Connect SoCal Strategies**

To achieve the goals of Connect SoCal, a wide range of land use and transportation strategies are included in the accompanying twenty (20) technical reports. Of particular note are multiple strategies included in Chapter 3 of Connect SoCal intended to support implementation of the regional Sustainable Communities Strategy (SCS) framed within the context of focusing growth near destinations and mobility options; promoting diverse housing choices; leveraging technology innovations; supporting implementation of sustainability policies; and promoting a Green Region. To view Connect SoCal and the accompanying technical reports, please visit the [Connect SoCal webpage](#). Connect SoCal builds upon the progress from previous RTP/SCS cycles and continues to focus on integrated, coordinated, and balanced planning for land use and transportation that helps the SCAG region strive towards a more sustainable region, while meeting statutory requirements pertinent to RTP/SCSs. These strategies within the regional context are provided as guidance for lead agencies such as local jurisdictions when the proposed project is under consideration.

SCAG staff would like to call your attention to resources available from SCAG’s [Regional Climate Adaptation Framework](#) including the [Southern California Climate Adaptation Planning Guide](#), [Communication and Outreach Toolkit](#), [Library of Model Policies](#), and [SB 379 Compliance Curriculum for Local Jurisdictions](#).

**DEMOGRAPHICS AND GROWTH FORECASTS**

A key, formative step in projecting future population, households, and employment through 2045 for Connect SoCal was the generation of a forecast of regional and county level growth in collaboration with expert demographers and economists on Southern California. From there, jurisdictional level forecasts were ground-truthed by subregions and local agencies, which helped SCAG identify opportunities and barriers to future development. This forecast helps the region understand, in a very general sense, where we are expected to grow, and allows SCAG to focus attention on areas that are experiencing change and may have increased transportation needs. After a year-long engagement effort with all 197 jurisdictions one-on-one, 82 percent of SCAG’s 197 jurisdictions provided feedback on the forecast of future growth for Connect SoCal. SCAG also sought feedback on potential sustainable growth strategies from a broad range of stakeholder groups – including local jurisdictions, county transportation commissions, other partner agencies, industry groups, community-based organizations, and the general public. Connect SoCal utilizes a bottom-up approach in that total projected growth for each jurisdiction reflects feedback received from jurisdiction staff, including city managers, community development/planning directors, and local staff. Growth at the neighborhood level (i.e., transportation analysis zone (TAZ) reflects entitled projects and adheres to current general and specific plan maximum densities as conveyed by jurisdictions (except in cases where entitled projects and development agreements exceed these capacities as calculated by SCAG). Neighborhood level growth projections also feature strategies that help to reduce greenhouse gas emissions (GHG) from automobiles and light trucks to achieve Southern California’s GHG reduction target, approved by the California Air Resources Board (CARB) in accordance

with state planning law. Connect SoCal’s Forecasted Development Pattern is utilized for long range modeling purposes and does not supersede actions taken by elected bodies on future development, including entitlements and development agreements. SCAG does not have the authority to implement the plan -- neither through decisions about what type of development is built where, nor what transportation projects are ultimately built, as Connect SoCal is adopted at the jurisdictional level. Achieving a sustained regional outcome depends upon informed and intentional local action. To access jurisdictional level growth estimates and forecasts for years 2016 and 2045, please refer to the [Connect SoCal Demographics and Growth Forecast Technical Report](#). The growth forecasts for the region and applicable jurisdictions are below.

	Adopted SCAG Region Wide Forecasts				Adopted City of Palmdale Forecasts			
	Year 2020	Year 2030	Year 2035	Year 2045	Year 2020	Year 2030	Year 2035	Year 2045
Population	19,517,731	20,821,171	21,443,006	22,503,899	162,262	179,535	188,171	207,047
Households	6,333,458	6,902,821	7,170,110	7,633,451	45,820	53,046	56,660	61,798
Employment	8,695,427	9,303,627	9,566,384	10,048,822	38,610	41,655	43,178	45,938

**MITIGATION MEASURES**

SCAG staff recommends that you review the [Final Program Environmental Impact Report](#) (Final PEIR) for Connect SoCal for guidance, as appropriate. SCAG’s Regional Council certified the PEIR and adopted the associated Findings of Fact and a Statement of Overriding Considerations (FOF/SOC) and Mitigation Monitoring and Reporting Program (MMRP) on May 7, 2020 and also adopted a PEIR Addendum and amended the MMRP on September 3, 2020 (please see the [PEIR webpage](#) and scroll to the bottom of the page for the PEIR Addendum). The PEIR includes a list of project-level performance standards-based mitigation measures that may be considered for adoption and implementation by lead, responsible, or trustee agencies in the region, as applicable and feasible. Project-level mitigation measures are within responsibility, authority, and/or jurisdiction of project-implementing agency or other public agency serving as lead agency under CEQA in subsequent project- and site- specific design, CEQA review, and decision-making processes, to meet the performance standards for each of the CEQA resource categories.

**REGIONAL HOUSING NEEDS ALLOCATION**

On March 4, 2021 SCAG’s Regional Council adopted the [6<sup>th</sup> cycle Final Regional Housing Needs Assessment \(RHNA\) Allocation Plan](#) which covers the planning period October 2021 through October 2029. The 6<sup>th</sup> cycle Final RHNA allocation for the applicable jurisdiction is below.

SCAG 6 <sup>th</sup> Cycle Final RHNA Allocation for City of Palmdale	
Very low income	1,777
Low income	935
Moderate income	1,004
Above moderate income	2,924
Total RHNA Allocation	6,640

Sixth cycle housing elements are due to the California Department of Housing and Community Development (HCD) by October 15, 2021. SCAG encourages jurisdictions to prepare the draft housing element in advance of the due date to ensure adequate time to address HCD comments and adopt a final housing element. Jurisdictions that do not have a compliant housing element may be ineligible for certain State funding and grant opportunities and may be at risk for legal action from stakeholders or HCD.

SCAG staff would like to call your attention to SCAG's [HELPR 2.0](#), a web-mapping tool developed by SCAG to help local jurisdictions and stakeholders understand local land use, site opportunities, and environmental sensitivities for aligning housing planning with the state Department of Housing and Community Development's (HCD) [6th cycle housing element requirements](#).

### **ENVIRONMENTAL JUSTICE**

Per [Senate Bill 1000](#) (SB 1000), local jurisdictions in California with disadvantaged communities are required to develop an Environmental Justice (EJ) Element or consider EJ goals, policies, and objectives in their General Plans when updating two or more General Plan Elements. SCAG staff recommends that you review the [Environmental Justice Technical Report](#) and the updated [Environmental Justice Toolbox](#), which is a resource document to assist local jurisdictions in developing EJ-related goals and policies regarding solutions for EJ-related community issues.

Special Status Species List

## Appendix C Biological Resources

Scientific Name Common Name	Status	Habitat Requirements
<i>Acanthoscyphus parishii</i> var. <i>abramsii</i> Abrams' oxytheca	None/None G4?T1T2/S1S2 1B.2	Annual herb. Blooms Jun-Aug. Occurs in chaparral, granitic sand, shale. 1140-2060m (3740-6760ft).
<i>Acanthoscyphus parishii</i> var. <i>parishii</i> Parish's oxytheca	None/None G4?T3T4/S3S4 4.2	Chaparral, Lower montane coniferous forest. Sandy or gravelly places. 1220-2600m. Blooms Jun-Sep.
<i>Androsace elongata</i> ssp. <i>acuta</i> California androsace	None/None G5?T3T4/S3S4 4.2	Chaparral, Cismontane woodland, Coastal scrub, Meadows and seeps, Pinyon and juniper woodland, Valley and foothill grassland. Highly localized and often overlooked little plant. 150-1305m. Blooms Mar-Jun.
<i>Arctostaphylos gabilanensis</i> Gabilan Mountains manzanita	None/None G1/S1 1B.2	Chaparral, Cismontane woodland. Grainitic substrates. 300-700m. Blooms Jan.
<i>Arctostaphylos glandulosa</i> ssp. <i>gabrielensis</i> San Gabriel manzanita	None/None G5T3/S3 1B.2	Chaparral. Rocky outcrops; can be dominant shrub where it occurs. 595-1500m. Blooms Mar.
<i>Arctostaphylos parryana</i> ssp. <i>tumescens</i> interior manzanita	None/None G4T3T4/S3S4 4.3	Chaparral, Cismontane woodland. Montane chaparral or foothill woodland. 2100-2310m. Blooms Feb-Apr.
<i>Astragalus hornii</i> var. <i>hornii</i> Horn's milk-vetch	None/None GUT1/S1 1B.1	Meadows and seeps, Playas. Lake margins, alkaline sites. 60-850m. Blooms May-Oct.
<i>Astragalus preussii</i> var. <i>laxiflorus</i> Lancaster milk-vetch	None/None G4T2/S1 1B.1	Chenopod scrub. Alkaline clay flats or gravelly or sandy washes and along draws in gullied badlands. 700-735 m in California. 700-700m. Blooms Mar-May.
<i>Calochortus catalinae</i> Catalina mariposa lily	None/None G3G4/S3S4 4.2	Chaparral, Cismontane woodland, Coastal scrub, Valley and foothill grassland. In heavy soils, open slopes, openings in brush. 15-700m. Blooms (Feb)Mar-Jun.
<i>Calochortus clavatus</i> var. <i>avius</i> Pleasant Valley mariposa lily	None/None G4T2/S2 1B.2	Lower montane coniferous forest. Josephine silt loam and volcanically derived soil; often in rocky areas. 305-1800m. Blooms May-Jul.
<i>Calochortus clavatus</i> var. <i>gracilis</i> slender mariposa-lily	None/None G4T2T3/S2S3 1B.2	Perennial bulbiferous herb. Blooms March to June. Chaparral, coastal scrub. Shaded foothill canyons; often on grassy slopes within other habitat. 420-760m (1380-2495ft).
<i>Calochortus palmeri</i> var. <i>palmeri</i> Palmer's mariposa-lily	None/None G3T2/S2 1B.2	Chaparral, Lower montane coniferous forest, Meadows and seeps. Vernal moist places in yellow-pine forest, chaparral. 710-2390m. Blooms Apr-Jul.
<i>Calochortus striatus</i> alkali mariposa lily	None/None G3?/S2S3 1B.2	Chaparral, Chenopod scrub, Meadows and seeps, Mojavean desert scrub. Alkaline meadows and ephemeral washes. 70-1600m. 70-1595m. Blooms Apr-Jun.
<i>Calystegia peirsonii</i> Peirson's morning-glory	None/None G4/S4 4.2	Chaparral, Chenopod scrub, Cismontane woodland, Coastal scrub, Lower montane coniferous forest, Valley and foothill grassland. Often in disturbed areas or along roadsides or in grassy, open areas. 30-1500m. Blooms Apr-Jun.

City of Palmdale  
City of Palmdale 2045 General Plan Update

Scientific Name Common Name	Status	Habitat Requirements
<i>Canbya candida</i> white pygmy-poppy	None/None G3G4/S3S4 4.2	Joshua tree "woodland", Mojavean desert scrub, Pinyon and juniper woodland. Gravelly, sandy, granitic places. 600-1460m. Blooms Mar-Jun.
<i>Castilleja gleasoni</i> Mt. Gleason paintbrush	None/SR G2/S2 1B.2	Chaparral, Lower montane coniferous forest, Pinyon and juniper woodland. On open flats or slopes in granitic soil. Restricted to the San Gabriel Mountains. 1160-2170m. Blooms May-Jun(Sep).
<i>Castilleja plagiotoma</i> Mojave paintbrush	None/None G4/S4 4.3	Great Basin scrub, Joshua tree "woodland", Lower montane coniferous forest, Pinyon and juniper woodland. Alluvial fans. 300-2500m. Blooms Apr-Jun.
<i>Chorizanthe parryi</i> var. <i>parryi</i> Parry's spineflower	None/None G3T2/S2 1B.1	Chaparral, Cismontane woodland, Coastal scrub, Valley and foothill grassland. Dry slopes and flats; sometimes at interface of 2 vegetation types, such as chaparral and oak woodland. Dry, sandy soils. 275-1220m. Blooms Apr-Jun.
<i>Chorizanthe spinosa</i> Mojave spineflower	None/None G4/S4 4.2	Chenopod scrub, Joshua tree "woodland", Mojavean desert scrub, Playas. Sometimes on alkaline soils. 6-1300m. Blooms Mar-Jul.
<i>Cryptantha clokeyi</i> Clokey's cryptantha	None/None G3/S3 1B.2	Mojavean desert scrub. Sandy or gravelly soils. 725-1365m. Blooms Apr.
<i>Diplacus johnstonii</i> Johnston's monkeyflower	None/None G4/S4 4.3	Lower montane coniferous forest. On scree, in rocky or gravelly sites. Also in disturbed areas. 975-2920m. Blooms May-Aug.
<i>Eriastrum rosamondense</i> Rosamond eriastrum	None/None G1?/S1? 1B.1	Chenopod scrub, Vernal pools. Alkali pool beds separated by very low hummocks with open cheopod scrub. Often sandy soil. 700-1175m. Blooms Apr-May(Jun-Jul).
<i>Eriogonum umbellatum</i> var. <i>minus</i> alpine sulfur-flowered buckwheat	None/None G5T4/S4 4.3	Subalpine coniferous forest, Upper montane coniferous forest. Granitic substrate; usually gravelly or sandy. 1800-3068m. Blooms Jun-Sep.
<i>Frasera neglecta</i> pine green-gentian	None/None G4/S4 4.3	Lower montane coniferous forest, Pinyon and juniper woodland, Upper montane coniferous forest. Dry, open woodlands. 1400-2500m. Blooms May-Jul.
<i>Galium jepsonii</i> Jepson's bedstraw	None/None G3/S3 4.3	Lower montane coniferous forest, Upper montane coniferous forest. On granite; gravelly hillsides and slopes. 1540-2500m. Blooms Jul-Aug.
<i>Galium johnstonii</i> Johnston's bedstraw	None/None G4/S4 4.3	Chaparral, Lower montane coniferous forest, Pinyon and juniper woodland, Riparian woodland. Open, mixed forest. 1220-2300m. Blooms Jun-Jul.
<i>Gilia latiflora</i> ssp. <i>cuyamensis</i> Cuyama gilia	None/None G5?T4/S4 4.3	Pinyon and juniper woodland. Sandy flats, lower river valleys. 595-2000m. Blooms Apr-Jun.
<i>Goodmania luteola</i> golden goodmania	None/None G3/S3 4.2	Meadows and seeps, Mojavean desert scrub, Playas, Valley and foothill grassland. Alkaline or clay soils. 20-2200m. Blooms Apr-Aug.
<i>Hulsea vestita</i> ssp. <i>gabrielensis</i> San Gabriel Mountains sunflower	None/None G5T3/S3 4.3	Lower montane coniferous forest, Upper montane coniferous forest. Rocky sites. 1500-2500m. Blooms May-Jul.

Scientific Name Common Name	Status	Habitat Requirements
<i>Lilium parryi</i> lemon lily	None/None G3/S3 1B.2	Lower montane coniferous forest, Meadows and seeps, Riparian forest, Upper montane coniferous forest. Wet, mountainous terrain; generally in forested areas; on shady edges of streams, in open boggy meadows & seeps. 1220-2745m. Blooms Jul-Aug.
<i>Linanthus concinnus</i> San Gabriel linanthus	None/None G2/S2 1B.2	Chaparral, Lower montane coniferous forest, Upper montane coniferous forest. Dry rocky slopes, often in Jeffrey pine/canyon oak forest. 1520-2800m. Blooms Apr-Jul.
<i>Loeflingia squarrosa</i> var. <i>artemisiarum</i> sagebrush loeflingia	None/None G5T3/S2 2B.2	Desert dunes, Great Basin scrub, Sonoran desert scrub. Sandy flats and dunes. Sandy areas around clay slicks w/Sarcobatus, Atriplex, Tetradymia, etc. 700-1615m. Blooms Apr-May.
<i>Lycium torreyi</i> Torrey's box-thorn	None/None G4G5/S3 4.2	Mojavean desert scrub, Sonoran desert scrub. Sandy, rocky, washes, streambanks, desert valleys. -50-1220m. Blooms (Jan-Feb)Mar-Jun(Sep-Nov).
<i>Malacothamnus davidsonii</i> Davidson's bush-mallow	None/None G2/S2 1B.2	Chaparral, Cismontane woodland, Coastal scrub, Riparian woodland. Sandy washes. 185-1140m. Blooms Jun-Jan.
<i>Monardella viridis</i> green monardella	None/None G3/S3 4.3	Broadleafed upland forest, Chaparral, Cismontane woodland. 100-1010m. Blooms Jun-Sep.
<i>Muilla coronata</i> crowned muilla	None/None G3/S3 4.2	Chenopod scrub, Joshua tree "woodland", Mojavean desert scrub, Pinyon and juniper woodland. Mostly on barren flats and ridges in sandy, granitic soils. 670-1960m. Blooms Mar-Apr(May).
<i>Opuntia basilaris</i> var. <i>brachyclada</i> short-joint beavertail	None/None G5T3/S3 1B.2	Chaparral, Joshua tree "woodland", Mojavean desert scrub, Pinyon and juniper woodland. Sandy soil or coarse, granitic loam. 425-1800m. Blooms Apr-Jun(Aug).
<i>Packera ionophylla</i> Tehachapi ragwort	None/None G4/S4 4.3	Lower montane coniferous forest, Upper montane coniferous forest. Dry, open, granitic talus slopes. 1500-2700m. Blooms Jun-Jul.
<i>Perideridia pringlei</i> adobe yampah	None/None G4/S4 4.3	Chaparral, Cismontane woodland, Coastal scrub, Pinyon and juniper woodland. Serpentine, clay soils. Grassland hillsides; seasonally wet sites. 300-1800m. Blooms Apr-Jun(Jul).
<i>Phacelia mohavensis</i> Mojave phacelia	None/None G4Q/S4 4.3	Cismontane woodland, Lower montane coniferous forest, Meadows and seeps, Pinyon and juniper woodland. Sandy or gravelly soils, dry streambeds. 1400-2500m. Blooms Apr-Aug.
<i>Quercus durata</i> var. <i>gabrielensis</i> San Gabriel oak	None/None G4T3/S3 4.2	Chaparral, Cismontane woodland. 450-1000m. Blooms Apr-May.
<i>Symphyotrichum greatae</i> Greata's aster	None/None G2/S2 1B.3	Broadleafed upland forest, Chaparral, Cismontane woodland, Lower montane coniferous forest, Riparian woodland. Mesic canyons. 300-2010m. Blooms Jun-Oct.
<i>Syntrichopappus lemmonii</i> Lemmon's syntrichopappus	None/None G4/S4 4.3	Chaparral, Joshua tree "woodland", Pinyon and juniper woodland. Decomposed granite; sandy or gravelly soils. 500-1830m. Blooms Apr-May(Jun).
<i>Bombus crotchii</i> Crotch bumble bee	None/SCE G3G4/S1S2	Coastal California east to the Sierra-Cascade crest and south into Mexico. Food plant genera include Antirrhinum, Phacelia, Clarkia, Dendromecon, Eschscholzia, and Eriogonum.

City of Palmdale  
City of Palmdale 2045 General Plan Update

Scientific Name Common Name	Status	Habitat Requirements
<i>Branchinecta lynchi</i> vernal pool fairy shrimp	FT/None G3/S3	Endemic to the grasslands of the Central Valley, Central Coast mountains, and South Coast mountains, in astatic rain-filled pools. Inhabit small, clear-water sandstone-depression pools and grassed swale, earth slump, or basalt-flow depression pools.
<i>Euphydryas editha quino</i> quino checkerspot butterfly	FE/None G5T1T2/S1S2	Sunny openings within chaparral & coastal sage shrublands in parts of Riverside & San Diego counties. Hills and mesas near the coast. Need high densities of food plants <i>Plantago erecta</i> , <i>P. insularis</i> , and <i>Orthocarpus purpureus</i> .
<i>Helminthoglypta fontiphila</i> Soledad shoulderband	None/None G1/S1	Air-breathing terrestrial snail. Known from type locality, Little Rock Creek Cyn on north side of San Gabriels; west to Santa Clarita in Soledad Cyn; east to the vicinity of Big Rock Creek; and north to Elizabeth Lake Cyn in the Sierra Pelona Mtns. Frequently found in riparian habitat (springs, seeps, along streams). May be found in rock piles, flood-borne debris, or under dead yuccas where other cover is not available.
<i>Anaxyrus californicus</i> arroyo toad	FE/None G2G3/S2S3 SSC	Semi-arid regions near washes or intermittent streams, including valley-foothill and desert riparian, desert wash, etc. Rivers with sandy banks, willows, cottonwoods, and sycamores; loose, gravelly areas of streams in drier parts of range.
<i>Rana draytonii</i> California red-legged frog	FT/None G2G3/S2S3 SSC	Lowlands and foothills in or near permanent sources of deep water with dense, shrubby or emergent riparian vegetation. Requires 11-20 weeks of permanent water for larval development. Must have access to estivation habitat.
<i>Rana muscosa</i> southern mountain yellow-legged frog	FE/SE G1/S1 WL	Federal listing refers to populations in the San Gabriel, San Jacinto and San Bernardino mountains (southern DPS). Northern DPS was determined to warrant listing as endangered, Apr 2014, effective Jun 30, 2014. Always encountered within a few feet of water. Tadpoles may require 2 - 4 yrs to complete their aquatic development.
<i>Anniella pulchra</i> Northern California legless lizard	None/None G3/S3 SSC	Sandy or loose loamy soils under sparse vegetation. Soil moisture is essential. They prefer soils with a high moisture content.
<i>Anniella spp.</i> California legless lizard	None/None G3G4/S3S4 SSC	Contra Costa County south to San Diego, within a variety of open habitats. This element represents California records of <i>Anniella</i> not yet assigned to new species within the <i>Anniella pulchra</i> complex. Variety of habitats; generally in moist, loose soil. They prefer soils with a high moisture content.
<i>Arizona elegans occidentalis</i> California glossy snake	None/None G5T2/S2 SSC	Patchily distributed from the eastern portion of San Francisco Bay, southern San Joaquin Valley, and the Coast, Transverse, and Peninsular ranges, south to Baja California. Generalist reported from a range of scrub and grassland habitats, often with loose or sandy soils.
<i>Emys marmorata</i> western pond turtle	None/None G3G4/S3 SSC	A thoroughly aquatic turtle of ponds, marshes, rivers, streams and irrigation ditches, usually with aquatic vegetation, below 6000 ft elevation. Needs basking sites and suitable (sandy banks or grassy open fields) upland habitat up to 0.5 km from water for egg-laying.
<i>Gopherus agassizii</i> desert tortoise	FT/ST G3/S2S3	Most common in desert scrub, desert wash, and Joshua tree habitats; occurs in almost every desert habitat. Require friable soil for burrow and nest construction. Creosote bush habitat with large annual wildflower blooms preferred.

Scientific Name Common Name	Status	Habitat Requirements
<i>Phrynosoma blainvillii</i> coast horned lizard	None/None G3G4/S3S4 SSC	Frequents a wide variety of habitats, most common in lowlands along sandy washes with scattered low bushes. Open areas for sunning, bushes for cover, patches of loose soil for burial, and abundant supply of ants and other insects.
<i>Thamnophis hammondi</i> two-striped gartersnake	None/None G4/S3S4 SSC	Coastal California from vicinity of Salinas to northwest Baja California. From sea to about 7,000 ft elevation. Highly aquatic, found in or near permanent fresh water. Often along streams with rocky beds and riparian growth.
<i>Accipiter cooperii</i> Cooper's hawk	None/None G5/S4 WL	Woodland, chiefly of open, interrupted or marginal type. Nest sites mainly in riparian growths of deciduous trees, as in canyon bottoms on river flood-plains; also, live oaks.
<i>Agelaius tricolor</i> tricolored blackbird	None/ST G1G2/S1S2 SSC	
<i>Aimophila ruficeps canescens</i> southern California rufous-crowned sparrow	None/None G5T3/S3 WL	Resident in Southern California coastal sage scrub and sparse mixed chaparral. Frequents relatively steep, often rocky hillsides with grass and forb patches.
<i>Artemisiospiza belli belli</i> Bell's sage sparrow	None/None G5T2T3/S3 WL	Nests in chaparral dominated by fairly dense stands of chamise. Found in coastal sage scrub in south of range. Nest located on the ground beneath a shrub or in a shrub 6-18 inches above ground. Territories about 50 yds apart.
<i>Athene cunicularia</i> burrowing owl	None/None G4/S3 SSC	Open, dry annual or perennial grasslands, deserts, and scrublands characterized by low-growing vegetation. Subterranean nester, dependent upon burrowing mammals, most notably, the California ground squirrel.
<i>Buteo regalis</i> ferruginous hawk	None/None G4/S3S4 WL	Open grasslands, sagebrush flats, desert scrub, low foothills and fringes of pinyon and juniper habitats. Eats mostly lagomorphs, ground squirrels, and mice. Population trends may follow lagomorph population cycles.
<i>Buteo swainsoni</i> Swainson's hawk	None/ST G5/S3	
<i>Charadrius montanus</i> mountain plover	None/None G3/S2S3 SSC	Short grasslands, freshly plowed fields, newly sprouting grain fields, & sometimes sod farms. Short vegetation, bare ground, and flat topography. Prefers grazed areas and areas with burrowing rodents.
<i>Falco columbarius</i> merlin	None/None G5/S3S4 WL	Seacoast, tidal estuaries, open woodlands, savannahs, edges of grasslands & deserts, farms & ranches. Clumps of trees or windbreaks are required for roosting in open country.
<i>Lanius ludovicianus</i> loggerhead shrike	None/None G4/S4 SSC	Broken woodlands, savannah, pinyon-juniper, Joshua tree, and riparian woodlands, desert oases, scrub & washes. Prefers open country for hunting, with perches for scanning, and fairly dense shrubs and brush for nesting.
<i>Poliioptila californica californica</i> coastal California gnatcatcher	FT/None G4G5T3Q/S2 SSC	Obligate, permanent resident of coastal sage scrub below 2500 ft in Southern California. Low, coastal sage scrub in arid washes, on mesas and slopes. Not all areas classified as coastal sage scrub are occupied.
<i>Toxostoma lecontei</i> Le Conte's thrasher	None/None G4/S3 SSC	Desert resident; primarily of open desert wash, desert scrub, alkali desert scrub, and desert succulent scrub habitats. Commonly nests in a dense, spiny shrub or densely branched cactus in desert wash habitat, usually 2-8 feet above ground.

City of Palmdale  
 City of Palmdale 2045 General Plan Update

Scientific Name Common Name	Status	Habitat Requirements
<i>Vireo bellii pusillus</i> least Bell's vireo	FE/SE G5T2/S2	Summer resident of Southern California in low riparian in vicinity of water or in dry river bottoms; below 2000 ft. Nests placed along margins of bushes or on twigs projecting into pathways, usually willow, Baccharis, mesquite.
<i>Myotis yumanensis</i> Yuma myotis	None/None G5/S4	Occurs in a variety of lowland and upland habitats including desert scrub, riparian, and woodlands and forests. Distribution is closely tied to bodies of water. Roosts in a variety of areas including caves, cliffs, mines, crevices in live trees, and buildings and other man-made structures.
<i>Onychomys torridus ramona</i> southern grasshopper mouse	None/None G5T3/S3 SSC	Desert areas, especially scrub habitats with friable soils for digging. Prefers low to moderate shrub cover. Feeds almost exclusively on arthropods, especially scorpions and orthopteran insects.
<i>Perognathus inornatus</i> San Joaquin pocket mouse	None/None G2G3/S2S3	Grassland, oak savanna and arid scrubland in the southern Sacramento Valley, Salinas Valley, San Joaquin Valley and adjacent foothills, south to the Mojave Desert. Associated with fine-textured, sandy, friable soils.
<i>Xerospermophilus mohavensis</i> Mohave ground squirrel	None/ST G2G3/S2S3	Open desert scrub, alkali scrub & Joshua tree woodland. Also feeds in annual grasslands. Restricted to Mojave Desert. Prefers sandy to gravelly soils, avoids rocky areas. Uses burrows at base of shrubs for cover. Nests are in burrows.
Mojave Riparian Forest	None/None G1/S1.1	
Southern Coast Live Oak Riparian Forest	None/None G4/S4	
Southern Cottonwood Willow Riparian Forest	None/None G3/S3.2	
Southern Riparian Scrub	None/None G3/S3.2	
Southern Sycamore Alder Riparian Woodland	None/None G4/S4	
Southern Willow Scrub	None/None G3/S2.1	
Valley Needlegrass Grassland	None/None G3/S3.1	All topographic locations. Soils may be deep with high clay content, loamy, sandy, or silty derived from mudstone, sandstone, or serpentine substrates
Wildflower Field	None/None G2/S2.2

## Report Overview

Palmdale is a city in northern Los Angeles County in the state of California. The city lies in the Antelope Valley region of Southern California. The San Gabriel Mountains, which are about 40 miles wide, separate Palmdale from the Los Angeles Basin to the south.

This report provides traffic information about the City of Palmdale including traffic counts, local land use and future travel demand forecasts in support of the General Plan Update. Traffic modeling was performed at the link level using the Regional Model. The SCAG region utilizes the SCAG 2016 Regional Transportation Plan/Sustainable Communities Strategy (RTP/SCS) Travel Demand Model (SCAG model) to produce forecasts for the region. The SCAG model used for the Palmdale General Plan Update (Palmdale GP) is consistent with the RTP assumptions for existing year and future year conditions as all projects in the RTP are included.

## EXISTING REGIONAL AND LOCAL ROADWAY

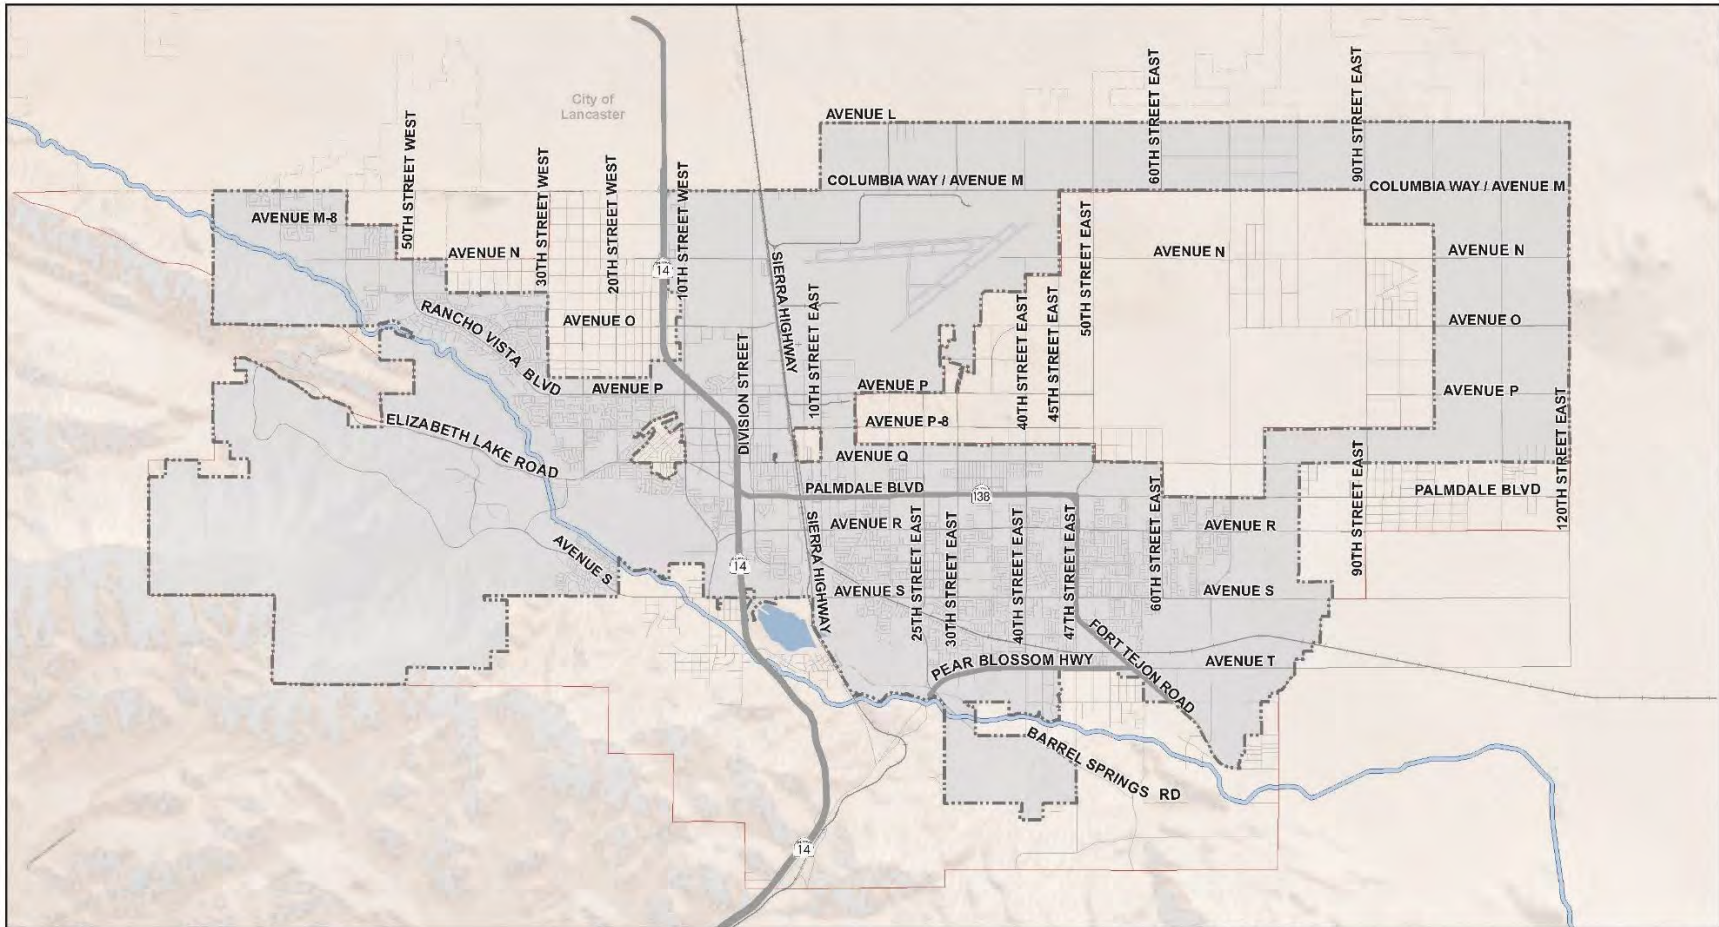

The existing regional and local roadway network in Palmdale is a hierarchical system of highways and local streets developed to provide regional traffic movement and local access. State Route (SR-) 14 provides access to a regional highway route, while SR-138 is a key arterial distributing vehicular traffic through the city.

The city's roadway network has been developed primarily around a suburban grid system in which arterials are spaced approximately every mile and secondary arterials are spaced every half-mile between major arterials. Each east–west lettered avenue is one mile from the next lettered east–west avenue, and each north–south numbered avenue is one mile from the next numbered north–south avenue.

Between arterials, neighborhood local and collector streets are suburban in nature, with limited collector roads to lead traffic into arterials. Common features in neighborhoods are dead-ends, and cul-de-sacs. This design approach facilitates congestion, as arterials are the only options for moving between destinations in the community. Dead-ends and cul-de-sacs also limit connectivity for alternative modes of transportation, particularly people walking or bicycling.

The city is located approximately 60 freeway miles north of Los Angeles. Regional access to the city is provided via the Antelope Valley Freeway (State Route [SR] 14), which extends north to Kern County and south to the San Fernando Valley. Additional arterials providing regional access to the city are Palmdale Boulevard, Elizabeth Lake Road, Pearblossom Highway (SR 138), and Sierra Highway. The city's existing roadway network is illustrated in Figure 1.

April 2019

## FUNCTIONAL STREET CLASSIFICATIONS

The following section provides a description of the functional classification of the facilities within the study area. The city's roadway system consists of a wide range of transportation facilities, which serve two basic functions: mobility and land access. A circulation network is composed of facilities that emphasize mobility or access to different degrees. The following types of facilities are generically defined.

- Freeway: Mobility with very limited access.
- Expressway: Mobility with more frequent access to arterial streets than a freeway, but no direct land access.
- Arterial: Mobility with access to collectors, some local streets and major traffic.
- Collector: Connects local streets with arterials and also provides access to adjacent land uses, thus balancing mobility with access.
- Local: Provides access to adjacent land uses exclusively.

## PALMDALE ROADWAY CLASSIFICATIONS

### Regional Arterials

Regional arterials are limited access facilities that provide service to non-local through trips with minimal direct access to adjacent land uses. They have a design cross-section of eight lanes (four in each direction) with medians and turn lanes at a limited number of access points. Regional arterials are designated as 106-foot roadways, typically within a 120-foot right-of-way. At their design capacity of level of service (LOS) D, most regional arterials can carry between 49,500 and 64,000 vehicles per day. Some bike lanes currently exist within primary and regional arterials, however current City policy is to provide new bike lanes on secondary arterials only.

### Major Arterials

Major arterials are primarily intended to serve through, non-local traffic and provide limited local access. They have a cross-section of three through lanes, and a raised landscape median and turn lanes at a limited number of access points. Major arterials are designated as 84-foot roadways, within a 100-foot right-of-way. At LOS D, major arterials can accommodate between 40,000 and 44,000 vehicles per day.

### Secondary Arterials

Secondary arterials provide more local access than major arterials, while also providing a reduced level of non-local through traffic service. Secondary arterials have a cross-section of four through lanes, a bike lane in each direction and a left-turn lane within 68 feet of curb-to-curb space, within an 84-foot right-of-way. These roadways are usually undivided with the potential for limited on-street parking, turn lanes at major intersections, and partial control of vehicular and pedestrian access from driveways, cross streets, and crosswalks. Secondary arterials can accommodate between 22,000 and 24,000 vehicles per day at an acceptable level of service.

## COUNTY OF LOS ANGELES CLASSIFICATIONS

### Freeways/Expressways

The freeway is the highest level of roadway in the planning area and accommodates regional and interstate travel. Freeways typically have a minimum 180-foot cross-section and at least four through lanes (two per direction). Freeways have limited access at interchanges and have a typical design capacity of over 2,000 vehicles per hour per lane.

### Major Highways

The major highway is intended to accommodate the majority of traffic connecting between cities and communities in the region and the regional freeway system. Major highways have an ultimate design cross-section of at least four lanes (two in each direction) with medians and turn lanes at limited number of access points. The right-of-way for major highways is typically 100 feet. At their design capacity of LOS E, most major highways can carry between 49,500 and 54,000 vehicles per day. Also classified as major highways, are key inter-urban roads, non-urban access ways and recreational roads. While many of these may not be planned for urban-type improvements, the wider right-of-way is needed for other transportation uses including bus turnouts and separate bicycle and pedestrian facilities.

### Secondary Highways

The secondary highway is primarily intended to serve through traffic and collect traffic from limited secondary highways and collectors. In rural areas, secondary highways also serve as connecting highways between non-urban communities or in locations where widening a roadway to major highway width is not practical. Secondary highways normally have a cross-section of four through lanes with limited access from cross streets and driveways. Medians and turn lanes at limited locations are usually provided when adequate right-of-way (80 feet is the desired width) is developed and traffic and/or safety conditions warrant. At LOS E, secondary highways can accommodate between 40,000 and 44,000 vehicles per day.

### Limited Secondary Highways

Limited secondary highways are typically found in the foothills and mountain and canyon areas. Their primary function is to provide access to low-density settlements and recreational areas. The standard for this type of roadway is two through lanes in a 64-foot right-of-way. These roadways are undivided with possible turn lanes at major intersections, graded shoulders, and limited control of vehicular and pedestrian access from driveways, cross streets, and crosswalks. Limited secondary highways can accommodate between 22,000 and 24,000 vehicles per day at an acceptable level of service; however, they are typically low-volume roads.

## ROADWAY FACILITIES

### Regional Road Network

#### **State Route 14**

State Route 14 is a north–south state highway in southern California, approximately 116.6 miles in length. The southern portion of the highway is signed as Antelope Valley Freeway. The route connects Interstate 5 (I-5), near Santa Clarita, with U.S. Route 395, near Inyokern.

The southern part of the route is a busy commuter freeway serving and connecting the communities of Palmdale and Lancaster with the Greater Los Angeles area. The northern portion is legislatively named Aerospace Highway, as the highway serves Edwards Air Force Base. With U.S. Route 395, this road connects Los Angeles with such places as Mammoth Mountain, Mono Lake, Yosemite National Park and Reno, Nevada. Housing and population growth in Santa Clarita, Lancaster and Palmdale has made the Antelope Valley Freeway one of the most congested freeways in southern California.

#### **State Route 138**

State Route 138 (SR 138) is an east–west state highway generally following the northern foothills of the San Gabriel Mountains from its junction with I-5 south of Gorman eastward to Mount Anderson Junction, its eastern junction with State Route 18 south of Crestline in the San Bernardino Mountains. The route is approximately 105.4 miles long.

The western leg of SR 138 extends from I-5 to Gorman Post Road, Lancaster Road from Gorman Post Road to 245th Street West near Neenach School, and Avenue D from 245th Street West to SR 138's north junction with SR 14. After its co-routing with the Antelope Valley Freeway (SR 14) through Lancaster and Palmdale, it passes through the east side of Palmdale as four- to six-lane Palmdale Boulevard, 47th Street East, and Fort Tejon Road to Pearblossom Highway. The state route continues, named locally as Pearblossom Highway, as a four-lane facility to just west of 72nd Street East, where it tapers to three, then two lanes and continues easterly on Pearblossom Highway through Littlerock, Pearblossom and Llano to its junction with SR 18.

### Local Road Network

The street system is laid out on a grid. Each lettered east–west avenue is one mile from the next letter. By way of example, Avenue R is one mile north from Avenue S. In between each whole letter avenue, there are 15 sub-avenues labeled -1 through -15. Along with whole letter avenues, the -8 avenues are also major thoroughfares. Avenue R-8, for example, is a major road just like Avenue R and Avenue S. Sometimes the -8 avenues are renamed. Avenue Q-8 is renamed Palmdale Boulevard and Avenue P-8 is renamed Technology Drive.

Major streets which run north to south are numbered inside their direction, i.e., 10th Street West and 10th Street East. Each 0 and 5 street is a major thoroughfare with each 0 street being 1 mile from the previous 0 street. For example, 40th Street East is one mile east of 30th Street East. The east–west dividing line is Division Street, west of the Union Pacific/Metrolink rail corridor, which would be the equivalent of 0 Street East/West.

## Major East–West Roads

### **Avenue L**

Avenue L is unpaved from just west of 150th Street East to the arterial’s intersection with 60th Street East. Avenue L then becomes a paved two-lane road and begins its operation as a regional arterial. The asphalt is extremely degraded in some places and appears to be simply a farm road at times with no roadway striping. There is a roadway break between 40th Street East and 35th Street East, where East Avenue L picks up again as a two-lane arterial. At 5th Street East, Avenue L begins operating at two lanes in each direction and periodic sections of three lanes in both the east and west directions. East of 42nd Street West, Avenue L transitions back to one lane in each direction to its end as a paved roadway at 90th Street West.

### **Columbia Way/Avenue M**

East Avenue M transitions from a major arterial to a regional arterial and then back to a major arterial as it progresses in an east–west direction through the Palmdale area. The arterial begins as a paved roadway in the east at a right-angle intersection with 100th Street East. There is a break in pavement between 90th Street East and 70th Street East where the roadway continues as a dirt road. The portion of East Avenue M that is paved between 100th Street East and 70th Street East operates as one lane in each direction. The arterial picks up again at 50th Street East with two lanes in each direction, operating as East Avenue M/ColumbiaWay. To the west of 10th Street West, West Avenue M again transitions to one lane in each direction. The arterial terminates in the west at 75th Street West.

### **Avenue P/Rancho Vista Boulevard**

This major arterial extends from 50th Street West to 15th Street East as Rancho Vista Boulevard, and from 15th Street East to 50th Street East as East Avenue P. West of 15th Street West, Rancho Vista Boulevard is a four-lane major arterial servicing residential areas. Between 15th Street West and approximately 0.25-mile west of Division Street, at Fairway Drive, Rancho Vista Boulevard is a six-lane arterial servicing commercial and residential areas with a speed limit of 35 mph. East of Fairway Drive, Rancho Vista Boulevard continues as a four-lane arterial road servicing commercial and industrial areas including the Palmdale Regional Airport and Plant 42. Per the City’s most recent General Plan, Avenue P has a plan line dedication of 104 or 114 feet<sup>1</sup> of right-of-way allowing for six lanes with a median at build-out conditions.

There is a two-track railroad crossing of Rancho Vista Boulevard located between Sierra Highway and Eighth Street East/Lockheed Way. The crossing is approximately 50 feet east of and 1,300 feet west of the Sierra Highway and Eighth Street East intersections, respectively. The crossing is currently equipped with two curb-mounted California Public Utilities Commission (CPUC) Standard 9 (flashing light signal assembly with automatic gate arm) warning devices, two median-mounted CPUC Standard 9 (flashing light signal assembly with automatic gate arm) warning devices, railroad advanced warning signage, and pavement markings. A grade separation of the railroad crossing is currently being designed.

---

<sup>1</sup>The build-out width of the right-of-way on all local roadways is independent on whether or not the street will accommodate a bicycle lane, which will be determined in the City’s Bicycle Transportation Plan.

**Traffic Report**

**Technology Drive/East Avenue P-8**

Technology Drive/East Avenue P-8 is approximately one-half mile south of and parallel to Rancho Vista Boulevard/Avenue P. This secondary arterial has three discontinuous segments which are paved. The western-most segment is named Technology Drive from 10th Street West to Division Street, and East Avenue P-8 from east of Division Street to Sierra Highway. This segment is striped for four through lanes and a center shared left-turn lane. The middle paved portion runs between Eighth Street East and 10th Street East and has two through lanes. The eastern paved portion runs between 40th Street East and 50th Street East and also has two through lanes.

**Avenue Q**

About 0.5-mile north of Palmdale Boulevard, Avenue Q runs parallel to Palmdale Boulevard. Avenue Q is designated as a major and secondary arterial street but is discontinuous. It runs from just west of Trade Center Drive to just east of 40th Street East. West of SR 14, West Avenue Q is a major arterial street from Trade Center Drive to Fifth Street West, servicing a light industrial area. Between Fifth Street West and SR 14, West Avenue Q is a secondary arterial street servicing the Antelope Valley Auto Center. From SR 14 to Third Street East, West/East Avenue Q is again a major arterial street servicing mainly single-family residential land uses.

To the east of the Union Pacific and Metrolink railroad tracks, East Avenue Q begins again as a major arterial at Sierra Highway. East of 15th Street East until East Avenue Q ends just east of 40th Street East, East Avenue Q continues as a major arterial. Per the City's existing General Plan, Avenue Q has a plan line dedication of 104 or 114 feet of right-of-way allowing for six lanes with a median at build-out conditions.

The City of Palmdale aspires to grade separate Avenue Q with the Union Pacific, Metrolink, and future high-speed railroad tracks, thereby connecting the east and westerly segments of this arterial street.

**Palmdale Boulevard/SR 138**

West of SR 14, West Palmdale Boulevard is a four-lane regional arterial from 10th Street West to the SR 14 southbound ramp terminal intersection. Just east of SR 14, Palmdale Boulevard is a state-owned route, signed as SR 138, running east to 47th Street East. From SR 14, traveling east to 25th Street East, the facility serves a highly concentrated general commercial area. Per the City's General Plan, West Palmdale Boulevard between Elizabeth Lake Road and Division Street has a plan line dedication of 126 or 136 feet of right-of-way allowing for eight lanes with a median at build-out conditions. East Palmdale Boulevard between Division Street and 120th Street East has a plan line dedication of 104 or 114 feet of right-of-way allowing for six lanes with a median at build-out conditions. A design effort is currently underway to widen Palmdale Boulevard to six lanes between Fifth Street East and 10th Street East.

**East Avenue R/Rayburn Road**

East Avenue R/Rayburn Road is approximately one-half mile south of Palmdale Boulevard. West of Division Street, the roadway is known as Rayburn Road and East Avenue R east of Division Street. Rayburn Road is a two-lane facility. East of Division Street, East Avenue R is a two-lane arterial with a center turning lane. From Sixth Street East to 47th Street East, East Avenue R is a four-lane arterial except for the portion between 35th Street East and 40th Street East, where the eastbound direction narrows to one lane. Per the City's existing General Plan, Rayburn Road/East Avenue R between Tierra

**Traffic Report**

Subida Avenue and 90th Street East has a plan line dedication of 104 or 114 feet of right-of-way allowing for six lanes with a median at build-out conditions.

The City and Caltrans are currently pursuing a safety project along a two-mile long segment of Avenue R between Sierra Highway and 25th Street East. The project will add a dedicated bike lane, a left-turn lane midblock, and continuous pavement and intersection sidewalk ramps that are compliant with the Americans with Disabilities Act (ADA) guidelines.

**Avenue S**

Avenue S is approximately one mile south of Avenue R/Rayburn Road. It is designated as a major arterial as it runs about 1.75 miles west of SR 14 to about 3,800 feet east of 47th Street East. Avenue S is a four-lane road with combinations of medians and left-turn lanes. East Avenue S has a full diamond interchange with SR 14. Per the City's existing General Plan, Avenue S between City Ranch Road/Ranch Center Drive and Bridge Road has a plan line dedication of 104 or 114 feet of right-of-way, allowing for six lanes with a median at build-out conditions; a plan line dedication of 126 to 136 feet of right-of-way between Bridge Road and 35th Street East allowing for eight lanes at build-out conditions; and a plan line dedication of 104 or 114 feet of right-of-way between 35th Street East and 70th Street East allowing for six lanes at build-out conditions.

**Major North–South Roads**

**10th Street West**

Running parallel to SR 14, 10th Street West is an arterial road that runs from the city of Lancaster to Palmdale Boulevard, continuing south where it changes names to become Tierra Subida Avenue. South of SR 14 to Technology Drive, 10th Street West continues as a regional arterial. South of Technology Drive, until it becomes Tierra Subida Avenue at Palmdale Boulevard, 10th Street West is a major arterial road. Per the City's existing General Plan, 10th Street West between West Avenue M and West Palmdale Boulevard has a plan line dedication of 126 or 136 feet of right-of-way allowing for eight lanes with a median at build-out conditions.

A design effort is currently underway to widen 10th Street West south of SR 14 to Palmdale Boulevard.

**Division Street**

Division Street is a north–south, two-lane arterial that runs from just north of Avenue O to East Avenue R-8. The road is located between Sierra Highway and SR 14 and is discontinuous between Rancho Vista Boulevard and Technology Drive/East Avenue P-8. From Technology Drive/East Avenue P-8 to just north of East Avenue P-12, Division Street is not paved. As mentioned previously, Division Street is the dividing line between east and west naming of streets. Per the City's existing General Plan, Division Street between Avenue M and Avenue R-8 has a plan line dedication of 104 or 114 feet of right-of-way allowing for six lanes with a median at build-out conditions.

**Fifth Street East**

Fifth Street East is a north–south running arterial west of the Union Pacific/Metrolink rail corridor. The road runs between East Avenue S and East Avenue Q and has two through lanes. Per the City's General Plan, Fifth Street East between East Avenue Q and Palmdale Avenue has a plan line dedication of 84 or 92 feet of right-of-way allowing for four lanes without a median, and a plan line dedication of 84 or

**Traffic Report**

92 feet of right-of-way between Palmdale Boulevard and East Avenue S allowing for four lanes with a median at build-out conditions.

**Sierra Highway**

Just west of 10th Street East, Sierra Highway is a four-lane regional arterial running in a northwest to southeast direction. From Rancho Vista Boulevard to Pearblossom Highway, Sierra Highway is a four-lane major arterial. Sierra Highway services residential, commercial, and industrial areas. Per the City's existing General Plan, Sierra Highway between East Avenue M and East Avenue P has a plan line dedication of 126 or 136 feet of right-of-way allowing for eight lanes with a median at build-out conditions, and between East Avenue P and Pearblossom Highway has a plan line dedication of 104 or 114 feet of right-of-way allowing for 6 lanes with a median at build-out conditions. A design effort is currently underway to widen Sierra Highway to six lanes between East Avenue Q and East Avenue R.

**10th Street East**

One mile west of 20th Street East, 10th Street East is a major two-lane arterial street running in a north-south direction. From the Lockheed Martin facility north of East Avenue P to East Avenue Q, the road services commercial and industrial areas. At East Avenue Q, 10th Street East widens to a four-lane major arterial continuing to Palmdale Boulevard. Per the City's existing General Plan, 10th Street East between East Avenue L and Palmdale Boulevard has a plan line dedication of 104 or 114 feet of right-of-way allowing for six lanes with a median at build-out conditions, and between Palmdale Boulevard and East Avenue S has a plan line dedication of 84 or 92 feet of right-of-way allowing for four lanes with a median at build-out conditions.

**15th Street East**

Fifteenth Street East is a north-south running arterial that is 0.5 mile east of 10th Street East. This road reaches between Lockheed Way and East Avenue R and has two through lanes. Per the City's General Plan, 15th Street East between East Avenue L and East Avenue P has a plan line dedication of 84 or 92 feet of right-of-way allowing for 4 lanes with a median; the section between Avenue P and Avenue P-8 has a plan line dedication of 104 or 114 feet of right-of-way allowing for four lanes with a median at build-out conditions.

**20th Street East**

Twentieth Street East is a north-south running arterial located one-half mile east of 15th Street East. This road runs from East Avenue P on the north to East Avenue S on the south. Between East Avenue P and Palmdale Boulevard, 20th Street East is two lanes wide and serves some commercial development, but mainly residential land uses. At Palmdale Boulevard, 20th Street East widens to a four-lane secondary arterial road, servicing residential areas. Per the City's existing General Plan, 20th Street East between East Avenue L and East Avenue M has a plan line dedication of 104 or 114 feet of right-of-way allowing for six lanes with a median; and between East Avenue P and East Avenue S has a plan line dedication of 84 or 92 feet of right-of-way allowing for four lanes with a median at build-out conditions. The planned High Desert Corridor freeway would have a local service interchange with 20th Street East.

**25th Street East**

One-half mile to the east of 20th Street East is 25th Street East, a major arterial which runs from East Avenue P to south of Pearblossom Highway. Like 30th Street, 25th Street is a two-lane road north of Palmdale Boulevard. South of Palmdale Boulevard, it is a four-lane road until Pearblossom Highway,

**Traffic Report**

where it narrows to a two-lane road. Per the City's General Plan, 25th Street East between East Avenue L and East Avenue M has a plan line dedication of 84 or 92 feet of right-of-way allowing for four lanes with a median; and between East Avenue P and Pearblossom Highway/Barrel Springs Road has a 104- or 114-foot right-of-way allowing for six lanes with a median at build-out conditions.

**30th Street East**

Running parallel to 25th Street East, one-half mile to the east, is 30th Street East. Thirtieth Street East is a two-lane major arterial road which runs from just north of East Avenue P to just south of East Avenue S. At Palmdale Boulevard, 30th Street East widens to four lanes. Per the City's existing General Plan, 30th Street East has a plan line dedication of 104 or 114 feet of right-of-way allowing for six lanes with a median at build-out conditions. The planned High Desert Corridor freeway would have a local service interchange with 30th Street East.

**40th Street East**

Fortieth Street East is one mile east of 30th Street East. Between East Avenue N, two miles north of East Avenue P, and East Avenue P, 40th Street East is a two-lane secondary arterial road. From East Avenue P to East Avenue R-8, 2.5 miles to the south, 40th Street is a major arterial. South of East Avenue R-8 to Pearblossom Highway, 40th Street East continues as a major arterial which serves residential areas. Per the City's existing General Plan, 40th Street East between East Avenue L and East Avenue P has a plan line dedication of 84 or 92 feet of right-of-way allowing for four lanes with a median, and between East Avenue P and East Avenue S has a dedicated 104- or 114-foot right-of-way allowing for six lanes with a median at build-out conditions.

**50th Street East/47th Street East**

Approximately six miles to the east of SR 14, 50th Street East runs in a north-south direction, parallel with the SR 14 freeway. Fiftieth Street East is a two-lane expressway that services mainly unincorporated areas of Palmdale. Per the City's existing General Plan, 50th Street East/47th Street East between East Avenue L and East Avenue S-8 has a plan line dedication of 126 or 136 feet of right-of-way allowing for eight lanes with a median at build-out conditions. The planned High Desert Corridor freeway would have a local service interchange with 50th Street East.

**70th Street East**

Seventieth Street East runs primarily in a north-south direction from its origin at East Avenue D in the north to its terminus operating as a paved roadway. As the secondary arterial makes a 90-degree turn to the west and becomes East Avenue

S. Seventieth Street East continues southward as an unpaved road to the Union Pacific (Colton-Palmdale Cutoff) railroad tracks. The unpaved roadway begins again to the south of East Avenue T and continues to the south past the quarry until its terminus at SR 138. The majority of this roadway operates as one lane in each direction.

**90th Street East/87th Street East**

Ninetieth Street East begins as a paved major arterial approximately one mile north of East Avenue E in Lancaster. In Littlerock, near Avenue S, 90th Street East makes a jog to the west and becomes 87th Street east, operating as a secondary arterial until its terminus at Mt. Emma Road. The arterial operates in a north-south direction primarily as one lane in each direction.

## Methodology

The Southern California Association of Governments (SCAG) region encompasses six counties (Imperial, Los Angeles, Orange, Riverside, San Bernardino, and Ventura) and 191 cities in an area covering more than 38,000 square miles. The agency develops long-range regional transportation plans including sustainable community strategies and growth forecast components, regional transportation improvement programs, and regional housing needs allocations. Palmdale, California is located within the SCAG region.

The SCAG region utilizes the SCAG 2016 Regional Transportation Plan/Sustainable Communities Strategy (RTP/SCS) Travel Demand Model (SCAG model) to produce forecasts for the region. The SCAG model used for the Palmdale General Plan Update (Palmdale GP) is consistent with the RTP assumptions for existing year and future year conditions as all projects in the RTP are included. The 2040 future year model datasets were used to produce the future conditions for the Palmdale GP scenarios. The external-to-internal (XI) and internal-to-external (IX) trips forecast by the SCAG model are terminated at the external zones known as gateways. For Palmdale, the nearest gateway is State Route (SR) 14 at the Kern County line. These external trips with one end in the SCAG region are fixed for each horizon year and do not vary with changes in socioeconomic data. The SCAG model roadway classifications are consistent with the Federal Highway Administration (FHWA) roadway classifications, which are more detailed and do not necessarily align with the City of Palmdale classifications, but are generally similar in nature. The main roadway classifications for the SCAG model are listed below, where each of these roadway types are further sub-divided.

- Freeways
- HOV and express lanes
- Expressways/parkways
- Principal arterials
- Minor arterials
- Major collectors
- Minor collectors
- Ramps
- Centroid connectors

The SCAG traffic analysis zone (TAZ) system was refined for the Palmdale sphere of influence (SOI) only to perform traffic assignments after the original SCAG model was run through the four steps of the complete model with the updated land use datasets for each of the scenarios. The SCAG model had 45 zones in the Tier 1 zone system within the Palmdale SOI. This zone system within the Palmdale SOI was disaggregated to the Tier 3 zone system with 336 zones as illustrated in Figure 2. The expanded zone system in the Palmdale SOI was used for traffic assignment purposes to better reflect the ground conditions in the study area because the original SCAG Tier 1 zones were too large. The SCAG model networks for existing and future conditions were updated with the revised zone system to perform traffic assignments. The SCAG model datasets were available for horizon year 2040 but not beyond; hence, the 2040 datasets were used for the 2045 Palmdale GP scenarios with updated land use within the Palmdale SOI.

Traffic Report

Various land use scenarios were developed as part of the General Plan Update for the City of Palmdale, after which the SCAG model results were tabulated for the Palmdale SOI that encompasses Palmdale. The 45 zones in the Tier 1 zone system of the SCAG model were identified as the Palmdale SOI. The geographic area covered by the Palmdale SOI includes Palmdale and the surrounding areas as illustrated in Figure 3.

Figure 2: Palmdale Traffic Analysis Zones

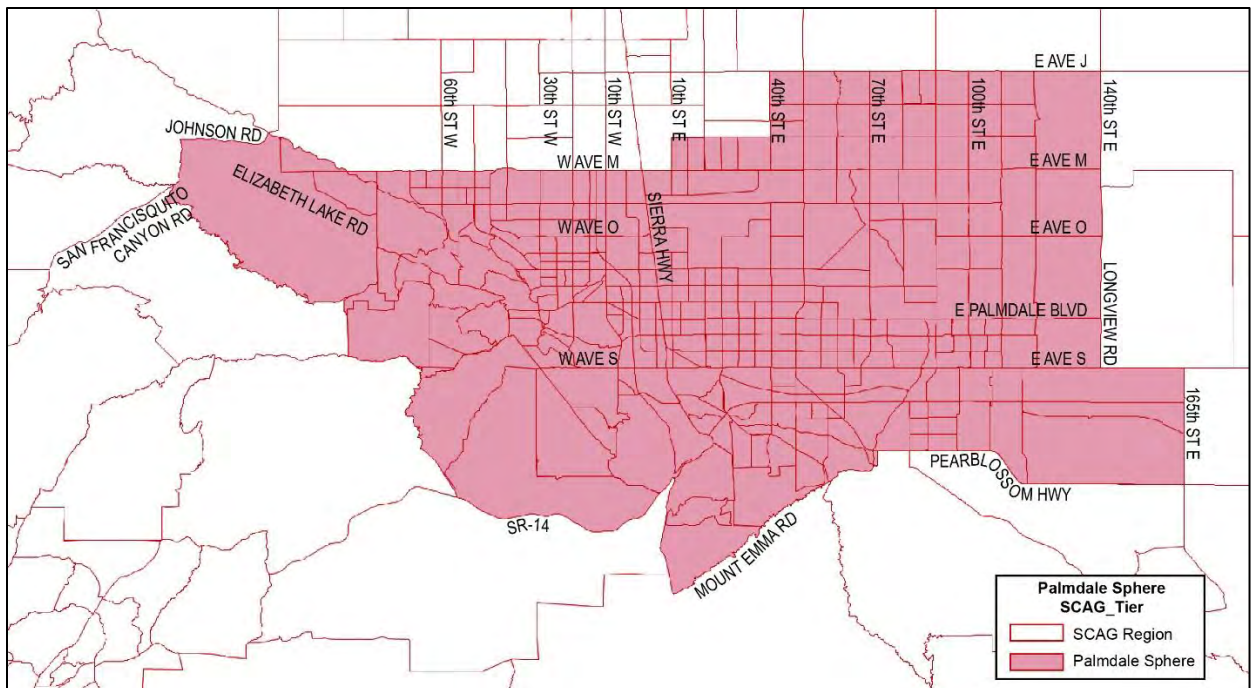

Figure 3: Palmdale Sphere of Influence

**Traffic Report**

The SCAG model comprises the entire SCAG region, which includes the counties of San Bernardino, Los Angeles, Ventura, Orange, Riverside, and Imperial. The Palmdale sphere of influence (SOI) is a very small part of the SCAG region, as shown in Table 1. The contribution of Palmdale SOI to the 2045 Base scenario for the region is 1.09 percent for population, 0.98 percent for households and 0.68 percent for employment. As such, it can be assumed that land use changes in the Palmdale SOI would have very little effect on the region.

**Table 1: Percentage of the Palmdale Sphere of Influence in the SCAG Region**

District Name	2017 Existing			2045 Base		
	Population	Households	Employment	Population	Households	Employment
Palmdale SOI	188,488	53,626	49,501	240,515	72,840	67,085
Remainder of SCAG region	18,797,418	6,156,694	8,064,233	21,883,490	7,334,073	9,804,345
Total	18,985,906	6,210,320	8,113,734	22,124,005	7,406,913	9,871,430
<b>Percent Share for Palmdale</b>	<b>0.99%</b>	<b>0.86%</b>	<b>0.61%</b>	<b>1.09%</b>	<b>0.98%</b>	<b>0.68%</b>

Most Palmdale trips primarily stay within Los Angeles County, with a small number traveling to nearby San Bernardino, Ventura, and Riverside counties. With the update of the socio-economic data for the Palmdale General Plan, the intent is to make Palmdale less of an exporter of trips, making it more self-sustainable, whereby more trips stay in Palmdale than leave Palmdale. As such, the socio-economic data outside the Palmdale SOI would have much less of an impact. The cities and entities across the SCAG region are developing future land use based on having both employment and population growth, leading to more trips staying within their jurisdiction to the extent possible. Applying standard growth rates across the region would not be possible because different cities have different assumptions for future growth. As such, the current land use data in the SCAG region would be more conservative and the growth is unlikely to be very different in the 5-year period. Like Palmdale, which strives to be less of an exporter of trips to other areas, primarily in Los Angeles County, other cities/agencies may also seek to reduce the exporting of trips. This would lead to the reduction of vehicle miles traveled (VMT) as required by the new SB 743 guidelines.

The SCAG model currently has the last horizon year as 2040, with a calibration year of 2012, and will be used for the SCAG region outside of the Palmdale SOI limits. It is always best to maintain consistency with the regional model to the extent possible. In addition, there is no basis for altering the land use for rest of the region which comprises 99 percent of the population.

The SCAG model was run for the following scenarios with updated land use within the Palmdale SOI:

- 2017 Existing:** The Palmdale SOI land use was updated based on input from the City, the four-step SCAG model procedures were run completely, and the trip tables were expanded to the Tier 3 zone system before performing the traffic assignments. The highway network assumptions are consistent with the SCAG regional assumptions.
- 2045 Base:** The Palmdale SOI land use was updated based on input from the City, the four-step SCAG model procedures were run completely, and the trip tables were expanded to the Tier 3 zone system before performing the traffic assignments. The highway network assumptions are consistent with the SCAG regional assumptions.

**Traffic Report**

- 2045 Base with High Desert Corridor Freeway (HDC):** The highway network was updated to include a proposed facility beginning at SR 14 and joining SR138/SR18 east of Longview Road. Traffic assignments were performed utilizing 2045 Base scenario trip tables. This scenario was run to illustrate the effects of the HDC facility on the Palmdale street system because the proposed HDC facility would be a major east–west freeway connecting Palmdale and Victorville. The HDC may not be built before 2050 or beyond as no funding sources are identified.
- 2045 Preferred Plan:** The Palmdale SOI land use was updated based on the 2045 Preferred Plan scenario assumptions. The four-step SCAG model procedures were run completely, and the trip tables were expanded to the Tier 3 zone system before performing the traffic assignments. This scenario also included the addition of High-Speed Rail (HSR) trips at the Palmdale Station prior to performing the traffic assignments. The highway network assumptions are consistent with the SCAG regional assumptions. In addition, the network was updated based on review and recommendations by the City of Palmdale.

Table 2 summarizes population, households and employment land use for the scenarios in the Palmdale SOI. The detailed land use by traffic analysis zones (TAZ) for the Palmdale SOI is provided in Appendix A.

**Table 2: Palmdale Sphere of Influence Land Use Comparisons**

	<b>2017 Existing</b>	<b>2045 Base</b>	<b>2045 Preferred Plan</b>
Populations	188,488	240,515	225,692
Households	53,626	72,840	70,618
Employment	49,501	67,085	74,804

The analysis for each of the scenarios include the following within the Palmdale sphere of influence (SOI):

- Daily segment level of service for selected locations.
- Post-processed daily volumes for selected segments.
- Measures of effectiveness (MOEs) metrics, i.e., vehicle miles travelled (VMT), vehicle hours travelled (VHT), vehicle hours of delay (VHD) and congested speeds, will be reported from traffic assignments for the Palmdale SOI on the transportation network performance.
- Select zone will create a subset of the trip table with Palmdale SOI trips only, which in turn will be used to produce trip lengths, VMT and VHT by district (aggregations of TAZs). In addition, the assignment procedures will also produce the VMT and VHT on all links as part of the assignment process and is known as link-based. The results of the link-based and zone-based procedures will be similar, but not equal, as two different procedures are employed.
- Vehicle miles travelled analysis for SB 743 compliance, where SB 743 eliminates level of service (LOS) as the basis for determining significant transportation impacts under CEQA and provides a new performance metric—VMT. The zone-based VMT procedures will be used for these computations. Home-based work and home-based all trips will also be used to compute VMT and other statistics.
- Average trip lengths will be reported for trip origins.
- VMT per capita will be reported by trip purpose for trip origins.

## Existing Conditions

The network assumptions in the SCAG model used for the 2017 existing conditions scenario are consistent with the SCAG 2017 forecast year assumptions. The socio-economic data for the Palmdale SOI was updated with inputs from the City of Palmdale. The socio-economic data outside the Palmdale SOI is consistent with the SCAG assumptions for the region. The SCAG four-step model procedures were run with the updated land use covering the Palmdale SOI. Table 3 below lists the planning variable assumptions for the SCAG region.

**Table 3: 2017 Existing Socio-Economic Data**

2017 Existing	Population	Households	Employment
Palmdale sphere	188,488	53,626	49,501
Lancaster sphere	176,422	55,712	51,676
High Desert region	39,685	15,711	3,952
Ventura County	213,907	63,350	69,515
Los Angeles County remainder	9,759,145	3,275,180	4,411,709
Orange County	3,200,193	1,045,270	1,666,324
Riverside County	2,391,954	761,979	761,653
San Bernardino County	2,148,780	660,273	740,722
Imperial County	867,332	279,219	358,682

<b>Total Region</b>	<b>18,985,906</b>	<b>6,210,320</b>	<b>8,113,734</b>

Select zone traffic assignment procedures were performed on the zones within the Palmdale SOI to produce trips that were generated or attracted to the Palmdale SOI area only. All other trips were not counted as they were pass through trips. The daily average trip lengths for the Palmdale SOI only trips are shown in Table 4. The daily link-based VMT, vehicle hours traveled and the average speeds by facility types are shown in Table 5 for the Palmdale SOI only trips. The daily percent share of VMT for trips originating in the Palmdale SOI to all areas in the region, including Palmdale, is illustrated in Figure 4.

**Table 4: 2017 Existing Average Trip Length for Palmdale SOI Trips**

From/To	Trip Length (II and IX*) (miles)	Percent Share of Trips
Palmdale sphere	4.25	70.2%
Lancaster sphere	9.83	15.6%
High Desert region	15.46	2.9%
Imperial County	223.37	0.0%
Los Angeles County	55.62	7.8%
Orange County	105.28	0.4%
Riverside County	97.28	0.4%
San Bernardino County	62.41	1.2%
Ventura County	75.29	0.5%
Externals	60.99	0.9%
Seaport/airport	60.05	0.2%
<b>Weighted Average</b>	<b>11.87</b>	<b>100.0%</b>

\*II = Internal-to-internal trips, where both ends of the trips are within the Palmdale SOI

IX = Internal-to-external trips, where the origin of the trips is within the Palmdale SOI and the destination of the trips could be anywhere in the SCAG region.

\*II = Internal-to-internal trips, where both ends of the trips are within the Palmdale SOI

IX = Internal-to-external trips, where the origin of the trips is within the Palmdale SOI and the destination of the trips could be anywhere in the SCAG region

XI = External-to-internal trips, where the origin of the trips could be anywhere in the SCAG region and the destination of the trips is within the Palmdale SOI

**Figure 4: 2017 Existing Daily VMT Share Originating in the Palmdale SOI**

**Traffic Report**

Traffic assignments were performed to produce traffic volumes on the facilities inside and outside the Palmdale SOI. Traffic assignments are available for AM peak period, mid-day period, PM peak period, evening period, night period and daily. The daily traffic assignment volumes (band widths) are illustrated in Figure 5 (Figure 5b excludes SR 14).

**Figure 5: 2017 Existing Daily Assigned Traffic Volumes**

**b. 2017 Existing Daily Assigned Traffic Volumes without SR 14**

## LEVEL OF SERVICE DEFINITIONS AND STANDARDS

Assessment of the volume and level of operation of selected corridors in the region is conducted biennially through the County’s Congestion Management Program (CMP) process. In addition, other traffic volume data is collected by local agencies during other planning exercises and traffic studies conducted for development projects.

By statute, each CMP must include a performance element containing measures that evaluate current and future multimodal system performance for the movement of goods and people. The level of service indicators for the highway and roadway system is based on the volume of traffic for designated sections of roadway during a typical day and the practical vehicular capacity of that segment. These two measures for each monitored segment of the roadway system are expressed as a ratio. The volume-to-capacity ratio (V/C) is then converted to an alpha descriptor identifying operating conditions and expressed as a level of service, LOS A through LOS F. Level of service A identifies the best operating conditions along a section of roadway and is characterized by free-flow traffic, low volumes, and little or no restrictions on maneuverability. Level of service F characterizes forced traffic flow with high traffic densities, slow travel speeds, and often stop-and-go conditions. Level of service standards in the county can be set no lower than LOS E or no lower than the current level of service and V/C ratio if the level of service is already below LOS E. City of Palmdale has established LOS D as its criterion for an acceptable level of service.

Table 6, Level of Service Criteria, defines and describes the level of service criteria for roadway segments. Table 7 reports the model daily assignment volumes compared to the existing counts and the level of service at various segments. Table 7 also identifies the level of service for arterial roadway segments based on these criteria. In some locations, differences in model results are to be expected. All future volumes are post-processed to reflect sensitivity to model/count differences.

**Table 6: Level of Service Criteria**

Level of Service	Interpretation	Volume-to-Capacity Ratio
A	Free-flow speeds prevail. Vehicles are almost unimpeded in their ability to maneuver within the traffic stream.	0.00–0.60
B	Reasonably free-flow speeds are maintained. The ability to maneuver within traffic is only slightly restricted.	0.61–0.70
C	Flow with speeds at or near free-flow speed of the roadway. Freedom to maneuver within the traffic stream is noticeably restricted and lane changes require more care and vigilance on the part of the driver.	0.71–0.80
D	Speeds begin to decline slightly with increasing flows. In this range, density begins to increase somewhat more quickly with increasing flow. Freedom to maneuver within the traffic stream is noticeably limited.	0.81–0.90
E	Operation at capacity with no usable gaps in the traffic stream. Any disruption to the traffic stream has little or no room to dissipate.	0.91–1.0
F	Breakdown of the traffic flow with long queues of traffic. Unacceptable conditions.	> 1.0

**SUMMARY**

Daily trips are defined as having an origin, destination or both within the Palmdale SOI and do not include pass-through trips. The Palmdale trips generate a VMT of 8,028,726 and a VHT of 272,454 on all the roadway way facilities within the SCAG region. The Palmdale SOI only accounts for 25.1 percent of the total VMT generated, Lancaster accounts for 12.9 percent, High Desert region accounts for 3.8 percent, rest of Los Angeles County accounts for 36.4 percent.

The average trip length for trips originating and staying within the Palmdale SOI is 4.25 miles. This constitutes 70.2 percent of all the Palmdale trips. The average trip length for trips originating in Palmdale SOI and having a destination anywhere in the SCAG region including itself is 11.87 miles.

Based on the 2017 existing counts, the daily segment-based LOS results show the number of segments operating at LOS E is two and LOS F is three and accounts for 1.8 percent and 2.7 percent, respectively, of all the segments analyzed. For the 2017 existing model, the daily segment-based LOS results show the number of segments operating at LOS E is five and LOS F is five and accounts for 4.4 percent and 4.4 percent, respectively, of all the segments analyzed.

The Palmdale transportation network as a “system,” which includes all roadway facilities within the Palmdale SOI, generates 4,275,533 VMT, 100,085 VHT and 6,783 VHD daily. This accounts for all trips, including pass through trips, using the highway network within the Palmdale SOI.

## Future Conditions

### ROADWAY IMPROVEMENTS

The future highway network is consistent with the SCAG model assumptions for the forecast year 2040, which is the farthest out horizon year available with the SCAG regional model. The 2040 horizon year is the basis for the future year 2045 forecasts for the Palmdale General Plan scenarios, with several roadway improvements additionally assumed for the 2045 horizon year. These include (noting some of them may have already been upgraded):

- Avenue P/Rancho Vista Boulevard
  - Three lanes per direction between west of 30th Street West and Division Street
  - Two lanes per direction between Division Street and 20th Street East
  - One lane per direction between 20th Street East and 50th Street East.
- Technology Drive/East Avenue P8
  - Two lanes per direction between Sierra Highway and 20th Street East.
- East Avenue R
  - Two lanes per direction between Sierra Highway and 70th Street East.
- East Avenue S
  - Three lanes per direction between 30th Street and 47th Street East.
- East Avenue Q
  - Connection between 6th Street and Sierra Highway to facilitate better access to the proposed Palmdale High-Speed Rail Station

The 2045 Preferred Plan also included the Palmdale High-Speed Rail Station boardings, which are integrated into the traffic assignment procedures. Daily boarding for the 2045 scenarios are reported to be 5,600 riders one way, per the Transportation Technical Report published by the California High-Speed Rail Authority Palmdale to Burbank Project Section and dated March 2019.

Following a review by the City of Palmdale, the 2045 Preferred Plan scenario highway network was updated based on their recommendations.

Figure 6 illustrates the future roadway network in Palmdale, including a general alignment for the proposed High Desert Corridor freeway.

**Figure 6. Future Roadway Network**

## 2045 BASE

The 2045 Base scenario used the SCAG model forecast year 2040 dataset, and the network assumptions are consistent with the RTP assumptions. The 2045 socio-economic data for the Palmdale SOI was updated with inputs from the City of Palmdale. The socio-economic data outside the Palmdale SOI is consistent with the SCAG assumptions for the region for the year 2040. The SCAG four-step model procedures were run with the updated land use in the Palmdale SOI. The Table 9 lists the planning variable assumptions for the region.

**Table 9: 2045 Base Socio-Economic Forecast**

	Population	Households	Employment
Palmdale sphere	240,515	72,840	67,085
Lancaster sphere	218,843	69,963	59,678
High Desert region	40,845	14,409	5,030
Ventura County	282,025	92,482	101,050
Los Angeles County remainder	11,001,144	3,783,739	5,117,195
Orange County	3,460,381	1,152,340	1,898,952
Riverside County	3,183,378	1,054,557	1,174,500
San Bernardino County	2,731,308	854,360	1,028,132
Imperial County	965,566	312,223	419,808
Externals	0	0	0
Seaport/airport	0	0	0
<b>Total Region</b>	<b>22,124,005</b>	<b>7,406,913</b>	<b>9,871,430</b>

Select zone traffic assignment procedures were performed on the zones within the Palmdale SOI to account for trips that were generated or attracted to Palmdale SOI only. All other trips were not counted as they were pass through trips. The daily average trip lengths for the Palmdale only trips to different locations are shown in Table 10. The daily link-based VMT, VHT and the average speeds by facility types are shown in Table 11 for the Palmdale only trips. The daily percent share of VMT for trips originating in the Palmdale SOI to all areas in the region, including Palmdale, is illustrated in Figure 7.

**Table 10: 2045 Base Average Trip Length for Palmdale Sphere of Influence Trips**

From/To	Trip Length (II and IX*) (miles)	Percent Share of Trips
Palmdale sphere	4.43	71.7%
Lancaster sphere	9.46	15.4%
High Desert region	15.52	2.5%
Imperial County	228.35	0.0%
Los Angeles County	55.68	6.8%
Orange County	108.62	0.4%
Riverside County	110.91	0.3%
San Bernardino County	68.66	1.3%
Ventura County	75.65	0.4%
Externals	68.69	1.0%
Seaport/airport	38.89	0.3%
<b>Weighted Average</b>	<b>11.56</b>	<b>100.0%</b>

\*II = Internal-to-internal trips, where both ends of the trips are within the Palmdale SOI

IX = Internal-to-external trips, where the origin of the trips is within the Palmdale SOI and the destination of the trips could be anywhere in the SCAG region.

**Table 11: 2045 Base Palmdale Sphere of Influence (II, IX and XI\*) Daily, VMT, VHT, Average Speed by Facility**

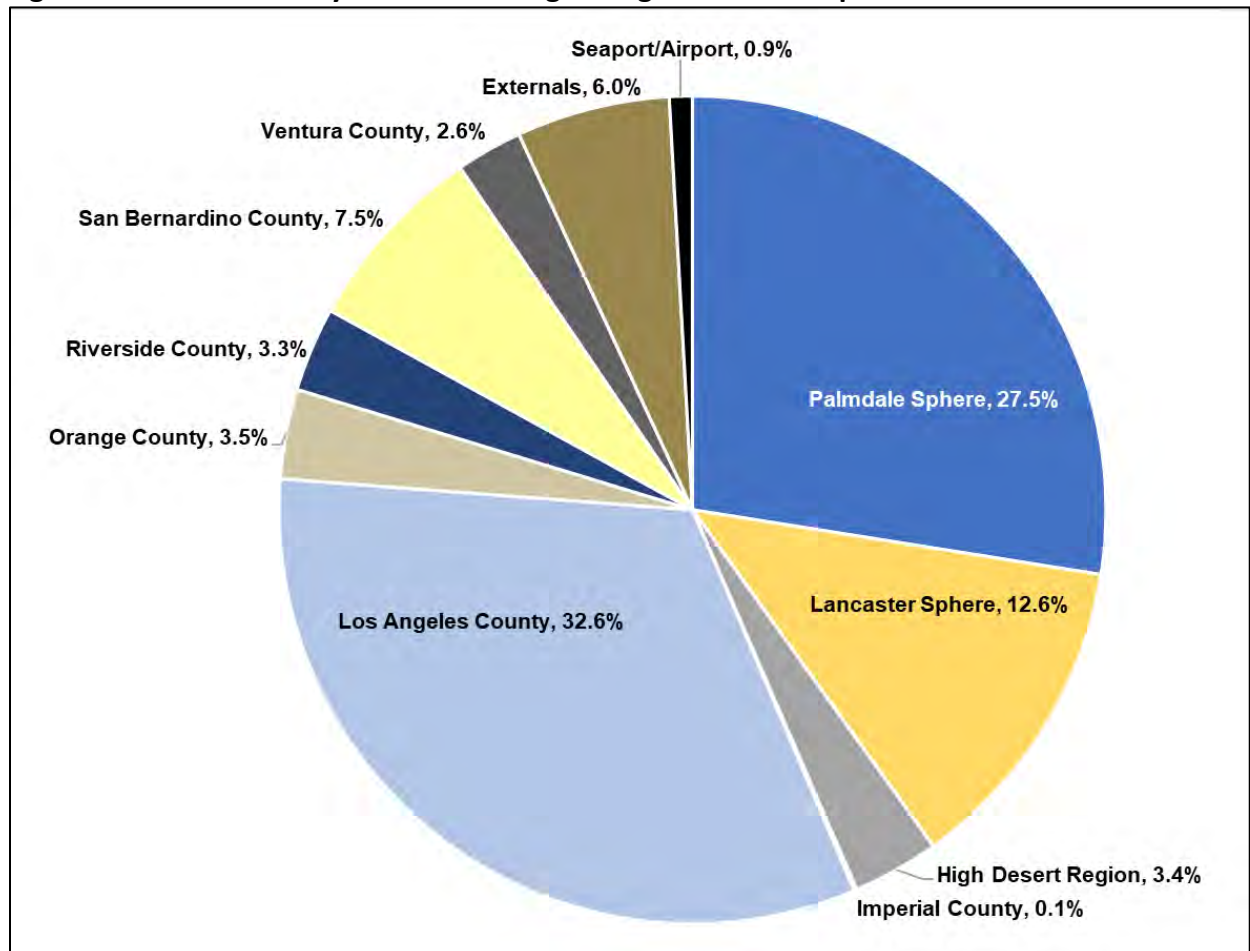

Facility	VMT	VHT	Average Speed (mph)
Freeways	2,945,756	129,261	44.7

Centroid connectors	520,432	20,729	24.4
Total without centroid connectors	8,341,835	317,535	35.2
<b>Total of All Links</b>	<b>8,862,268</b>	<b>338,264</b>	<b>34.2</b>

\*II = Internal-to-internal trips, where both ends of the trips are within the Palmdale SOI

IX = Internal-to-external trips, where the origin of the trips is within the Palmdale SOI and the destination of the trips could be anywhere in the SCAG region

XI = External-to-internal trips, where the origin of the trips could be anywhere in the SCAG region and the destination of the trips is within the Palmdale SOI

**Figure 7: 2045 Base Daily VMT Share Originating in Palmdale Sphere of Influence**

**Traffic Report**

Traffic assignments were performed to produce traffic volumes on the facilities inside and outside the Palmdale SOI. Traffic assignments are available for AM peak period, mid-day period, PM peak period, evening period, night period and daily. The daily traffic assignment volumes (bandwidths) are shown in Figure 8. The post-processed daily assignment volumes and the LOS at various segments are shown in the Table 12.

**Summary**

Daily trips are defined as having an origin, destination or both within the Palmdale SOI and do not include pass-through trips. The Palmdale trips generate a VMT of 8,862,268 and a VHT of 338,264 on all the roadway way facilities within the SCAG region. The Palmdale SOI only accounts for 27.5 percent of the total VMT generated, Lancaster accounts for 12.6 percent, High Desert region accounts for 3.4 percent, while the rest of Los Angeles County accounts for 32.6 percent.

The average trip length for trips originating and staying within the Palmdale SOI is 4.43 miles and this constitutes 71.7 percent of all the Palmdale trips. The average trip length for trips originating in Palmdale SOI and having a destination anywhere in the SCAG region including itself is 11.56 miles.

Daily segment-based LOS results show the number of segments operating at LOS E is eleven and LOS F is seven and accounts for 9.7 percent and 6.2 percent, respectively, of all the segments analyzed.

The Palmdale transportation network as a system, which includes all roadway facilities within the Palmdale SOI, generates 5,029,773 VMT, 123,190 VHT and 12,590 VHD daily. This accounts for all trips, including pass through trips, using the highway network within the Palmdale SOI.

## 2045 BASE WITH HIGH DESERT CORRIDOR FREEWAY

The 2045 base with High Desert Corridor freeway used the 2045 Base year dataset and the network assumptions are consistent with the RTP except for the HDC facility. The 2045 socio-economic data for the Palmdale SOI was updated with inputs from the City of Palmdale. The socio-economic data outside the Palmdale SOI is consistent with the SCAG assumptions for the region for the year 2040. The High Desert Corridor Freeway was coded from SR 14 to SR 138. The 2045 Base scenario trip tables were used to perform traffic assignments only. Table 14 reports the land use assumptions for the region. This scenario was performed to illustrate the effects of the HDC on the Palmdale street system as the HDC would be major east–west freeway connecting Palmdale and Victorville. The HDC may not be built before 2050 or beyond as no funding sources are identified.

Select zone traffic assignment procedures were performed on the zones within the Palmdale SOI to account for trips that were generated or attracted to Palmdale SOI only. All other trips were not counted as they were pass through trips.

**Table 14: 2045 Base with High Desert Corridor Freeway Socio-Economic Forecast**

	Population	Households	Employment
Palmdale sphere	240,515	72,840	67,085

<b>Total of All Links</b>	<b>8,868,517</b>	<b>335,877</b>	<b>34.2</b>

\*II = Internal-to-internal trips, where both ends of the trips are within the Palmdale SOI

IX = Internal-to-external trips, where the origin of the trips is within the Palmdale SOI and the destination of the trips could be anywhere in the SCAG region

XI = External-to-internal trips, where the origin of the trips could be anywhere in the SCAG region and the destination of the trips is within the Palmdale SOI

Traffic Report

The daily percent share of the VMT for trips originating in the Palmdale SOI to all areas in the region, including Palmdale, is illustrated in Figure 9.

**Figure 9: 2045 Base with High Desert Corridor Daily VMT Share Originating in the Palmdale Sphere of Influence**

Traffic assignments are performed to produce traffic volumes on the various facilities, both within and outside the Palmdale SOI. Traffic assignments are available for AM peak period, mid-day period, PM peak period, evening period, night period and daily. The daily traffic assignment volumes (bandwidths) are shown in Figure 10. Figure 11 displays the difference in daily volumes with and without the High Desert Corridor Freeway, where green bandwidths display the volumes that the new facility is carrying, and red bandwidths display the decrease in volumes on all other facilities, thereby improving LOS conditions on these facilities.

Figure 10: 2045 Base with High Desert Corridor Daily Traffic Volumes Forecast

Figure 11: Comparison of 2045 Base to 2045 Base with High Desert Corridor Daily Traffic Volumes Forecasts

The post-processed daily assignment volumes and the LOS at various segments are reported in Table 17.

**Summary**

Daily trips are defined as having an origin, destination or both within the Palmdale SOI, and excludes pass-through trips. The Palmdale trips generate a VMT of 8,868,517 and a VHT of 335,887 on all the roadway way facilities within the SCAG region. The Palmdale SOI only accounts for 27.5 percent of the total VMT generated, Lancaster accounts for 12.6 percent, and the High Desert region accounts for 3.3 percent. The rest of Los Angeles County accounts for 32.5 percent.

The average trip length for trips originating and staying within the Palmdale SOI is 4.46 miles and this constitutes 71.9 percent of all the Palmdale trips. The average trip length for trips originating in the Palmdale SOI and having a destination anywhere in the SCAG region including itself is 11.62 miles.

Daily segment-based LOS results show the number of segments operating at LOS E is six and LOS F is five and accounts for 4.8 percent and 4.0 percent, respectively, of all the segments analyzed.

The Palmdale transportation network as a system, which includes all roadway facilities within the Palmdale SOI, generates 5,223,759 VMT, 120,023 VHT and 10,388 VHD daily. This accounts for all trips, including pass through trips, using the highway network within the Palmdale SOI.

## 2045 PREFERRED PLAN

The 2045 Base dataset was used for 2045 Preferred Plan scenario and the network assumptions are consistent with the RTP. The 2045 socio-economic data for the Palmdale SOI was updated based on the 2045 Preferred Plan used for the Palmdale General Plan update. The socio-economic data outside the Palmdale SOI is consistent with the SCAG assumptions for the region in the year 2040. The SCAG four-step model procedures were run with the updated planning variables in the Palmdale SOI. Table 19 reports the land use assumptions for the region.

The 2045 Base Highway network was reviewed by the City of Palmdale for the 2045 Preferred Plan and based on their recommendations, the highway network was updated. In addition, High-Speed Rail ridership at the Palmdale station was incorporated into the highway assignment procedures.

**Table 19: 2045 Preferred Plan Socio-Economic Forecast**

	Population	Households	Employment
Palmdale sphere	225,692	70,618	74,804
Lancaster sphere	218,843	69,963	59,678

San Bernardino County	2,731,308	854,360	1,028,132
Imperial County	965,566	312,223	419,808
Externals	0	0	0
Seaport/airport	0	0	0
<b>Total Region</b>	<b>22,109,182</b>	<b>7,404,691</b>	<b>9,879,149</b>

Select zone traffic assignment procedures were performed on the zones within the Palmdale SOI to produce trips that were generated or attracted to Palmdale SOI only. All other trips were not counted, as they were pass through trips. The daily average trip lengths for Palmdale only trips to different locations are shown in Table 20. The daily link-based VMT, VHT, and the average speeds by facility types are shown in Table 21 for Palmdale SOI only trips. The daily percent share of VMT for trips originating in the Palmdale SOI to all areas in the region, including Palmdale, is illustrated in Figure 12.

**Table 20: 2045 Preferred Plan Palmdale Sphere of Influence (II and IX) Average Trip Length**

From/To	Trip Length (II and IX*) (miles)	Percent Share of Trips
Palmdale sphere	4.44	70.8%
Lancaster sphere	8.99	17.2%
High Desert region	16.32	2.7%
Imperial County	224.68	0.0%
Los Angeles County	54.94	5.4%
Orange County	108.77	0.3%

Figure 12: 2045 Preferred Plan Daily VMT Share Originating in Palmdale Sphere of Influence

**Traffic Report**

Traffic assignments were performed to produce traffic volumes on the various facilities inside and outside the Palmdale SOI. Traffic assignments are available for AM peak period, mid-day period, PM peak period, evening period, night period and daily. The daily traffic assignment volumes (bandwidths) are shown in Figure 13. The post-processed daily assignment volumes and the LOS at various segments are reported in the Table 22.

**Summary**

Daily trips are defined as having an origin, destination or both within the Palmdale SOI and do not include pass-through trips. The Palmdale trips generate a VMT of 7,727,110 and a VHT of 261,367 on all the roadway facilities within the SCAG region. The Palmdale SOI only accounts for 28.9 percent of the total VMT generated, Lancaster accounts for 14.2 percent, and the High Desert region accounts for 4.1 percent. The rest of Los Angeles County accounts for 27.4 percent.

The average trip length for trips originating and staying within the Palmdale SOI is 4.44 miles, constituting 70.8 percent of all Palmdale trips. The average trip length for trips originating in the Palmdale SOI and having a destination anywhere in the SCAG region including itself is 10.86 miles.

Daily segment-based LOS results show the number of segments operating at LOS E is three and LOS F is eight and accounts for 2.7 percent and 7.1 percent, respectively, of all the segments analyzed.

The Palmdale transportation network as a system, which includes all roadway facilities within the Palmdale SOI, generates 4,685,219 VMT, 111,241 VHT and 8,259 VHD daily. This accounts for all trips, including pass through trips, using the highway network within the Palmdale SOI.

## Measures of Effectiveness

Measures of effectiveness (MOE) metrics can be used for scenarios to predict the effects of a project on the transportation network in Palmdale as a “system.” Some of the more important metrics include the change in VMT, VHT, and VHD between the project and no-project scenarios. Delay represents the amount of time lost for vehicles from the free-flow condition. If delay decreases, then the transportation network as a system will have improved performance with better operations and travel speeds. This is also in line with VMT as a metric that is being used for project-related impacts. Level of service metrics can still be used for intersection operations analysis and segment levels of service for an area defined around the project.

Measures of effectiveness were computed for all scenarios for the Palmdale General Plan.

Table 24 shows the various statistics for the home-based and all trip purposes for the Palmdale SOI under all scenarios. The average trip lengths for home-based work, home-based trips and all trip purposes decrease in the future Palmdale GP scenarios, which in turn reduces the VMT generated. The VMT per capita and the VMT per employee also decrease. In addition, the average trip lengths for the 2045 Preferred Plan scenario decreases. All these reductions effectively contribute toward the overall reduction in VMT and thereby improve the air quality by reducing the emissions of greenhouse gases and CO<sub>2</sub>.

Table 25 presents the percent share of VMT generated by trips between the Palmdale SOI and other areas of the SCAG region. The intra-Palmdale VMT increased in the 2045 Preferred Plan scenario, reducing VMT to other areas as designed using smart growth assumptions (e.g., a good mixture of households and employment and transit-oriented developments). Palmdale, an exporter of workers, now finds itself being less of an exporter with smart growth initiatives and striving toward being self-contained as evident by the reduction in the VMT to other regions and the increase in VMT to the Palmdale sphere of influence and neighboring areas (e.g., Lancaster and the High Desert Region). The VMT to other parts of Los Angeles and Orange counties dropped from 46 to 36 percent, a decrease of 10 percent, primarily due to the reduced number of longer trips.

Table 26 displays the link-based daily VMT generated by the SCAG model for the different facility types having an origin or destination in the Palmdale sphere of influence. Trips which are pass-through in nature, where they do not have an origin or destination in the Palmdale SOI are not counted. The future year Palmdale Preferred Plan has the lowest VMT among all the scenarios, reflecting shorter trip lengths to and from the Palmdale sphere of influence.

**Table 24: Trip Purpose Statistics**

Palmdale Sphere—Statistics	2017 Existing	2045 Base	2045 Preferred Plan
Home-based work trips—VMT per capita	16.43	14.54	8.85
Home-based work trips—average trip length	31.57	31.10	21.59
Home-based all trips—VMT per capita	26.19	23.20	16.57
Home-based all trips—average trip length	16.49	15.63	12.62
All trips—VMT per service population	34.30	30.60	27.00
All trips—average trip length	11.87	11.56	10.86

**Table 25: VMT between Palmdale Sphere and Areas within the SCAG Region**

Percent VMT	2017 Existing	2045 Base	2045 Preferred Plan
Within Palmdale sphere	14.4%	15.9%	16.9%
Within Palmdale/Lancaster/High Desert region	33.4%	34.4%	38.3%
Between Palmdale and LA County/Orange County	45.9%	41.9%	35.6%
Between Palmdale and remainder of SCAG region and external trips from outside the region	20.7%	23.8%	26.1%
<b>Total</b>	<b>100.0%</b>	<b>100.0%</b>	<b>100.0%</b>

**Table 26: VMT to/from Palmdale Sphere to Areas within the SCAG Region by Facility Type**

Facility Type	2017 Existing	2045 Base	2045 Preferred Plan
Freeways	2,893,868	2,945,756	2,395,390
HOT facilities	11,431	9,285	7,911
HOV facilities	284,701	284,422	184,453

<b>Total</b>	<b>8,028,726</b>	<b>8,862,268</b>	<b>7,727,110</b>

Table 27 displays the link-based daily VMT, VHT, VHD, and average speeds for the Palmdale transportation network as a system that includes all roadway facilities within the Palmdale SOI. The summary statistics include all trips generated by the SCAG model regardless of whether the trip begins or ends within the Palmdale SOI. All trips using the highway network within the Palmdale SOI are counted.

**Table 27: VMT for All Links within the Palmdale Sphere of Influence**

All Trips Generated within or Passing through Palmdale Sphere (II, IX-XI and XX)*	2017 Existing	2045 Base	2045 Preferred Plan
Daily VMT (miles)	4,275,553	5,029,773	4,685,219
Daily VHT (hours)	100,085	123,190	111,241
Daily delay (hours)	6,783	12,590	8,259
Average speed (mph)	42.7	40.8	42.1

\*II = Internal-to-internal trips, where both ends of the trips are within the Palmdale SOI

IX = Internal-to-external trips, where the origin of the trips is within the Palmdale SOI and the destination of the trips could be anywhere in the SCAG region.

XI = External-to-internal trips, where the origin of the trips could be anywhere in the SCAG region and the destination of the trips is within the Palmdale SOI

XX = External-to-external trips, where both the origin and destination of the trips could be anywhere in the SCAG region

**Traffic Report**

The link-based performance statistics for the roadway facilities within the Palmdale SOI are shown in Table 28. The VMT, VHT, and VHD are reported for daily and AM and PM peak periods for all the scenarios. These metrics are lower in the 2045 Preferred Plan than in the 2045 base scenario. The VHD decreases by more than 30 percent, suggesting that the Palmdale transportation network as a system is performing exceptionally well. The delay represents the degradation of the system from free-flow conditions where there is minimal or no delay. The congested speeds on the system have also improved.

**Table 28: Performance Statistics by Facility Type within the Palmdale Sphere of Influence**

Figures 14 through 16 illustrate the comparison of scenarios by facility types. The figures clearly show the 2045 Preferred Plan scenario performs very well compared to the 2045 Base scenario.

**Figure 14: Daily VMT by Facility Type within the Palmdale Sphere of Influence for All Scenarios**

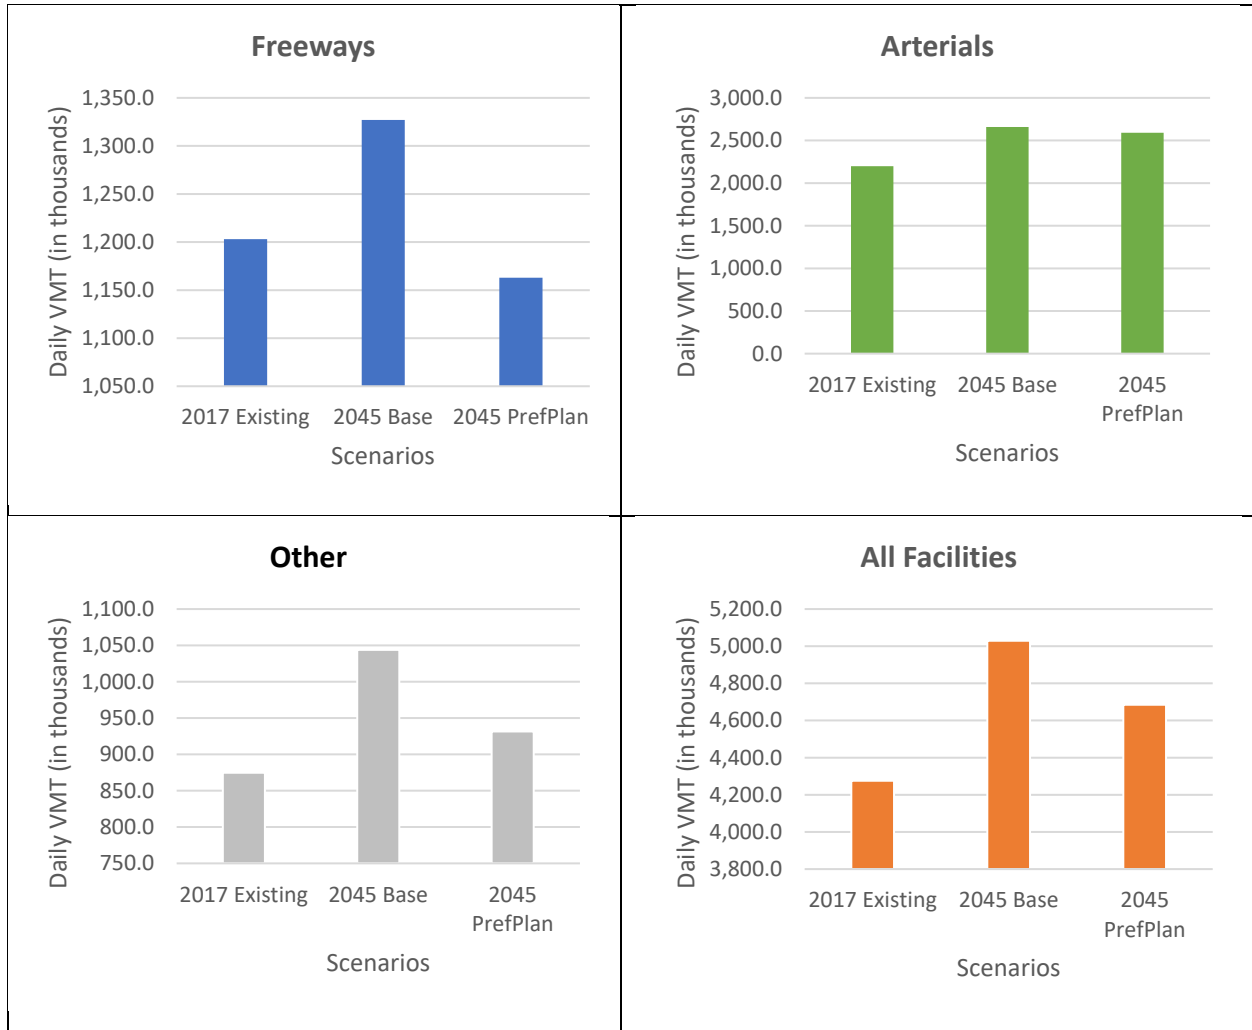

Figure 15: Daily VHT by Facility Type within the Palmdale Sphere of Influence for All Scenarios

Figure 16: Daily VHD by Facility Type within the Palmdale Sphere of Influence for All Scenarios

### Summary

The 2045 Preferred Plan scenario significantly reduces home-based work VMT per capita compared to the 2017 Existing scenario. This is validated by average trip lengths that are more than 30 percent shorter. The average trip length for all home-based trips in the 2045 Preferred Plan scenario decreases by 23 percent from the 2017 Existing scenario. The VMT per service population also decreases by more than 22 percent, and the average trips length for all trips decreases by 8 percent. The VMT generated by the 2045 Preferred Plan scenario from the Palmdale sphere of influence to the entire SCAG region also reduces by about four percent. The significant decrease in VMT as seen above contributes to the reduction in greenhouse gases and effectively contributes to SB 743 compliance.

The VMT for all trips (II, IX, XI and XX) using the Palmdale Transportation Network, regardless of their origin or destination also decreases by seven percent when comparing the 2045 Preferred Plan to the 2045 Base scenario. The VHT also decreases by 10 percent. Most importantly, the VHD (which reflects the performance of the system) reduces by 34 percent. This reduction in delay makes the Palmdale transportation network as a system operate exceptionally well when compared to the 2045 Base scenario. Better operating conditions result in higher speeds and lower greenhouse gas emissions.

# Vehicle Miles Traveled Impact Criteria Analysis

## SB 743 OVERVIEW

On September 27, 2013, Governor Jerry Brown signed SB 743 into law to start a process intended to fundamentally change transportation impact analysis as part of CEQA compliance. In response to SB 743, the Office of Planning and Research (OPR) selected vehicle miles of travel (VMT) as the new transportation impact metric. The OPR then submitted updates to the CEQA Guidelines and these updates were certified by the Natural Resources Agency in December 2018. Lead agencies have been granted a grace period until July 1, 2020 to opt-in to implementing a VMT analysis as part of the environmental review process.

*CEQA refers to the California Environmental Quality Act. This statute requires identification of any significant environmental impacts of state or local action including approval of new development or infrastructure projects. The process of identifying these impacts is typically referred to as the environmental review process.*

Accordingly, SB 743 eliminates level of service (LOS) as the basis for determining significant transportation impacts under CEQA and provides a new performance metric – VMT. With this change, the State is shifting the focus from measuring a project’s impact to drivers (LOS) to measuring the impact of driving (VMT) to achieve the goals of reducing greenhouse gas (GHG) emissions, encouraging infill development, and improving public health through active transportation.

The OPR produced a Technical Advisory to assist lead agencies with the implementation of SB 743 by steering lead agencies toward the variety of implementation questions they face with respect to shifting to a VMT metric. However, lead agencies must continue to make specific decisions regarding VMT methodology, thresholds, and mitigation that are consistent with the county’s goals as expressed in their relevant plans and policies.

## PROJECTS AFFECTED BY SB 743

Two types of projects, land use development projects and transportation infrastructure projects, are affected by SB 743.

- **Land Use:** Development projects and plans (e.g., Community Plan or Specific Plan) will continue to require a transportation impact analysis. However, transportation impact studies conducted as part of the CEQA process will now be required to base project impacts on VMT. In addition, some projects, such as those located adjacent to transit, may be screened from requiring a detailed VMT analysis.
- **Transportation Infrastructure:** Prior to SB 743, transportation projects that had the potential to worsen vehicle delay, such as narrowing a roadway to enhance travel for bicyclists and pedestrians, may result in an environmental impact under CEQA. With SB 743 in place, transportation projects that promote travel by non-auto modes are no longer considered to result in an environmental impact. Roadway widening projects will now need to consider the potential to induce vehicle travel demand due to increased capacities, which may make driving a more attractive travel option.

SB 743 does not prevent a jurisdiction from continuing to analyze LOS as part of the development review process to determine if transportation improvements are needed to accommodate the proposed land uses, but LOS will no longer constitute the basis for CEQA impacts.

## LOS ANGELES COUNTY VMT IMPLEMENTATION

Los Angeles County updated its *Transportation Impact Report Guidelines* in July 2020 to lay forth the requirements for CEQA and non-CEQA sections of transportation studies.

The updated CEQA guidelines contains a new section to determine the significance of transportation impacts (Section 15064.3). While OPR's Technical Advisory helped lead agencies regarding the variety of implementation questions to consider when adopting the new CEQA guidance, lead agencies must still make their own specific decisions about VMT methodology, thresholds, and mitigation.

The Los Angeles County guidance states that the Public Works Department will (generally) require the preparation and submission of a transportation impact analysis for projects that meet the following criteria.

- **Development Projects**
  - Estimated to generate a net increase of 110 or more daily vehicle trips.
- **Transportation Projects**
  - Likely to induce additional vehicle miles traveled (VMT) by increasing vehicle capacity.
  - Projects for which a transportation impact analysis is required by County ordinance, regulation, resolution, court order, or directive from the Board of Supervisors, Regional Planning Commission.

The transportation impact analysis will require the analyses and forecasting of impacts or deficiencies to the circulation system generated by the project. The transportation impact analysis will also identify feasible measures or corrective conditions to offset any impacts or deficiencies.

The county's process includes defining its Baseline VMT, developing VMT screening criteria, defining its impact thresholds, and determining potential mitigation strategies.

Defining the county's Baseline VMT is an important initial step in the implementation process because a VMT of the project will be compared to the county Baseline VMT to determine if the project exceeds the county's thresholds for VMT impacts. To determine the appropriate Baseline VMT for Los Angeles County, the VMT trends throughout the county and region were considered.

The regional Southern California Association of Governments (SCAG) model was determined to be the best available tool to estimate VMT in Los Angeles County. The most current version of the SCAG model, with a base year of 2012 and future year of 2040, was developed for the *2016 SCAG Regional Transportation Plan/ Sustainable Communities Strategy*, April 2016. The model utilizes traffic analysis zones (TAZs) that contain socio-economic data reflecting the population, employment, and land use development characteristics throughout the region.

## BASELINE VMT

Given the differences in VMT trends between the northern and southern planning areas in Los Angeles County, the County has adopted separate North County and South County Baseline VMT benchmarks. As shown in Figure 17, the North County Baseline VMT contains the Antelope Valley, Santa Clarita Valley, and Santa Monica Mountains planning areas in the more rural portion of the County and the South County Baseline VMT contains the remaining planning areas in the more urban portion of the County.

By establishing a North County and South County Baseline VMT, the County is acknowledging the differences in travel behavior in these areas given the land use context and transportation network to represent a more realistic and reasonable picture of VMT activity levels, and thus a more appropriate and feasible baseline for VMT analysis.

**Figure 17: Baseline VMT Benchmark Coverage Area for Los Angeles County**

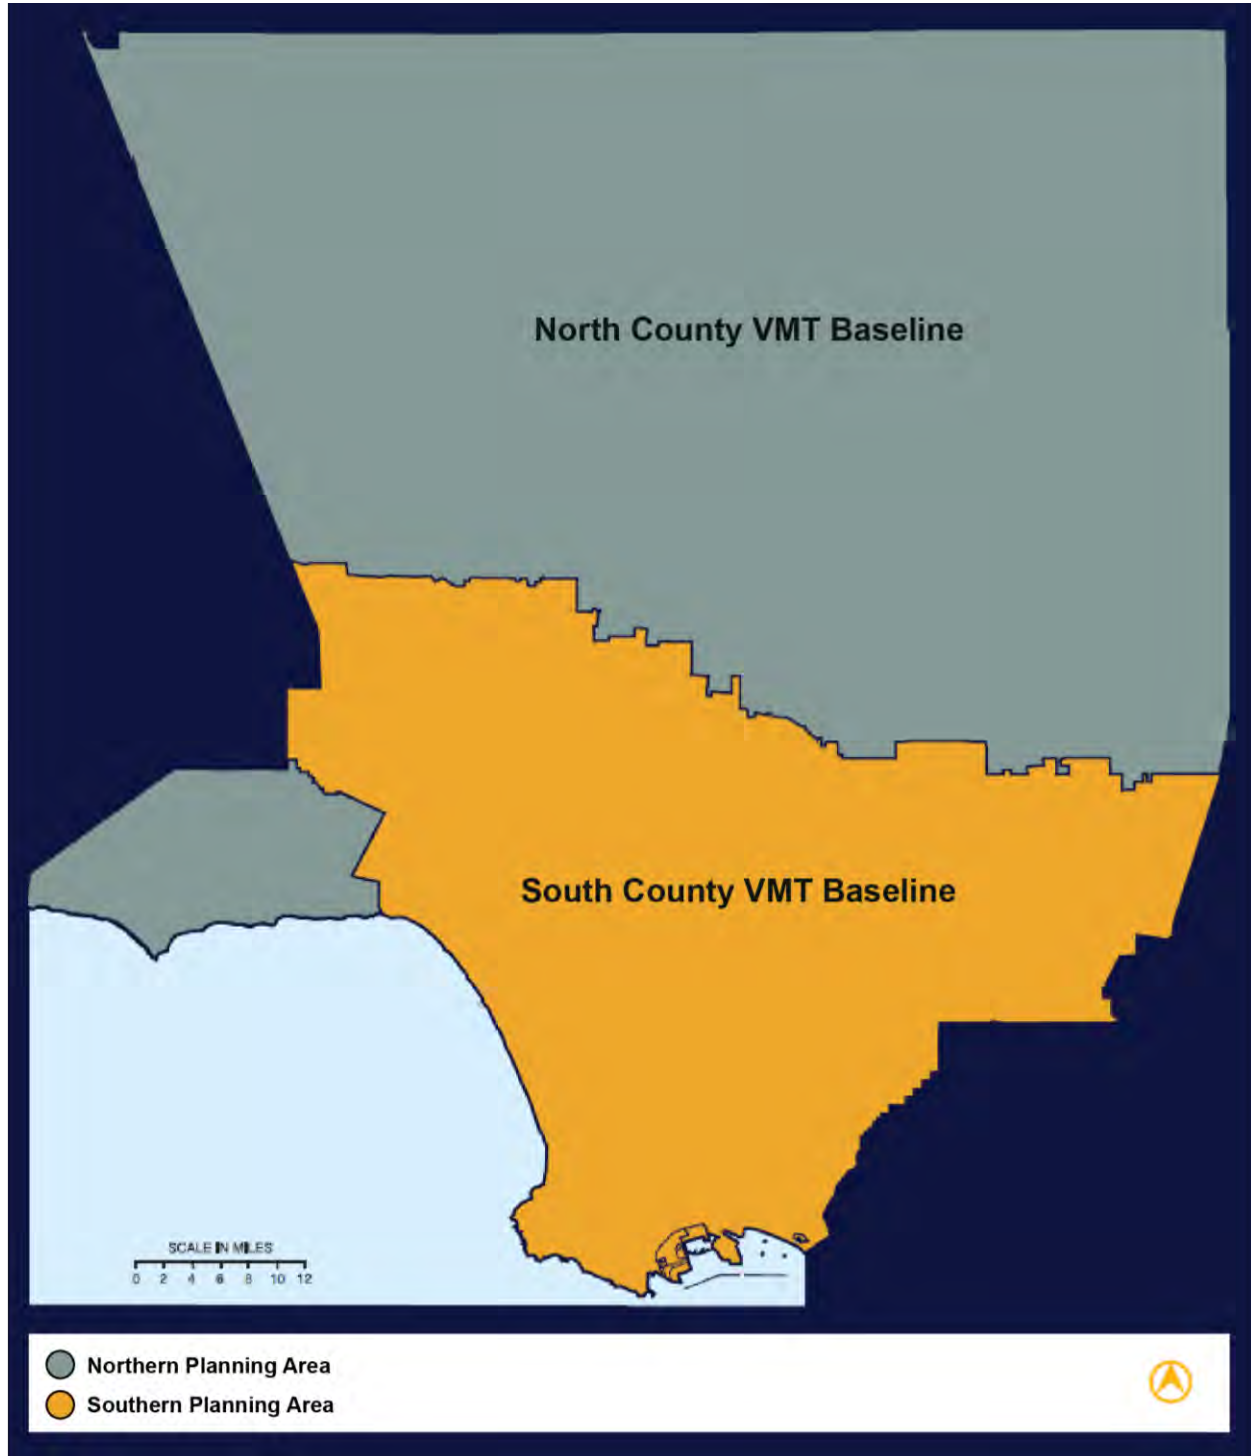

Table 30 reports the North County and South County Baseline VMT metrics for the county as reported in the *Transportation Impact Analysis Guidelines* document published by the Los Angeles County Public Works updated September 2, 2020. Future development projects and plans in each of these areas will be compared to the applicable Baseline VMT metrics to determine if they meet the County’s thresholds for a VMT impact. The higher North County Baseline VMT acknowledges that projects and plans in the northern portion of the county will generate higher levels of VMT and should be compared to current VMT trends when determining the significant findings for VMT impacts. The lower South County Baseline VMT holds projects and plans in the southern portion of the county to a more conservative standard than if it was compared to the average VMT for the overall county. However, projects and plans should be compared to current VMT trends in the southern portion of the county with similar land use context when determining if VMT impacts may occur.

**Table 30: Baseline VMT Thresholds for North and South County**

Baseline Area	Total VMT per Service Population	Residential VMT per Capita	Employment VMT per Employee
North County	43.1	22.3	19.0
South County	31.1	12.7	18.4

Source: *Transportation Impact Analysis Guidelines*, Los Angeles County Public Works, July 23, 2020

While the baseline VMT trends included in this table reflect the base year of the SCAG model, baseline conditions for CEQA purposes will be specific to the release date of a project’s notice of preparation. The Total VMT per Service Population threshold is independent of (and not necessarily a total of) Residential VMT per Capita and Employment per Employee.

The VMT methodology for land use projects and plans is based on the origin-destination (OD) VMT method. The OD VMT method estimates VMT generated by land uses in a specific geographic area such as the entire county, or a smaller area such as a regional planning area (e.g., Palmdale) or project site. All vehicles traveling to and from the defined geographic area are tracked within the SCAG model and the number of trips and length of trips are used to calculate the OD VMT. The OD VMT method requires two major data inputs. The first data input is the set of vehicle trip tables (including all vehicle trips by vehicle mode and by time of day) that contain the number of trips between each zone in the model. The second data input is the set of highway distance skims (by vehicle mode and by time of day) that allows the trip distances for each OD pair to be based on congested travel time, speed, and cost from the final highway assignment. The total VMT matrices are then generated by multiplying the final OD trip tables with the corresponding highway distance skims. This method of computing VMT is also referred to as zone-based.

For land use projects and plans, the OD VMT methodology is the most appropriate method because it tracks all trips by trip purpose and the full length of those trips generated by the proposed land uses. The methodology can be used to report the following VMT metric.

- **Total VMT per Service Population** (all vehicles and all trip purposes): The total VMT to and from all zones in the geographic area are divided by the total service population to establish the efficiency metric of VMT per service population. The total service population is the sum of the number residents and the number of employees.

## VMT THRESHOLDS FOR LAND USE PLANS

The Los Angeles County Transportation Impact Analysis Guidelines call for land use plans to promote outcomes whereby total VMT per service population (residents and employees) should be 16.8 percent below the existing VMT per service population for the Baseline Area in which the plan is located (see Table 30). Doing so will align the county with the latest state climate goals and help achieve its own targets. A 16.8 percent VMT reduction threshold also sets a higher bar than the suggested OPR threshold of 15 percent based on the latest research available. **At the time of the preparation of this document, the City of Palmdale is utilizing the LA County Guidelines for North County as the most appropriate VMT thresholds and analysis methodology.**

## VMT ANALYSIS

The Palmdale General Plan envisions a growth in population, households and employment to work toward a goal of being a self-contained community in the northern part of Los Angeles County, also known as Antelope Valley. The socio-economic data for the Palmdale sphere of influence, which includes the City of Palmdale and the surrounding areas, is reported in Table 31. The socio-economic data reported include population, households, employment and service population (which represents the sum of population and employment). A map of the area is displayed in Figure 18.

**Table 31: Palmdale Sphere of Influence Socio-economic Data**

	2017 SCAG*	2017 Existing**	2040 SCAG†	2045 Base‡	2045 Preferred Plan§
Population	195,574	188,488	248,031	240,515	225,692
Households	56,863	53,626	75,925	72,840	70,618
Employment	35,575	49,501	39,821	67,085	74,804
Service Population	231,149	237,989	287,852	307,600	300,496

\*Based on the 2017 existing SCAG land use scenario and the 2016-2040 Regional Transportation Plan/Sustainable Communities Strategies (RTP/SCS).

\*\*Based on the 2017 SCAG with the City of Palmdale assumptions for households, population and employment and the SCAG 2016-2040 RTP/SCS. In addition, Plant 42 employment was added. The land use was updated for the Palmdale SOI zones only, all other zones contained the SCAG 2016-2040 RTP/SCS.

†Based on the 2040 SCAG land use scenario and the SCAG 2016-2040 RTP/SCS.

‡Based on the 2040 SCAG with the City of Palmdale assumptions for households, population and employment and the SCAG 2016-2040 RTP/SCS. In addition, Plant 42 employment was added. The land use was updated for the Palmdale SOI zones only, all other zones contained the SCAG 2016-2040 RTP/SCS.

§Based on the 2040 SCAG with the GP Preferred Plan assumptions for households, population and employment and SCAG 2016-2040. The land use was updated for the Palmdale SOI zones only, all other zones contained the SCAG 2016-2040 RTP/SCS.

**Figure 18: Palmdale Sphere of Influence**

The project impacts criterion, as defined by the Los Angeles SB 743 implementation guideline, states that all land use plans in the Los Angeles County area have certain VMT thresholds that must be met.

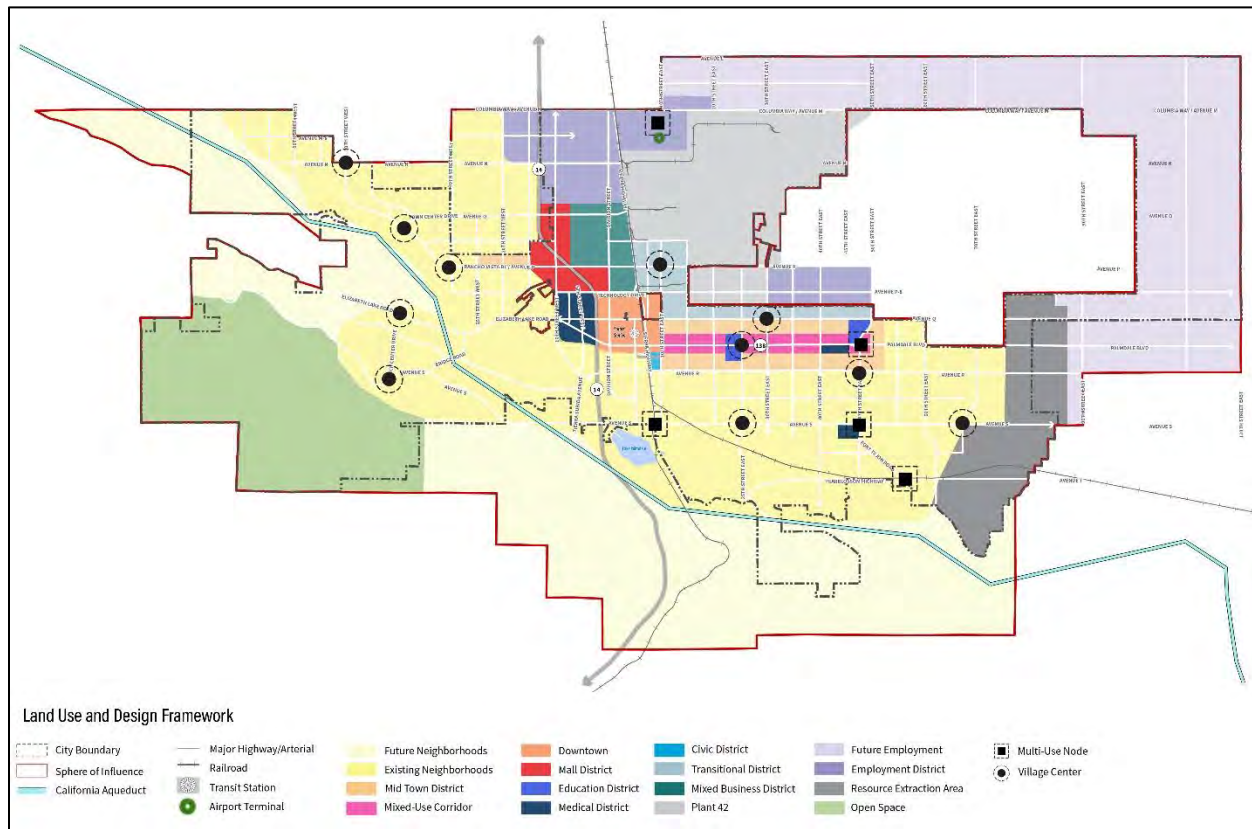

Palmdale is located in the North County region and as such the North County VMT criteria apply. The Baseline VMT threshold guidelines were presented previously in Table 30. The VMT screening procedure of the Palmdale General Plan Update (Palmdale GP) suggests that there are impacts because more than 110 trips are generated; therefore, a VMT impact criteria assessment is required for the Palmdale GP. The procedure compares the “Total VMT per Service Population” against the North County Baseline VMT scenario (see Table 30) for any impacts generated by the Palmdale GP.

The Palmdale General Plan preferred scenario (2045 Preferred Plan) is the future land use forecasting developed for future growth within the Palmdale city limits and its sphere of influence. The 2045 Preferred Plan was selected based on extensive review and feedback received of the scenarios by the Planning Commission, City Council, General Plan Advisory Committee, the community, and stakeholders. The major elements of the 2045 Preferred Plan, as shown in Figure 19, include:

- Two education districts
- Three health and wellness districts
- Regional commercial uses around the Antelope Valley Mall and a regional commercial area to the west of the intersection of Avenue Q/45<sup>th</sup> Street East
- A mix of employment uses around Plant 42
- Mixed uses along the Palmdale Boulevard corridor
- Medium density housing north and south of Palmdale Boulevard
- Village Centers with a mix of neighborhood retail or commercial uses along with residential uses in mixed-use format in various locations throughout the city.

Figure 19. 2045 Preferred Plan Land Use and Design Framework

The SCAG RTP/SCS Travel Demand Model (SCAG model) was run through all four steps of the SCAG model for the following scenarios:

- 2017 SCAG:** This model run is based on the 2017 model forecast year assumptions using the 2016 RTP/SCS model directly without any modifications.
- 2017 Existing:** The 2017 SCAG model forecast year is used and the land use in the Palmdale SOI is modified with land use obtained from the City of Palmdale. The employment is updated for several zones to account for Plant 42, which is not in the employment forecasts.
- 2040 SCAG:** This model run is based on the 2040 model forecast year assumptions using the 2016 RTP/SCS model directly without any modifications.
- 2045 Base:** The 2040 SCAG model forecast year is used and the land use in the Palmdale City limits were modified to reflect updated assumptions. The 2045 Base scenario is developed by updating the 2040 SCAG land use within the Palmdale SOI with land use obtained from the City of Palmdale. The employment is updated for a few zones to account for Plant 42, which was not in the employment forecasts. The land use updates are made to all the zones within the Palmdale SOI to reflect updated socioeconomic data forecasts.
- 2045 Preferred Plan:** The 2040 SCAG model forecast year is used and the land use in the Palmdale City limits are modified to reflect the final 2045 Preferred Plan scenario assumptions. The 2045 Preferred Plan scenario are updated with revised socioeconomic data forecasts which are conservative in nature. Land use updates are made to all the zones within the Palmdale SOI to reflect updated socioeconomic data forecasts.

**Traffic Report**

The SCAG zone system is refined for the Palmdale sphere of influence only to perform traffic assignments after the original SCAG model is run through the complete SCAG model (four steps) for each of the scenarios. The expanded zone system in the Palmdale sphere of influence is used for traffic assignment purposes to better reflect the ground conditions in the study area as the original SCAG zones are too large.

The VMT generated by the Palmdale sphere of Influence encompasses the city of Palmdale for which the land use plan is being developed. The geographic area covered by the Palmdale sphere of influence includes the city of Palmdale and the surrounding areas as shown previously in Figure 2. The VMT generated by trips between the Palmdale sphere of influence and other areas of the SCAG region is computed for all trips from and to the Palmdale SOI. The VMT threshold results of the various scenarios are shown in Table 32, which compares the Baseline VMT threshold criteria for the North County region. The Palmdale GP scenarios are well below the North County targets of 35.9, which is a 16.8 percent reduction from the baseline VMT. The Palmdale GP scenarios effectively reduce the total VMT per service population by more than double the required reduction needed. VMT per service population is the only metric or impact criteria required for a land use plan such as the Palmdale General Plan, as reported in Section 3.1.3—Impact Criteria of the *Transportation Impact Analysis Guidelines* document published by the Los Angeles County Public Works (July 23, 2020). The 2045 Preferred Plan has the least significant impact of all the scenarios, where the socio-economic data were evaluated and placed in the optimum locations for smart growth considerations. Therefore, there is no VMT impact from the 2045 Preferred Plan and as such, no mitigations are necessary.

**Table 32: Baseline VMT Thresholds—Total VMT per Service Population**

	2017 SCAG	2017 Existing	2040 SCAG	2045 Base	2045 Preferred Plan
Total VMT for service population from the model scenarios *	35.4	34.3	32.5	30.6	27.0
VMT impact criteria threshold result	Pass	Pass	Pass	Pass	Pass

Note: North County baseline VMT for total service population is 43.1 as shown in Table 31.

\*A 16.8% decrease from the baseline VMT amounts to 35.9 as recommended by the Los Angeles County Public Works *Transportation Impact Analysis Guidelines*.

In addition, other metrics are reported against the Baseline North County targets as shown in Table 32 below for home-based work and all home-based trips. All home-based trips are trips that originate at home; home-based work trips originate at home and end at a workplace. These metrics are not required for land use plans such as the Palmdale General Plan as they are primarily required for project specific VMT impacts. Table 33 shows the home-based VMT comparisons, where the employment VMT per employee is very similar to the North County Baseline target for the 2045 Preferred Plan scenario. The residential VMT per capita is, however, significantly lower than the baseline target and effectively reduces the overall VMT for home-based trips that includes all residents, which in turn reduces emissions.

**Table 33: Baseline VMT Thresholds—Home-based Trips**

North County Target	Target	2017 Existing	2045 Base	2045 Preferred Plan
Employment VMT per employee*	19.00	13.37	11.48	19.65
Residential VMT per capita**	22.30	26.19	23.20	16.57

\*Employment VMT is the VMT generated by home-based work trip attractions

\*\*Residential VMT is the VMT generated by home-based work and home-based other trip productions.

Note: These metrics are not required for land use plans such as the Palmdale General Plan and are presented for information purposes only.

Table 34 presents the various statistics for the resident home-based trips with origins (productions) in the Palmdale SOI for all the scenarios. The average trip lengths for home-based work and all home-based trips decrease in the 2045 scenarios, which in turn reduces the VMT generated. The resident VMT per capita and the resident VMT per employee also decrease. All these reductions effectively contribute to the overall reduction in VMT and thereby improve the air quality by reducing the emissions of greenhouse gases and CO<sub>2</sub>.

**Table 34: Home-based Trips and VMT Statistics**

	2017 Existing	2045 Base	2045 Preferred Plan
Palmdale sphere - population	188,488	240,515	225,692
Palmdale sphere - households	53,626	72,840	70,618
Palmdale sphere - employment	49,501	67,085	74,804
Home-based work trips - productions	98,084	112,477	92,503
Home-based work VMT - productions	3,096,569	3,497,945	1,997,333
Home-based work trips - attractions	59,460	76,521	108,228
Home-based work VMT - attractions	661,869	770,230	1,469,886
Home-based work trips per capita	0.52	0.47	0.41
Home-based work trips per employee*	1.20	1.14	1.45
Home-based work VMT per capita	16.43	14.54	8.85
Home-based work VMT per employee*	13.37	11.48	19.65
Home-based work - trip length	31.57	31.10	21.59
Home-based all trips - productions	299,413	357,163	296,393
Home-based all VMT - productions	4,936,083	5,580,844	3,740,763
Home-based all trips - attractions	247,409	320,037	308,625
Home-based all VMT - attractions	2,040,790	2,543,397	2,874,992
Home-based all trips per capita	1.59	1.48	1.31
Home-based all trips per employee*	5.00	4.77	4.13
Home-based all VMT per capita	26.19	23.20	16.57
Home-based all VMT per employee*	41.23	37.91	38.43
Home-based all trips – trip length	16.49	15.63	12.62

\*This computation uses attractions

**Traffic Report**

Table 35 shows that the average trip length for all trip purposes also decreases, thereby reducing VMT and contributing to the reduction of greenhouse gases. The zone-based VMT computations are computed by using a highway skim matrix for travel-time and travel-distances along with the trip table matrices. This procedure involves matrix computations, where the skim matrices are derived from a valid traffic assignment. The results of these computations are summarized only for the zones in the Palmdale SOI. Note that the VMT generated by this process (skim-based) will be slightly different from the VMT generated by a link-based process. The VMT reported in Table 35 is used for computing the total VMT per service population.

**Table 35: All Trips and VMT Statistics**

All Trip Purposes—Palmdale Sphere	2017 Existing	2045 Base	2045 Preferred Plan
Total service population	237,989	307,600	300,496
VMT (zone-based)	8,153,876	9,424,251	8,111,684
Total trips per capita	2.70	2.52	2.50
Total trips per employee	10.30	9.04	7.54
Total VMT per service population	34.30	30.60	27.00
<b>All trips—average trip length</b>	<b>11.87</b>	<b>11.56</b>	<b>10.86</b>

## VMT MITIGATION OPPORTUNITIES

Although no mitigations are required for the 2045 Preferred Plan, it is useful to understand the mitigation strategies that may be applied in the future, if needed, to reduce the VMT through mitigation measures. The types of mitigation that affect VMT are those that reduce the number of single-occupant vehicles generated. This can be accomplished by modifying the proposed land uses or by implementing transportation demand management (TDM) strategies. Transportation demand management strategies are reductions to trip generation based on certain types of project site modifications, programming, and operational changes (see Table 36 for examples of TDM strategies).

Research documented in the 2010 California Air Pollution Control Officers Association (CAPCOA) publication, *Quantifying Greenhouse Gas Mitigation Measures*, offers TDM methodologies based on preferred literature, along with methodology based on alternative literature, to estimate the effectiveness of each strategy<sup>2</sup>.

As part of the environmental process, specific mitigation strategies must be tailored to the characteristics of the project area followed by analysis and documentation of the effectiveness of the mitigation strategies to determine if those strategies will adequately mitigate impacts or if impacts will remain significant and unavoidable. Given that research on TDM strategies is on-going, feasible mitigation measures must be considered based on the best data available at the time.

The strategies described below in Table 36 are examples of the mitigation options that are most effective in areas comparable to Palmdale. Many of these strategies have already been implemented.

<sup>2</sup> California Air Pollution Control Officers Association, *Quantifying Greenhouse Gas Mitigation Measures*, August 2010  
<http://www.capcoa.org/wp-content/uploads/downloads/2010/09/CAPCOA-Quantification-Report-9-14-Final.pdf>.

Traffic Report

**Table 36: VMT Reduction Strategies**

Strategy	Description	VMT Benefit	Range of CAPCOA VMT Reductions
Increase diversity of developments (mixed use)	Includes mixed uses within Projects or in consideration of surrounding area.	Minimizes number and length of vehicle trips.	9 to 30%
Provide pedestrian network improvements	Creates pedestrian network within projects and connects to nearby destinations. Could also occur through impact fee program for active transportation improvements.	Encourages people to walk within and to project.	0 to 2%
Provide traffic calming measures and low-stress bicycle network improvements	Creates networks with low vehicle speeds and volumes that support walking and bicycling. Could also occur through impact fee program for active transportation improvements.	Encourages people to bicycle, especially for shorter trips.	0.25 to 1%
Implement car-sharing and ride-sharing programs	Shared fleet of vehicles accessible on-site for residents or employees. Can serve as a first/last-mile solution to connect with transit.	Reduces the need to own a vehicle or the number of household vehicles.	Car-Sharing: 0.4 to 0.7% Ride-Sharing: 1 to 15%
Encourage telecommuting and alternative work schedules	Encouraging telecommuting and alternative work schedules reduces the number of commute trips and therefore VMT traveled by employees. Alternative work schedules could take the form of staggered start times, flexible schedules, or compressed work weeks.	Reduces the number of days employees need to work and/or shifts commute time outside of peak periods to avoid adding to congestion.	0.07 to 5.5%
Commute Trip Reduction Programs	Projects can implement a voluntary Commute Trip Reduction program with employers to discourage single-occupancy vehicle trips and encourage alternative modes of transportation. Alternatively, a jurisdiction can implement a Commute Trip Reduction Ordinance with the intent of reducing drive-alone travel mode share.	Encourages alternatives to commuting in single-occupancy vehicles.	Varies based on selected programs
Limited Parking Supply	Projects can change parking requirements and types of supply within the Project site to encourage “smart growth” development and alternative transportation choices by project residents and employees.	Encourages alternatives to the use of single-occupancy vehicles.	5% - 12.5%
Unbundle Parking Costs from Property Cost	Unbundling separates parking from property costs, requiring those who wish to purchase parking spaces to do so at an additional cost from the property cost.	Encourages alternatives to the use of single-occupancy vehicles.	2.6% - 13%

**Traffic Report**

Table 37 presents the percent share of VMT generated by trips between the Palmdale sphere of influence and other areas of the SCAG region. The intra-Palmdale VMT increased in the 2045 Preferred Plan scenario, reducing VMT to other areas using smart growth assumptions (e.g., a good mixture of households and employment and transit-oriented developments). Palmdale has been an exporter of workers, but now finds itself being less of an exporter with smart growth initiatives and striving toward being self-contained as evident by the reduction to VMT to other regions and the increase in VMT to the Palmdale sphere of influence and neighboring areas (e.g., Lancaster and the High Desert Region). The VMT to other parts of Los Angeles and Orange counties dropped from 49 to 36 percent, a decrease of 13 percent, primarily due to the reduced number of longer trips.

**Table 37: VMT between Palmdale Sphere and Areas within the SCAG Region**

Percent Share of VMT	2017 SCAG	2017 Existing	2040 SCAG	2045 Base	2045 Preferred Plan
Within Palmdale sphere	12.7%	14.4%	12.7%	15.9%	16.9%
Within Palmdale/Lancaster/High Desert region	30.9%	33.4%	29.8%	34.4%	38.3%
Between Palmdale and LA County/Orange County	48.9%	45.9%	46.4%	41.9%	35.6%
Between Palmdale and remainder of SCAG region and external trips from outside the region	20.2%	20.7%	23.8%	23.8%	26.1%
<b>Total</b>	<b>100%</b>	<b>100%</b>	<b>100%</b>	<b>100%</b>	<b>100%</b>

Table 38 displays the link-based daily VMT generated by the SCAG model for the different facility types having an origin or destination in the Palmdale sphere of influence. Trips which are pass-through in nature, where they do not have an origin or destination in the Palmdale SOI are not counted. The link-based VMT computations are computed by selecting all the zones in the Palmdale SOI and performing a “Select Zones” traffic assignment procedure.

**Table 38: VMT to/from Palmdale Sphere to Areas within the SCAG Region by Facility Type**

Facility Type	2017 SCAG	2017 Existing	2040 SCAG	2045 Base	2045 Preferred Plan
Freeways	2,991,484	2,893,868	3,069,614	2,945,756	2,395,390

Centroid connectors	423,875	450,545	453,483	520,432	480,325
<b>Total</b>	<b>8,047,133</b>	<b>8,028,726</b>	<b>8,701,278</b>	<b>8,862,268</b>	<b>7,727,110</b>

**Traffic Report**

Table 39 shows the link-based daily VMT including all trips generated by the SCAG model regardless of whether the trip begins or ends within the Palmdale sphere of influence. The 2045 Preferred Plan scenario is lower than the adopted 2040 SCAG RTP/SCS forecasts for both the SCAG region and the Palmdale sphere of influence. All trips using the highway network within the Palmdale SOI are counted.

**Table 39: VMT for All Links within the Geographic Area**

All Trips Generated within or Passing through Palmdale Sphere (II, IX-XI and XX)*	2017 SCAG	2017 Existing	2040 SCAG	2045 Base	2045 Preferred Plan
SCAG region-daily VMT	467,745,693	467,270,822	537,732,813	537,063,042	535,079,227
Palmdale sphere-daily VMT	4,196,206	4,275,553	4,798,099	5,029,773	4,685,219

\*II = Internal-to-internal trips, where both ends of the trips are within the Palmdale SOI

IX = Internal-to-external trips, where the origin of the trips is within the Palmdale SOI and the destination of the trips could be anywhere in the SCAG region.

XI = External-to-internal trips, where the origin of the trips could be anywhere in the SCAG region and the destination of the trips is within the Palmdale SOI

XX = External-to-external trips, where both the origin and destination of the trips is anywhere in the SCAG region

## Conclusion

It can be seen from Table 32 that the Palmdale General Plan scenarios are well within the acceptable VMT thresholds for land use plans in the North County region as the decrease in total VMT per service population is more than double the required reduction needed. The 2045 Preferred Plan has the lowest total VMT per service population among the scenarios with a reduction of more than 37 percent compared to the Baseline VMT for North County. As such, the 2045 Preferred Plan does not require mitigations.

The average overall trip length for all trip purposes decreases in the 2045 Preferred Plan scenario, in turn reducing the VMT generated. The home-based work VMT per capita and the home-based all VMT per capita also decreases. In addition, the average trip length for home-based work and home-based all trip purposes decreases in the 2045 Preferred Plan scenario, which in turn reduces the total amount of VMT generated. All these reductions in the amount of VMT generated effectively contribute toward improved air quality and thereby reduce the emissions of greenhouse gases and CO<sub>2</sub>.
